

Notice of Meeting

Special Health and Wellbeing Board

Thursday 4 May 2017 at 9.00am
in Committee Room 1 Council Offices
Market Street Newbury

Date of despatch of Agenda: Tuesday, 25 April 2017

For further information about this Agenda, or to inspect any background documents referred to in Part I reports, please contact Jo Reeves / Jessica Bailiss on (01635) 519486/503124

e-mail: joanna.reeves@westberks.gov.uk / jessica.bailiss@westberks.gov.uk

Further information and Minutes are also available on the Council's website at www.westberks.gov.uk

Agenda - Health and Wellbeing Board to be held on Thursday, 4 May 2017 (continued)

To: Garry Poulson (Volunteer Centre West Berkshire), Paul Jones (Group Manager (RBFRS)), Dr Bal Bahia (Newbury and District CCG), Dr Barbara Barrie (North and West Reading CCG), Heather Bowman (Executive Director Housing and Communities, Sovereign) Dr Lise Llewellyn (Public Health), Rachael Wardell (WBC - Community Services), Cathy Winfield (Berkshire West CCGs), Councillor Lynne Doherty (Executive Portfolio: Children's Services), Councillor Graham Jones (Executive Portfolio: Health and Wellbeing), Councillor Mollie Lock (Shadow Executive Portfolio: Education and Young People, Adult Social Care), Andrew Sharp (Healthwatch) and Councillor Rick Jones (Executive Portfolio: Adult Social Care)

Agenda

Part I

Page No.

- 1 **Apologies for Absence**
To receive apologies for inability to attend the meeting (if any).
- 2 **Declarations of Interest**
To remind Members of the need to record the existence and nature of any personal, disclosable pecuniary or other registrable interests in items on the agenda, in accordance with the Members' [Code of Conduct](#).

Items for discussion

- 3 **Better Care Fund 2017/19 (Tandra Forster/ Shairoz Claridge)** 5 - 40
That the Health and Wellbeing Board approves the draft plan and delegates authority to the Head of Adult Social Care, in consultation with the Chairman and Vice-Chairman of the Health and Wellbeing Board, to approve the final plans for the Better Care Fund 2017/19.
- 4 **Refreshed Local Transformation Plan for Children and Young People's Emotional Health and Wellbeing (Andrea King/ Sally Murray)** 41 - 60
To inform the Health and Wellbeing Board of the refreshed Local Transformation Plan for Children and Young People's Emotional Health and Wellbeing

Andy Day
Head of Strategic Support

Better Care Fund 2017/19 - Summary Report

Committee considering report:	Health and Wellbeing Board
Date of Committee:	4 May 2017
Portfolio Member:	Councillor Graham Jones
Date Portfolio Member agreed report:	03 March 2017
Report Author:	Tandra Forster
Forward Plan Ref:	EX3218

1. Purpose of the Report

- 1.1 The Better Care Fund (BCF) is a government initiative established to fast track integration with Health and Social Care. The West Berkshire Health and Wellbeing Board's Locality Integration Board has developed a draft plan based on the Department of Health's 2017-19 Integration and BCF policy framework, however the national guidance has not yet been published. Advice from the Better Care Team is that all localities will need to submit plans to NHS England by 16th May 2017.
- 1.2 In order to avoid any delay in the submission of the plan this report seeks the Health and Wellbeing Board's approval for the draft BCF plan for 2017/19, subject to the Head of Adult Social Care, in consultation with the Chairman and Vice-Chairman of the Health and Wellbeing Board, ensuring the plan aligns with the BCF National Guidance once it is published.

2. Recommendation:

- 2.1 That the Health and Wellbeing Board approves the draft plan and delegates authority to the Head of Adult Social Care, in consultation with the Chairman and Vice-Chairman of the Health and Wellbeing Board, to approve the final plans for the Better Care Fund 2017/19.

3. Implications

- 3.1 **Financial:** Funding allocations are still to be determined but are likely to be minimal; estimates are 1.79% in 2017/18 and 1.9% 2018/19 however, we are negotiating a 2.3% increase in 2017/18 and 2% in 2018/19 in line with inflation. Whilst plans will be agreed for two years there will still be some flexibility to make adjustments should the need arise. The additional funding announced in the Spring Budget 2017 will be ring fenced for Adult Social Care, we are awaiting detailed guidance but understand there will be conditions in relation to how it can be used.
- 3.2 **Policy:** None
- 3.3 **Personnel:** None

- 3.4 **Legal:** None
- 3.5 **Risk Management:** None
- 3.6 **Property:** None
- 3.7 **Other:** None

4. Other options considered

- 4.1 N/A

5. Executive Summary

- 5.1 The Better Care Fund (BCF) is a government initiative established to fast track integration with Health and Social Care. 2015/16 was the first year of implementation, all Councils and CCGs had to agree a plan and then obtain approval from their Health and Wellbeing Boards
- 5.2 There has been a delay in issuing the national guidance; we understand this is now likely to be towards the end of week commencing 24th April 2017. However, The Department of Health has issued the 2017-19 Integration and BCF policy framework, which confirms there are four national conditions, rather than the previous eight and four national performance metrics. Advice from the Better Care Team is that all localities will need to submit plans to NHS England by 16th May 2017.
- 5.3 Going forward it is still the intention that where systems are able to demonstrate real progress in their plans for integration it will be possible to 'graduate' from the BCF process. Neither the process nor criteria for this has been agreed but it is believed that from 6 – 10 systems will graduate in 2017/18.

6. Conclusion

- 6.1 The 2015/16 BCF has provided significant learning that should allow us to build on plans for the coming year. Delays in publishing the national guidance have created a degree of uncertainty but we have continued to develop local plans. This is reflective of the approach in both Reading and Wokingham Localities.

7. Appendices

- 7.1 Appendix A - Supporting Information
- 7.2 Appendix B – Equalities Impact Assessment
- 7.3 Appendix C – Better Care Fund Draft Plan 2017/19

Better Care Fund 2017/19

1. Introduction/Background

- 1.1 The Better Care Fund (BCF) is a government initiative established to fast track integration with Health and Social Care. 2015/16 was the first year of implementation, all Councils and CCGs had to agree a plan and then obtain approval from their Health and Wellbeing Boards.
- 1.2 The previous two years have required us to plan on an annual basis. The Better Care Team has now confirmed that the plans will be for two years. This will align them more closely with CCG financial planning.
- 1.3 Funding allocations are still to be determined but are likely to be minimal; estimates are 1.79% in 2017/18 and 1.9% 2018/19 however, we are negotiating a 2.3% increase in 2017/18 and 2% in 2018/19 in line with inflation. Whilst plans will be agreed for two years there will still be some flexibility to make adjustments should the need arise.
- 1.4 Going forward it is still the intention that where systems are able to demonstrate real progress in their plans for integration it will be possible to 'graduate' from the BCF process. Neither the process nor criteria for this has been agreed but it is believed that from 6 – 10 systems will graduate in 2017/18.

2. BCF National Policy Framework - Assurance

- 2.1 There has been a delay in issuing the national guidance; we understand this is now likely to be towards the end of w/c 24th April 2017. However, the Department of Health has issued the 2017-19 Integration and BCF Policy framework, which confirms there are four national conditions, rather than the previous eight and four national performance metrics. Advice from the Better Care Team is that all localities will need to submit their plans by 16th May 2017.
- 2.2 The four National Conditions are: -
 - Plans to be jointly agreed
 - NHS contribution to adult social care is maintained in line with inflation
 - Agreement to invest in NHS commissioned out-of-hospital services, which may include 7 day services and adult social care
 - Managing Transfers of Care (a new condition to ensure people's care transfers smoothly between services and settings).
- 2.3 The four National Performance Metrics are: -
 - Delayed transfers of care
 - Non Elective Admissions (General and Acute)

- Admissions to residential and care homes
- Effectiveness of Reablement

2.2 The Spring Budget on 8th March 2017 announced additional funding for Local Authorities over the next 3 years. This funding will be ring fenced for Adult Social Care. We have been advised conditions will apply to this funding, we await formal guidance. West Berkshire will receive £704,449 in 2017/18, £583,666 in 2018/19 and £281,912 in 2019/20.

3. West Berkshire Locality BCF Plan

3.1 A number of planning meetings have been held with the CCG; please see attached the latest draft plan, which is still work in progress and will be finalised following publication of the national guidance. For the overarching financial plan we have worked on the basis of a 1.79% increase on the revenue elements of the Better Care Fund.

3.2 In addition to the revenue amounts we anticipate that the Disabled Facilities Grant will continue to be paid through the BCF.

3.3 In the new plan the Joint Care Pathway will be confirmed as 'business as usual'. Given the change in status it has already been agreed that this funding will be added to the 'Maintain the provision of social care services'.

3.4 This year we have reduced the investment into 7 days services to £155k. This will require an adjustment to the current arrangement. The remaining funding will be used to fund a new 'step down' project in Birchwood Care Home; the project team have modelled the proposed arrangement on the Willows a successful service operated by Reading Council.

3.5 The BCF also includes funding for West of Berkshire projects. These include 'Connected Care', an ICT project that aims to support more effective information sharing across health and social care, a key requirement of any integration programme and 'Care Homes' which focuses on reducing the disproportionately high number of non elective admissions from care homes.

3.6 The West of Berkshire projects have been expanded to incorporate the Mental Health Street Triage. This reflects the intention of expanding the BCF to incorporate a broader range of priorities.

3.7 Subject to any change resulting from the publication of the BCF guidance we have limited funding. This means that we are not currently able to agree to other projects which would enhance the range of support to the local residents.

3.8 We have also agreed with the CCG to include investment related to the contract held with BFHT. This covers a range of services including intermediate care, speech and language therapy and the community geriatrician.

4. BCF Assurance Process

4.1 For 2017/18 the BCT have confirmed the assurance process will continue to be managed collaboratively between NHS England, the Local Government Association and Association of Directors of Adult Social Care. Initially there were three milestone dates, given the delay it is likely to be reduced to one.

5. Conclusion

- 5.1 The 2015/16 BCF has provided significant learning that should allow us to build on plans for the coming year. Delays in publishing the national guidance have created a degree of uncertainty but we have continued to develop local plans. This is reflective of the approach in both Reading and Wokingham Localities.
- 5.2 It is recommended, that the Board agrees the latest draft plan and gives the Head of Adult Social Care, in consultation with the Chairman and Vice-Chairman of the Health and Wellbeing Board, delegated authority to approve the plan in order that the submission date of 16th May 2017 is achieved.

6. Consultation and Engagement

West Berkshire Locality Integration Board

Background Papers:

n/a

Subject to Call-In:

Yes: No:

- The item is due to be referred to Council for final approval
- Delays in implementation could have serious financial implications for the Council
- Delays in implementation could compromise the Council's position
- Considered or reviewed by Overview and Scrutiny Management Commission or associated Task Groups within preceding six months
- Item is Urgent Key Decision
- Report is to note only

Strategic Aims and Priorities Supported:

The proposals will help achieve the following Council Strategy aim:

P&S – Protect and support those who need it

Officer details:

Name: Tandra Forster
Job Title: Head of Adult Social Care

Appendix B

Equality Impact Assessment - Stage One

We need to ensure that our strategies, policies, functions and services, current and proposed have given due regard to equality and diversity.

Please complete the following questions to determine whether a Stage Two, Equality Impact Assessment is required.

Name of policy, strategy or function:	Better Care Fund Programme 2016/17
Version and release date of item (if applicable):	V.01
Owner of item being assessed:	Tandra Forster
Name of assessor:	Tandra Forster
Date of assessment:	10 th March 2016

Is this a:		Is this:	
Policy	No	New or proposed	No
Strategy	Yes	Already exists and is being reviewed	Yes
Function	No	Is changing	No
Service	No		

1. What are the main aims, objectives and intended outcomes of the policy, strategy function or service and who is likely to benefit from it?	
Aims:	The Better Care Fund Programme is a initiative established to promote greater integration between health and social care.
Objectives:	To outline the project initiatives and associated investment for the West Berkshire Locality Better Care Fund.
Outcomes:	The range of projects will help promote better integration between health and social care services, meet the national conditions as set out in the Better Care Fund Policy Framework.
Benefits:	Improved the experience of health and social care services for local residents by reducing duplication of services, increase access to health and social care by implementing 7 day work, better information sharing, protecting existing provision of social care.

<p>2. Note which groups may be affected by the policy, strategy, function or service. Consider how they may be affected, whether it is positively or negatively and what sources of information have been used to determine this.</p> <p>(Please demonstrate consideration of all strands – Age, Disability, Gender Reassignment, Marriage and Civil Partnership, Pregnancy and Maternity, Race, Religion or Belief, Sex and Sexual Orientation.)</p>		
Group Affected	What might be the effect?	Information to support this
Age	Improved access to services both in terms of pathways and availability	National conditions - see attached BCF Policy Framework Range of projects within the locality support this and robust assurance process is in place to ensure compliance.
Disability (frail elderly)	Improved access to services both in terms of pathways and availability	National conditions - see attached BCF Policy Framework Range of projects within the locality support this and robust assurance process is in place to ensure compliance.
Gender	This is not a distinguishing factor in this service	This is not a distinguishing factor in this service
Marriage and civil partnership	This is not a distinguishing factor in this service	This is not a distinguishing factor in this service
Pregnancy and maternity	No impact	This programme of work is currently focused on frail elderly
Race	This is not a distinguishing factor in this service	This is not a distinguishing factor in this service
Sex	This is not a distinguishing factor in this service	This is not a distinguishing factor in this service
Sexual Orientation	This is not a distinguishing factor in this service	This is not a distinguishing factor in this service
Further Comments relating to the item:		

3. Result	
Are there any aspects of the policy, strategy, function or service, including how it is delivered or accessed, that could contribute to	No

inequality?	
Please provide an explanation for your answer: The proposals are intended to enhance service provision and outcomes for service users/patients	
Will the policy, strategy, function or service have an adverse impact upon the lives of people, including employees and service users?	No
Please provide an explanation for your answer: The proposals are intended to enhance service provision and outcomes for service users/patients. Appropriate arrangements are in place which mean employees are not disadvantaged by any new arrangements.	

If your answers to question 2 have identified potential adverse impacts and you have answered 'yes' to either of the sections at question 3, or you are unsure about the impact, then you should carry out a Stage 2 Equality Impact Assessment.

If a Stage Two Equality Impact Assessment is required, before proceeding you should discuss the scope of the Assessment with service managers in your area. You will also need to refer to the Equality Impact Assessment guidance and Stage Two template.

4. Identify next steps as appropriate:	
Stage Two required	
Owner of Stage Two assessment:	
Timescale for Stage Two assessment:	
Stage Two not required:	X

Name: Tandra Forster

	Total	10,669,000	10,498,982	10,534,000
	The planning template, attached, provides more details and a full overview of the funding contributions for 2017-2019. These have been jointly agreed by the CCG and Local Authority.			
Please summarise the impact assessment of any changes you have made	<p>Following an evaluation of The Patient Recovery Guide (PRG) pilot project, a decision was taken by the local integration board to cease funding this project in June 2016. (The evidence suggested the project did not meet all of its expected outcomes and that the money could be used better elsewhere) The under spend from the PRG was allocated to create additional capacity in the Market in providing 120 hours of community care and 3 step down beds to assist hospital discharge and DTOC. Due to a delay in recruiting carers the community care did not start until 20th February 2017 and we are still trying to secure the 3 step down beds. The intention is to carry forward the unspent budget allocated to the additional capacity to plug the gap before our new project of 7-8 step down beds at Birchwood Care home starts on 1st June 2017.</p> <p>JCP will continue as business as usual in 2017/18 and following an evaluation of the 7 day services project, (using the tool developed through the BCF in 2015/16) this will be re-configured with a much smaller budget.</p>			

	<p>West Berkshire will be introducing 2 new projects in 2017/18: 1) 7-8 step down beds at Birchwood Care Home to reduce DTOC and 2) Integrated Care Teams to look at further opportunities to work closer with primary care, model examples of good practice with MDT meetings and work with the top 5-10% of patients most at risk of hospital admissions with the aim of reducing Non-elective admissions across the community in West Berkshire. The later will not be supported with any budget in the initial phases.</p>
--	--

DRAFT

Section 2 – Narrative overview

Please describe the local vision for health and social care services, including changes to patient and service user experience and outcomes.

Our vision for better care is based on improving outcomes for individuals through the delivery of care which is responsive, enabling and available as close to home as possible. We are committed to doing things with (rather than to) service users/patients and therefore meaningful engagement is a key part of how we will implement change.

Our current system is already under pressure with a number of challenges including:

1. An increasing population, particularly in those over the age of 65
2. Increasing growth in non-elective care
3. Increasing A& E attendances, and pressure on urgent and emergency capacity
4. Rising delayed transfers of care, and subsequent bed days lost
5. Increasing pressures on adult social care for community packages (particularly in rural areas) and care homes at a time when the overall Council budget is significantly shrinking
6. Increasing demand for planned (elective) care
7. Inequality of access to services across the “whole system :the whole week”
8. Care Workforce Availability
9. Increasing pressure on Social Care in relation to prevention and early intervention

We recognise that the challenges facing the local health and social care system are significant. Demand for services is forecast to increase and this is not sustainable in the current systems. Funding pressures are set to continue and it is clear that without wide scale transformation we will not be able to meet future needs.

The leaders of the 10 Health and Unitary Authority partners, known as the Berkshire West 10 (BW10), have been working together since 2013 within a shared governance structure. The BW10 integration programme is an ambitious transformation programme involving a number of projects across these 10 organisations. The projects operate both at locality level and Berkshire West wide to deliver the intended benefits. The collective objective is focused on improving outcomes for users and patients and achieving long term financial sustainability. Overseen by an Integration Board and with project implementation supported by a joint Delivery Group, the BW10 has focused on specific improvements for the frail elderly population, Mental Health Care and Children’s Services.

The West Berkshire locality integration board informs the strategic direction for Health and Social Care Services both in the locality and across West of Berkshire. This board is responsible for the business and overall performance of projects within the BCF and Integration Programme and their focus is to steer and provide direction to deliver the agreed outcomes, benefits and efficiencies of each project contributing towards greater integration of health and social care.

We see the Better Care Fund as an opportunity to further stimulate the integration of Health and Social Care Services both locally and across West of Berkshire and have created a range of projects to help us deliver this.

West of Berkshire Projects for 2017/18 and 2018/19 include: Connected Care, Care Homes, Getting Home, Street Triage for Mental Health Patients and Integrated Health and Social Care Hub. The workforce project which ran in 2016/17 will now be aligned with the STP workforce aspirations.

Locally in 2017/18 and 2018/19 the Joint Care Pathway will become business as usual. The 7 day services project will continue to run but will be reconfigured with a smaller budget as the evidence from this project over the last 12 months suggested that it was not offering value for money in its current format. Towards the later part of 2016/17 we introduced the Additional Capacity project, offering 80 extra hours of community care to assist with our DTOCs – this project will also continue into 2017-18, ramping up to 120 hours of additional community care and 3 step down beds. We will also be investing in 10 step down beds in a local Care Home to facilitate hospital discharge from acute hospitals to improve our DTOC and doing some further work on integrated care teams, working closer with primary care and looking at both risk stratification and models of MDT's to help avoid non-elective hospital admissions for those with frequent attendances. This work will not have any funding attached to it in the early stages, but this is something that may be considered in the future. In addition a deep dive into Mental Health will take place at our next Locality Integration Board on 17th May 2017 and we envisage allocating some funds to at least one preventative project targeted at Mental Health.

By 2020 we expect to see:

- Person centred services that focus on outcomes rather than outputs
- Provision of good quality information and advice that empowers people to make good choices and self-manage
- Care closer to home as the first option
- Flexible services that operate across 7 days where appropriate.
- Services will be simpler to access, have less duplication and reach service users/patients earlier.

- Delivery of health and social services to be localised wherever possible including access to crisis,
- A&E and other services that meet local residents' needs – with appropriate specialist or wider access to regional services that improve outcomes on a sustainable basis.
- A greater range of local services that promote independent living
- Reduction in avoidable hospital admissions.
- Lengths of stay in Hospitals will be kept to a minimum
- Increased numbers taking up Health and social care personal budgets

Delivery of our vision will achieve system sustainability and therefore deliver value for money. We will do this by commissioning new models of care based on integrated Health and Social care pathways that focus on outcomes for users/patients.

In achieving transformational change we will draw on our patient's and population's views, and use robust health needs assessment in identifying our ongoing priorities. The commissioning and redesign of services will be informed by recognised best practice, and performance data analysis, in a context of an absolute requirement for improving health and social care outcomes and achieving system sustainability.

As a partnership we will make commissioning decisions based on what works best for our communities. This may be across the West of Berkshire or on a more local level. All the work will need to deliver the following:

- Enable us to respond to the needs of our local populations by targeting services to give the greatest impact on health and social care outcomes
- Address the views expressed by our local populations of how they wish services to be provided through partnership and co-production
- Avoid duplication, focus on strengths and ensures value for money & efficiency
- Promote further health and social care integration where a case for change is made
- Where appropriate we will combine resources, sharing best practice and expertise

Reablement

Our services will continue to have an enablement focus to enable people to self-manage where ever possible.

Where care is required it will be delivered by care workers skilled in health and social care tasks to enable consistency, it will be supported by identified care co-ordinators and multidisciplinary teams structured around localities: the overall aim being to improve the care of older people with long-term conditions and those who are at highest risk of deteriorating health. Crisis support will be streamlined with care being provided in the most appropriate setting according to service user/patient and carer need. When hospital admission is unavoidable, the stay will be of high quality with discharge through the Joint Care Pathway ensuring people don't get lost in the system and are able to get back to a more settled environment promptly. Support will be enhanced to enable people living in residential and nursing homes to receive their care and treatment there, and end of life care improved so that people are not admitted to hospital unnecessarily. In bringing key elements of the frail elderly (older peoples) programme on line through our local projects we will be able to assess its impact and use this as a template to inform planning for other pathways for the outer years of this five year period.

Dementia Care

By 2020 we expect to have 1614 living with Dementia in Berkshire West. This is expected to rise to 2165 by 2030 (50% more than in 2015). Identifying those living with Dementia and the provision of high quality diagnosis care is a priority for all four Berkshire West CCG's.

A new refreshed Berkshire West Dementia stakeholders group has been established with the specific aim of sharing good practice and identifying solution to current gaps in order to deliver against the Prime Ministers challenge on Dementia 2020. The West Berkshire Dementia Alliance is working with other Alliances in Reading and Wokingham as part of this group to shape and inform a new integrated approach to joint assessment, care planning and ongoing management of people with Dementia. Younger people, as well as older people with Dementia have integrated commissioning of services already in place and Dementia Care Advisors in addition to an admiral nurse resource to ensure support is provided in a patient centred approach.

Over 2017/18 and beyond we will be working to update and deliver our Local Berkshire West implementation plan, which will include improving timely diagnosis and delivery quality ongoing management and support for people with Dementia and their carer/s. A separate Dementia action plan and plan on page with key milestones is available alongside the Berkshire West CCG's Operating Plan submission for 2016/17.

Anticipatory Care Planning

During 2016/17 we progressed our work around the frail elderly pathway (outside of the BCF but within the

integration portfolio at BW10 level). This has allowed us to identify those costing us the highest amount of resources in the system.

Our NEL analysis has progressed significantly in year and we have identified a cohort of around 100 people who have frequent multiple admissions and attendances at hospital A&E. We have begun a targeted approach led by our urgent care board and implemented through GP practices, to better manage people with frequent attendances to identify blocks and barriers that prevent these individuals from remaining well/stabilised in their home environment. In 2017/18 we plan to amend our Anticipatory Care (CES) to progress this work at GP Practice level, with clinicians focusing specifically on quality care planning, reducing non elective admissions and continued focus on care home patients. In 2017-19 we will also use this intelligence to address and identify resources that can support individuals and communities in those wards with the highest attendances. This targeted approach will help us address and manage non-elective attendances further to improve health of those in our most deprived areas of West Berkshire.

Many of our schemes as well as the wider integration programme aim to specifically target the highest risk/cost segment of our population. Moving into 2017-18 and beyond our vision for supporting patents with long term conditions is underpinned strategically by development of our Accountable Care System and more operationally for 2017/18 and 2018/19 through the work of the CCG's Long Term conditions (LTC) Programme Board, aligned with to BCF and Frail Elderly Pathway.

We will also continue to look at further opportunities for Health and Social Care to work closer by through our Integrated Care Team project.

7 day Services

We also recognise that people need to access health and social care services flexibly. Evidence shows that the limited availability of some services at weekends can have a detrimental impact on outcomes for patients, including raising the risk of mortality. Admission rates may also be affected by GP practices being closed over the weekend period. Where admissions occur there is a need to ensure that care and support is available so patients can be discharged from hospital when they are clinically fit. We have therefore established a range of health and social care services that are available seven days a week.

Primary Care will play a pivotal role in delivering our vision to meet people's needs in the community wherever possible and we will look to facilitate this through the move to fully delegated primary care arrangements with

	<p>NHS England which will enable us to improve quality in primary care.</p> <p>Buckinghamshire, Oxfordshire and Berkshire West (BOB) Sustainability & Transformation Plan (STP)</p> <p>Clinical Commissioning Groups (CCG's) and providers operating in Berkshire West are members of the Buckingham, Oxfordshire and Berkshire West (BOB) Sustainability and Transformation Plan (STP). This is a large STP with three distinct local health economies that are effectively driving place based commissioning to deliver a five year forward view. The local health economies provide the best mechanism to transform primary care, redesign the interface with local hospitals and drive integration with social care. Much of the delivery of the five year forward view will take place at local health economy level with the STP ensuring the rapid adoption of innovation across BOB. Nevertheless each of the member organisations recognises the opportunities of working together with partners at this larger scale and will be progressing initiative to improve quality and realise benefits for the wider system.</p>
<p>Describe how the BCF contributes to the local implementation of the vision of the FYFV and the move towards fully integrated health and social care by 2020; and the aspects of the change the local area is intending to deliver using the BCF.</p>	<p>Over the next five years, the pattern and configuration of services will be changed in West Berkshire to implement the vision of the 5YFV by responding to local health needs by putting the patient at the centre of care to empower more people to live well at home. This will require a number of changes to the services that we provide. The Better Care Fund schemes will be critical to driving some of these changes.</p> <p>Developing patient/service user centred care pathways across Health and Social Care</p> <p>We will continue to create joint system wide integrated pathways across key areas such as frail elderly, mental health and children's services that transcend organisational boundaries to deliver high quality, efficient care for patients. In the longer term, we will also go beyond traditional health and social care services to include wider determinants of physical and emotional wellbeing, to include services such as housing, transport and leisure. We aim to give mental health parity of esteem with physical health, commissioning high quality evidence based services which reflect the national mental health strategy and other key guidance.</p> <p>In response to the high cost of care for older adults, and the growing numbers of older adults in West Berkshire, the frail elderly pathway has been developed to improve the care of older people with long-term conditions and those who are at highest risk of deteriorating health and are likely to need intensive social care support. As part of this, care will be delivered by care workers, supported by identified care co-ordinators. This pathway has been developed through a multi-agency project supported by the King's Fund and is supported by detailed economic modelling. In bringing key elements of the frail elderly (older people's) programme on line through our local</p>

projects we will be able to assess its impact and use this as a template to inform planning for other pathways for the outer years of this five year period.

Changes to health and social care services over the next five years:

Build capacity in the community across primary, community health and social services to work collaboratively and through integrated services to better meet the needs of local residents that avoid their admissions to hospital or care homes.

Expand the reablement capacity linked closely to integration with appropriate primary and community healthcare on a localised basis (via Locality Hubs).

As community capacity is increased overall including targeted in-reach to acute, realign acute sector capacity to achieve improved patient outcomes, greater efficiency and sustainable acute provider capacity on a reduced basis.

Develop cross sector working that targets intervention and support to those most at risk of admissions, including enhancing clinical capacity in the community that also supports those admitted to acute hospitals to return home quickly.

Maximise the capacity of local people to self-care through embedding of the Care Act that enhances information advice, advocacy, carer support, with an overall preventative impact on intensive support and admissions

- Our workforce development strategy will allow us to understand more clearly where the gaps are so that we can stimulate the market to respond and target training/support more effectively. The development of shared health and social care competencies will build capacity and improve the experience of health and social care for service users/patients as it will mean they will be supported by fewer people who get to know them better.
- A proactive approach to provide information, advice and guidance that enables people to understand what universal services are available and, where appropriate, navigate the health and social care system making choices that support them to maintain their independence for longer.
- We will strengthen our community based asset approach, building on our 'doing with' rather than 'to' approach. Assessments will be person centred; outcome focused and continues to develop re-ablement potential.

	<ul style="list-style-type: none"> • We will develop locality based working to ensure we know our patch really well and help people as close to their home as possible.
<p>Please list the issues that the BCF will be used to address in the local area</p>	<p>Through our Better Care Fund schemes we aim to deliver the following improved outcomes;</p> <ul style="list-style-type: none"> • Less duplication between sectors, faster and more efficient joint assessments with lead professionals for those with long term conditions. • Earlier diagnosis, treatment, and support that prevents crises or better enables responses to crises without admissions to hospitals or care homes. • Improved access to information, advice, advocacy and community capacity to manage health and social care needs at low or nil cost to the user or carers. This will include online and flexible locally developed access. • Locality based around GP clusters, mutli-disciplinary social care teams, who will focus helping people remain in their community • Improved choice and control through better access to a wider range of care and support in the local health and social care market especially for those with long term conditions. This will include the use of personal health and social care budgets to allow greater flexibility in how needs are met. We are committed to reducing the need for out of area placements enabling people to maintain family connections. Sometimes a local option is not available, where this occurs we will look at how we can support them to maintain family connections. • “Hard to reach” groups with health and social care needs that then require higher levels of intervention will have better access to tailored information, advice, care and support which is person centred and aligned to cultural, faith, or other requirements. During the Newbury Call to Action event, our plans for integrating care were discussed and some of comments on what Newbury’s new integrated system will make to patients and service users are provided below. <p>In practice this should mean service users being able to say the following;</p> <ul style="list-style-type: none"> • "There are no gaps in my care" • "I am fully involved in the decisions and know what is in my care plan" • "My Team always talk to each other to provide me with the best care" • "I will always know who is in charge of my care and who to contact" • "I won't have to wait in all day for lots of different people to come at different times" • "it is less time consuming if all services are together in one place" • "My care is planned with people who work together to understand me and my carer, put me in control, coordinate and deliver services to achieve the best outcomes for me"

<p>Explain how the BCF will address quality and reduce costs based on segmented risk stratification. (Reference local issues and how integration will be used to drive improvement). If relevant please provide supplementary data to support the case for change, including quantifying levels of unmet need, issues of service quality, and inefficiencies in service delivery.</p>	<p>The 9 challenges referred to in our vision and identified in our Better Care Fund submission in 2016/17 have in main continued to challenge our local economy and will continue to do so over the next 2 years. We will continue with a number of the Berkshire West projects in 2017/18 and 2018/19 and introduce the Mental Health Triage project in April 2017.</p> <p>Connected Care – is a new system that enables data sharing between Health and Social Care Professionals across Berkshire and a single point of access for patients wanting to view their care information. It also supports the delivery of the 10 universal capabilities as defined in the Berkshire Local Digital Roadmap and enables service transformation as specified in the Berkshire, Oxfordshire and Buckingham Sustainable Transformation Plan (STP).</p> <p>There are 3 tranches within the overall project, Tranche 1 went live in February 2017, Tranche 2 will go live in June 2017 and Tranche 3 which involves West Berkshire LA goes live in October 2017.</p> <p>Care Home Project – The Care Homes project was established in Berkshire West in April 2015 with the aim to provide a common and consistent approach to improving outcomes for those people living in Nursing and Residential Homes in Berkshire West. This was through the training and education of care home staff, medication reviews of all residents and since October 2015 enhanced care through the introduction of a Care Home Rapid response and Treatment Service (RRAT) that provides 7 days a week, 8am – 7pm treatment via a multidisciplinary team linking in with specialist nurses and therapists. The services offers the residents a co-ordinated and joined up health and social care service, reducing unnecessary hospital admissions to hospital, improving the flow of patient from community to acute and back to community and avoiding unnecessary delays in discharges back to the care homes. There are 54 care homes in Berkshire West that have engaged with the Care Home Services. The project is showing encouraging signs of success and proposes to build on the work already undertaken to reduce NEL admissions from care homes and the supporting pathway to ensure residents of care homes in Berkshire West are able to remain in their place of residence as far as is reasonably practicable and appropriate. Over the last 6 months (M6 to M11) we have demonstrated a 5% reduction in NELs when compared to M6-M11 in 2016/16.</p> <p>Getting Home Project – In 2016/17 Local Authorities and CCG's in Berkshire West agreed a local action plan to reduce DTOC, which included 8 high impact actions. This project focuses on implementation of three of the high impact changes for DToc's – Multi-agency discharge team, discharge to assess and trusted assessment. Some improvements have been achieved in 2016-17 but this project will carry forward into 2017-18</p> <p>Mental Health Street Triage – Through the provision of a street triage service operating 7 days per week, 5pm – 1am this service will ensure that a Mental Health Professional is available to provide on the spot advice/support to police officers dealing with possible mental health problems. This will lead to people receiving</p>
---	---

the appropriate care more quickly, reduce avoidable use of Section 136 and non-elective hospital admissions.

Workforce – This project was derived as a key enabler from the work to develop the Frail Elderly Pathway to support the BW10 ambitions to transform the workforce to meet current and future challenges faced by health and social care providers. The project will be aligned with STP workforce aspirations.

Locally we have seen a slowing of non-elective growth in 2016/17 but an increase in delayed transfers of care.

Newbury & District CCG is the 2nd best performer in the Country for non-elective admissions and we have carried out some detailed analysis of our Non-Elective admissions. A working group has been set up to look at how we can offer a more targeted approach to NEL's during 2017-18. We will also be creating a new project in 2017/18 on Integrated Care teams looking at more opportunities to work closer with primary care with MDT meetings to reduce non-elective admissions from both frequent flyers and patients that are in the top 5-10% cohort.

In 2016-17 the CCG's worked with Local Authorities in Berkshire West to develop a system wide "Delayed Transfers of Care Action Plan" which was signed off by all partner organisations across the health and social care system. The plan contained locality targets for a realistic but ambitious improvement in DToC performance which would deliver the 3.5% target in acute bedsw and an improvement of 5% in performance in community beds. The Urgent Care Programme Board, now A&E Delivery Group and Health and Wellbeing Boards took oversight of delivery of the plan. The key deliverables withing the plan were: -

- Coding review – a new local coding set for DToC's which align to the national codes is now in use and LA's meet with BHFT on a weekly basis to agree and sign off the DToC reporting.
- Improvements to the Continuing Health Care (CHC processes)
- Choice Policy: Berkshire West adopted the new national framework and the new Choice Policy was signed off by the Urgent Care Programme Board in September 2016.
- Getting Home Project – this project focuses on implementation of three of the high impact changes for DToC's – Multi-agency discharge team, discharge to assess and trusted assessment. Some improvements have been achieved in 2016-17 but this project will carry forward into 2017-18.

A decision was taken in-year to support RBFT in letting a short term contract to CHS, a company providing specialist support to self funders and complex discharges. This contract commenced on 8th January 2017 and the impact and learning will be closely monitored by the Integration board. West Berkshire has introduced

weekly scrutiny meetings to review all patients regardless of length of stay in hospital – early indications are that delays are improving as a result of this.

Despite this progress BCF targets in 2016/17 were missed and further improvement is required. It should, however, be noted that an issue with reporting of delays in mental health beds that was corrected in-year meant that the targets were set artificially low as these delays were not in the baseline. In 2017/18 we will work with our Health Partners to fully understand the reasons for delay, look at how these delays are reported and coded and work with them to reduce what can sometimes be lengthy delays.

Our key focus in the 2017/19 BCF will be to improve our DTOC performance. We will continue with the Joint Care Pathway for all hospital discharges and locally we redirected BCF monies from the Patient Recovery Guide project to create some additional capacity in the market with 120 hours of community care and 3 step-down beds starting in February 2016 – this project will also run into the start of 2017/18. In addition we will be investing in 7-8 step-down beds in a West Berkshire Care Home from 1st June 2017 with money from the BCF plan in 2017/18 and the use of contingency funding from 2016/17 to facilitate hospital discharge and help improve our DTOC performance.

There is now a significantly heightened financial challenge within all organisations within our economy. Our plans to address this going forward include a move to an Accountable Care System (ACS). The Berkshire West Accountable Care system is a complete transformation of how 3 NHS trusts and four CCG's within Berkshire will work and transact with each other. By moving away from a system of contractual transactions and closer to an allocative distribution of monies coming into the local health economy, the ACS seeks to move to a system whereby resources are allocated to the efficient delivery of pathways at cost rather than price. By moving to this new contractual relationship, providers and commissioners will need to share the risk of delivering services across the geography within an overall cost allocation rather than individual organisations being required to protect their own financial positions. Further details can be found within the Berkshire West CCG's Operating Plan submission (December 2016) and the STP.

West Berkshire Council, like manage across the Country faces challenges in delivering its priorities against National Government settlements. The key areas of demand for adult social care in West Berkshire are amongst those over 75 and those with dementia, both of whom have a longer than average length of stay due to waiting for community based services. As described above, the number of patients on the “fit to go” list continues to increase due to the increasing demand for nursing care, residential care and community reablement, and the lack of supply. This lack of supply is felt most acutely in the rural areas of West Berkshire where the distances involved in getting to and from client's in the very sparsely populated communities is prohibitive for providers.

As outlined in our BCF in 2016/17 we have been able to target specific BCF schemes at different cohorts of the

population. In line with what is known nationally within health, 5% of our population will cost us 50% of our spend. This cohort generally will include the elderly with multiple complex conditions who have frequent requirement for hospitalisation and utilisation of health and social care resources. During 2016/17 we have progressed our work around the frail elderly pathway (outside of the BCF but within the integration portfolio at BW10 level. This has allowed us to identify those costing us the highest amount of resources in the system).

In 2021-19 ???

During 15/16 we have seen this borne out in analysing our rise in non-elective admissions It was found that although the over 65s did not constitute the largest number of non-electives by age group; they did consume the highest level of cost for their non-elective admissions. During 15/16, the *over 65s were found to account for 38% of the non-elective activity but 53% of the total cost.*

Many of our schemes, as well as the wider integration programme aim to specifically target this section of the population. For example, during 15/16 and continuing into 16/17 we rolled out the ACG risk stratification tool to all GP Practices. We are not sure how many of our GP Practices are actively utilising this tool but in 2017-19 we are planning for the BCF Lead to have access and training with this tool to allow analysis and sharing of information. This information will assist our Integrated Care team Project and support successful Multi-disciplinary Team Meetings along with the local knowledge from within the GP Practices to identify segments of the population who have the highest risk of an unplanned admissions and allows us to actively roll out a programme of joint health and social care assessment and care planning. Our Integrated Care Team Project will look to build on this over the next 2 years.

Also in West Berkshire we share with our Berkshire West 10 colleagues an understanding that integrated care delivers the best outcomes for our patients and service users. We believe(supported by evidence) that working in collaboratively, is the most effective way for us to ensure that we are providing person centred, personalised, co-ordinated care in the most appropriate setting. As a partnership of ten organisations, with a full range of services across the health and social care sector, we can deliver end to end integrated care for our population, radically reducing the number of assessments and transactions individuals are subjected to and improving their experience of care.

There is a significant financial challenge facing West Berkshire with increasing demand for high quality services but a constrained and challenging financial position in the local health and social care economy. We have a strong foundation in our shared vision and our track record, but we know that we need to increase momentum to

tackle the system pressures and demographic challenges described above.

We simply do not have the resources to meet the expected increases in demand over the next few years if we continue to provide services in the same ways as we do now. Unless we find better ways of supporting people who are frail or living with long term health conditions, costs will increase exponentially. This will include the cost of care home placements, A&E attendances, and emergency admissions to hospital, readmissions, and ambulance conveyance costs. Co-ordinated community based care is what people are asking for and what we know works. Indeed it is the only way to build a sustainable future.

Combining best practice examples, a sound evidence base, alongside local knowledge, analytics and intelligence, we have been able to identify potential new models that will meet the needs of our population and address the key challenges we face over the coming years. Using a variety of risk stratification tools and methodologies, we have identified the cohorts of individuals that are most likely to benefit and the models of care most suited to meet the challenge in the most effective way. The key target populations are generally older adults and people with long term conditions.

Risk Stratification Methodology:

Dividing the population into groups of people with similar needs is an important first step to achieving better outcomes through integrated care. A one size fits all approach is inadequate and different sets of people have different needs. Grouping has helped us create models that are based on similar, holistic, individually-focused needs, and will also help us think about the health- and social-care system in a more holistic way.

By making these groupings explicit, we are able to provide a more logical way of informing the new models of care that are likely to be needed, identifying the outcomes we plan to achieve and by which we will measure our success, as well as allowing us to create payment models to incentivise providers to achieve these outcomes.

Risk Stratifying our High Risk of an Emergency Admission Population

In 2009, nine of the then PCTs in South Central decided to collaboratively procure a risk stratification tool which would support case finding for community health staff as well as supporting other programmes for patients with long term conditions. The Adjusted Clinical Groups (ACG) tool was implemented into all 54 GP practices within the Berkshire West PCT, including the 14 GP practices in North and West (3) and South Reading (11) CCGs. This tool has allowed us, in collaboration with our Berkshire Community Health Service, to have a richer source

	<p>of information about the health needs of the local practice population and to be able to support a reduction in emergency admissions.</p>
<p>Please provide a description of the specifics of the overarching governance and accountability structures in place locally to support integrated care, including:</p> <ul style="list-style-type: none"> • A description of the specifics of the management and oversight in place to support the delivery of the BCF plan? • An articulation of the arrangements in place to support joint working? • Key milestones associated with the delivery of the plan of action in 2016-17? • A fully populated and comprehensive risk log, with evidence that it has been developed in partnership with all stakeholders and a description of how risks will be managed operationally including: <ul style="list-style-type: none"> • A quantified pooled 	<p>The West Berkshire Health and Wellbeing Board will have strategic oversight and governance for the West Berkshire Better Care Fund and related arrangements. Membership of this Board includes two voluntary sector representatives, as well as West Berkshire Healthwatch, together with Newbury & District CCG, North West Reading CCG and West Berkshire Council. This Board meets regularly and will receive reports on progress, outcomes and exceptions on performance and risks. This board will ensure appropriate monitoring of progress against national and local performance in the BCF, and regular updating of the risk register associated with such performance.</p> <p>Because the local health and social care economy works across our Berkshire West boundaries many of the schemes within the plan are part of a wider Integration Programme, as outlined below:</p>

funding amount that is 'at risk'

- Demonstration that this has been calculated using clear analytics and modelling
- An articulation of any other risks associated with not meeting BCF targets in 2016-17
- An articulation of the risk sharing arrangements in place across the health and care system, and how these are reflected in contracting and payment arrangements

There are monthly Berkshire West Delivery Group meetings with representatives from each of the partner organisations in attendance. For projects that span all three unitary authorities in Berkshire West (Reading Borough Council and Wokingham Borough Council as well as West Berkshire Council), accountability is held with the Berkshire West Integration Board. All projects that span the three localities are required to submit a monthly highlight report, which includes milestone and financial status, key achievements, next steps, issues and risks.

West Berkshire’s Health and Wellbeing Board has strategic oversight of our plans to develop more integrated services within the district. The Health and Wellbeing Board has already overseen the production of the latest Joint Strategic Needs Assessment for West Berkshire, and led the development of a Health and Wellbeing Strategy and Delivery Plan. The Board is therefore well placed to ensure West Berkshire’s integration plans draw on local evidence of need and health inequalities.

The Programme Office across Berkshire West ensures there is sufficient project management capacity to deliver both the local and wider enabling schemes identified within this submission. The next section describes the management and oversight which monitors project delivery to ensure our identified schemes remain on track.

Within the Programme Management Methodology being used to implement the BCF the Health and Wellbeing Board act as the Programme Board and the West Berkshire Health and Wellbeing Steering Group as project board.

Every project is sponsored by one or more senior managers and a clinician from across the health and social care economy. There are implementation teams for each of the named projects with assigned Project Managers

We are utilising the Office of Government Commerce (OGC) best practice framework “Managing Successful Programmes” to manage the overarching programme and the Prince 2 Project Management Methodology for management of the individual projects within it.

Project Managers will report to the Projects Board at regular intervals. Terms of reference exist for all groups and specific responsibilities have been documented for named roles, e.g. Programme Manager

Governance Strategies for the Programme have been formulated and documented to ensure consistency across

the projects and encompass the following:

- Benefits management
- Information management;
- Risk management;
- Issue resolution;
- Monitoring and control
- Quality management;
- Programme
- resource management;
- Stakeholder engagement/consultation/communication

For example project issues or risks which have been identified and logged at the project level but cannot be resolved/managed there, will be escalated to the Health and Wellbeing Steering Group through regular Highlight Reports and if they cannot be resolved/managed there, they will be escalated to the Delivery Group and so on. Programme risks will be regularly reviewed by the Steering Group and an action plan put in place for any risks that remain red following mitigation.

From 2017-19 , within West Berkshire’s locality any existing projects or projects that are deemed business as usual have a PID on a page, which summaries the objectives, benefits etc. A full project PID is required to be submitted to the locality integration board for any new projects. These full PIDs are also presented to the Finance sub-group who under the new Chair are currently developing a value for money model, which will be used for any future projects.

Risk Register

A risk register is kept for each project and project managers are required to review on a regular basis and escalate unmanageable risks up through the governance structure.

Risk Share Agreement

By its nature a pooled budget provides an appropriate vehicle for sharing risk between the associated parties.

The arrangements for risk share, overspends and underspends in the BCF are set out in Schedule 3 of the Locality S75 Agreement.

S75 Agreement

- 2.1 The risk share fund in the BCF comprises the value of the aggregate reduction in non-elective admissions expected to be achieved in the year from the successful implementation of the specified schemes.
- 2.2 At the commencement of the agreement the value of the risk share fund is withheld by the CCG from its BCF allocation.
- 2.3 Where admission avoidance schemes are successful and the planned levels of activity are achieved and, as such, value is delivered to the NHS in that way, then the risk share funding may be released to be spent as agreed by the partners. Any payments made from the risk share fund will be on a quarterly basis, in arrears, which are equivalent to the value of the savings made, up to the maximum risk share fund.
- 2.4 Any amount released from the risk share fund cannot exceed the amount set aside for the schemes listed in the Locality S75 Agreement.
- 2.5 Where the anticipated savings benefits are not achieved, any unreleased funds are retained by the CCG to cover the cost of additional non-elective activity.
- 3. Pooled Fund Manager
 - 3.1 The Pooled Fund Manager will at all times be responsible for managing schemes within the budget available, including any amounts which may have been released from the risk share.
 - 3.2 The Pooled Fund Manager will be responsible for setting out a phased budget for both costs and benefits for schemes at the commencement of the financial year and for reporting actual costs and benefits year-to-date with a forecast for the full year on a monthly basis.
 - 3.3 Overspends which cannot be otherwise mitigated, shall be met in the first instance from the respective scheme's Pooled Fund Contingency. Should this be insufficient, then any residual overspend shall be met by the Pooled Fund holder for the respective scheme.

	<p>3.4 In the event that expenditure from any Pooled Fund in any financial year is less than the aggregate value of the financial contributions made for that financial year, the surplus monies will be returned to the Partner contributing to the Pool unless alternative arrangements are agreed by the Partners.</p> <p>3.5 Reputational risk will be managed through an aligned communications and engagement plan.</p> <p>4. Risk Management Framework & Governance Arrangements</p> <p>4.1 A comprehensive risk register will be in place to manage or mitigate known and emerging risks associated with the development and implementation of the Better Care Fund Plan.</p> <p>4.2 Resources to support the development and maintenance of the risk register will be identified by the parties.</p> <p>4.3 The Risk Log will be reviewed by groups that are responsible for the individual identified risks – e.g. the finance risks will be reviewed on a monthly basis by the finance group who will update the Risk log for the Programme and provide these updates to the Programme manager for inclusion into the Master Risk Log. The Programme Manager has overall responsibility for ensuring the Risk Log is updated regularly and reported to the Integration Board. Significant risks will be escalated to the Partnership Board and the Health and Well Being Board and up to the key decision making bodies in both organisations as appropriate</p> <p>4.4 The Risk Log will also be reviewed in both health and social care individual governance frameworks.</p> <p>5. Accounting Arrangements</p> <p>5.1 In determining the pooled budget arrangements the following factors have been considered</p> <ul style="list-style-type: none"> (a) Whether the funds are being transferred or not from health to social care (b) Who is commissioning the service associated with the budget (c) Which organisation is providing the resources to run/manage the service (d) Who are parties to any associated contracts (e) Which organisation bears the risk of any overspend
--	---

	<p>(f) Where any cost savings benefit arise</p> <p>(g) Which staff are involved</p> <p>5.2 The appropriate accounting standards of each organisation will apply in relation to any joint arrangements that are put in place.</p> <p>5.3 Each of the CCGs and the Local Authority will recognise its share of the pooled budget in its individual accounts and memorandum accounts will be maintained.</p>
--	--

Section 3 - National Conditions

Page 38

<p>Plans Jointly Agreed</p> <p>Does the BCF Plan cover a minimum of the pooled Fund specified in the Spending Review, and potentially extending to the totality of the health and care spend in the HWB area, and is it signed off by the HWB itself, and by the constituent Councils and CCGs?</p> <p>Explain how, in agreeing the plan, have you engaged with health and social care providers likely to be affected by the use of the Fund in order to achieve the best outcomes for local people. Please illustrate:</p> <ul style="list-style-type: none"> • There is joint agreement across commissioners and providers as to how the BCF will contribute to a longer term strategic plan • This includes an assessment of future capacity and workforce requirements across the system • The implications for local providers have been set out clearly for HWBs so that their agreement for the deployment of the Fund includes recognition of the service change consequences? <p>As the Disabled Facilities Grant (DFG) will again be allocated through the BCF, please confirm that local housing authority representatives have been involved in developing and agreeing the plan, in order to ensure a joined-up approach to improving outcomes across health, social care and housing.</p>	<p>Our Better Care Fund projects have been developed and rolled out over a series of meetings and the West Berkshire Locality Integration Board involving Acute Trust, community health providers, social care, primary care and Voluntary Sector.</p> <p>These meetings have acted as a local catalyst to co-develop new programmes drawing on provider views about local pressures and opportunities to work differently to achieve better outcomes.</p> <p>Going forward with our BCF plan for the next 2 years, we expect that the Berkshire Healthcare Foundation Trust, the Royal Berkshire Hospitals Trust, Local GP's, Adult Social Care, Public Health and Healthwatch to continue to be part of the integration implementation plans.</p> <p>In addition we have held a number of public engagement events to let the public know about our achievements and plans over the next 2 years.</p>
<p>Maintaining the Provision of Social Care</p> <p>Please specify the total amount from the Better Care Fund that has been allocated for supporting of adult social care services and confirm:</p>	<p>As set out in the BCF planning submission, contribution to Adult Social Care in 2017/18 has been increased from ? to ? and from ? to ? in 2018/19. This represents a real terms increase on 2016/17 and fulfils the requirement of this</p>

<ul style="list-style-type: none"> • That at least the local proportion of the £138m for the implementation of the new Care Act duties has been identified • The amount of funding that will be dedicated to carer-specific support from within the BCF pool? <p>Please describe how the local adult social care services will continue to be supported in a manner consistent with 2015-16. Has this support been agreed locally and, as a minimum, does the funding and services maintain in real terms the level of protection as provided through the mandated minimum element of local BCF agreements of 2015-16?</p> <p>In setting the level of protection for social care in your local area, please describe how you have ensured that any change does not destabilise the local social and health care system as a whole?</p> <p>Please include a comparison to the approach and figures set out in 2015-16 plans and confirm this approach is consistent with the 2012 Department of Health guidance to NHS England on the funding transfer from the NHS to social care in 2013-14.</p>	<p>national condition.</p> <p>This real terms increase should help ensure some stability for Adult Social Care. However, it should be remembered that the overall gross commissioning budgets for Adult Social Care are ?.</p>
<p>Agreement to invest in NHS out of hospital commissioned services</p> <p>Please detail your agreed plan for using your share of the £1 billion that had previously been used to create the payment for performance element of the fund, in line with the national condition guidance, linking back to the summary and expenditure plan tabs of your BCF planning return template.</p> <p>Please describe if you have considered whether a local risk sharing arrangement is required, supported by analysis of the likely risk of unplanned activity in the area based on their track record of performance. Please make reference to the consideration of the long term trend in admissions, and the success of schemes implemented to date. If a risk sharing arrangement has been agreed please explain how the decision was arrived at, and illustrate the conditions are appropriate and consistent with guidance.</p>	<p>Our out of hospital vision is underpinned by the development of our Accountable Care System and more operationally for 17/18 through the work of the CCG’s Long Term Conditions Programme Board, the Better Care Fund and the Frail Elderly Pathway Programme.</p> <p>Our aim is to work collaboratively across health and social care and the voluntary sector to provide quality care for patients; minimising the risk of an individual’s health deteriorating and requiring increased service intervention and maximising the opportunities for patient self-management. Within this programme of work are a number of key work streams, supported in many cases by the Strategic Clinical network and Academic Health science network</p>

South of England

For NHS commissioned out-of-hospital services, and services that were previously paid for from funding made available as a result of achieving your non-elective ambition, please confirm if these continue in a manner consistent with 15-16 and provide evidence to support any changes to service provision from 15-16 plan.

to help drive transitional change.

Our investment in the Connected Care, Care Homes Project

DRAFT

Title of Report:	Refreshed Local Transformation Plan for Children and Young People’s Emotional Health and Wellbeing
Report to be considered by:	Health and Wellbeing Board
Date of Meeting:	30 March 2017

Purpose of Report: To inform the Health and Wellbeing Board of the refreshed Local Transformation Plan for Children and Young People’s Emotional Health and Wellbeing

Recommended Action: To note the progress made in line with Department of Health governance requirements

Reason for decision to be taken: N/A

Other options considered: N/A

Key background documentation: The report of the government's Children and Young People’s Mental Health Taskforce, “Future in Mind – promoting, protecting and improving our children and young people’s mental health and wellbeing”
<https://www.gov.uk/government/publications/improving-mental-health-services-for-young-people>
 Transformation plan guidance;

Contact Officer Details	
Name:	Sally Murray & Andrea King
Job Title:	Berkshire West CCG Children’s Commissioner & Head of Service, Prevention & Developing Community Resilience
Tel. No.:	07900 217584 & 07884 235707
E-mail Address:	sally.murray2@nhs.net andrea.king@westberks.gov.uk

Implications

Policy:	Health & Well-Being Board are required to review and approve local Transformation Plans.
Financial:	West Berkshire Council receives £100,000 investment from Berkshire West CCGs to improve early intervention specifically designed to improve the emotional health of children. This funding is provides joint funding of West Berkshire's innovative Emotional Health Academy.
Personnel:	No change
Legal/Procurement:	No change
Property:	No change
Risk Management:	No change

Executive Report

1. Introduction

- 1.1 This provides an early descriptive indication of the changes to the children and young people's mental health system (through partnership working), following the implementation of Local Transformation Plans. There is insufficient consistency in national or regional comparator information, to enable us to reliably benchmark local performance and the services mentioned in the report have not been subject to independent evaluation. Health & Well-Being Board members are asked to read this report with that context in mind.
- 1.2 The report of the government's Children and Young People's Mental Health Taskforce, "Future in Mind – promoting, protecting and improving our children and young people's mental health and wellbeing", was launched on 17 March 2015 by Norman Lamb MP, the then Minister for Care and Support. It provides a broad set of recommendations across comprehensive Child and Adolescent Mental Health (CAMHs) that, if implemented, would promote positive mental health and wellbeing for children and young people by facilitating greater access and standards for CAMHS services, by greater system co-ordination and a significant improvement in meeting the mental health needs of children and young people from vulnerable backgrounds.
- 1.3 With the requirement for system wide transformation by 2020, all Clinical Commissioning Groups (CCGs) were tasked with creating a Local Transformation Plans. West Berkshire's Health and Wellbeing Board approved the local plans in October 2015 which has enabled additional recurrent funding to be released from NHS England to the West of Berkshire Clinical Commissioning Group (CCG). The latest version can be found at; <http://nwreadingccg.nhs.uk/mental-health/camhs-transformation>
- 1.4 Berkshire West CCGs, with support from all 3 Local Authorities holds a joint meeting once a month to oversee and support the implementation of the Local Transformation Plans. This meeting is now called the 'Berkshire West Future in Mind' group and includes a broad representation of providers of services e.g. Berkshire Healthcare Foundation Trust (BHFT), voluntary sector partners, Royal Berkshire Hospital Foundation Trust (RBH), parent carer representative, Schools, Healthwatch as well as the University of Reading.

2. Areas of Progress Since last Health and Wellbeing report are as follows:

- 2.1 Berkshire Adolescent Unit (BHFT) is now a 7 day, 24 hour a day service that is now a registered tier 4 provision in Berkshire. The number of beds has also now increased from 7 to 9 and so fewer children requiring this level of intervention need to be placed outside of Berkshire.
- 2.2 The Common Point of Entry (CPE) is now open 8am until 8pm Monday to Friday. The current average waiting time for referrals to CPE is 5 weeks. National indications suggest that the national waiting time for a first CAMHs appointment is approximately 9 weeks.
- 2.3 Initial indications suggest a reduction in waiting times, with more children and young people receiving timely evidence based treatment across all 5 care pathways. The

indications from the data also suggest that the number of children waiting for help has also reduced

- 2.4 This improvement for children and young people has been delivered against an ongoing high rate of referrals for CAMHs tier 3 support. This is evidenced in the graph below, that outlines 12 of the 18 month having 700 referrals a month for Berkshire West area, but the two line graphs of both total waiting number (green line) and children waiting over 12 weeks (red line) both descending over the same 18 month time frame.
- 2.5 Information suggests that Berkshire West waiting times for autism assessment i.e. 40 weeks is lower than the national average. However waits remain longer than both the commissioner and provider want locally. The current local target is to reduce waiting times for autism assessment to a maximum of 12 weeks by October 2017. Additional funding has been made available to expedite reduction in autism assessment waiting times for children under the age of 5 years by running additional weekend clinics. In addition Autism Berkshire and Parenting Special Children have been commissioned to provide support to families at the pre and post diagnosis stage.
- 2.6 The CAMHs Urgent Response Pilot ran throughout 16/17 and has been commissioned for 17/18. It operates 8am until 8 pm Monday to Friday and 10am until 6pm on Saturdays and bank holidays providing timely mental health assessments and care. A consultant is on call at all other times. Short term intensive interventions in the community are provided to young people who have experienced a mental health crisis with the aim of reducing the number of children and young people who have a second or subsequent crisis. The service also provides wrap around support when there are delays in sourcing a Tier 4 in CAMHS patient bed. Response time to assessment has reduced and length of stay in both A&E and the paediatric wards has reduced with improved facilitation of admission to Tier 4 units when required. Current information suggests a reduction in use of agency Registered Mental Nurses at RBH. There has also been a reduction in the number of minors admitted to the Place of Safety at Prospect Park Hospital.
- 2.7 As an example, the graph below shows apparently reducing admissions to the paediatric wards through August September and October 2016 compared to the

same period last year. This suggests the effectiveness of the team in supporting young people in crisis and alleviating the pressure on acute emergency and paediatric care systems. RBH data for November and December is not yet available but manual data from RBH indicates the improvement has been maintained.

Child hospital admissions for mental health conditions: rate per 100,000 aged 0 -17 years - West Berkshire

- 2.8 We are working with neighbouring CCGs and NHS England Specialised Commissioning to ensure best use of resources and implement a care pathway that reduces the need for out of area placements.
- 2.9 Five support community services have been enhanced or set up:
- Peri-natal mental health service
 - CAMHS Community Eating Disorder service
 - All age Early Intervention in Psychosis service
 - Anxiety and Depression pilot
 - Police and Crime Commissioner has commissioned additional resources to enhance the therapeutic service offer for victims of sexual assault and to other crimes, which includes children/ young people.
- 2.10 Young SHaRON (an online platform) builds on the success of the long standing SHaRON service for adults with Eating Disorders. Expansion of the web based Young SHaRON now also supports women with perinatal mental health issues and their partners. The Young SHaRON online platform has been expanded so that parents and carers of children and young people who have been referred to the Autism Assessment Team can access help and advice. Feedback has been very positive. A further subnet will soon provide online consultation for primary care, community, voluntary sector and school workers who have undergone PEPCare training.

West Berkshire specific arrangements

Emotional Health Academy

- 2.11 The Emotional Health Academy continues demonstrates early impact on improving outcomes for children and young people, and their wider families in West Berkshire. The Emotional Health Academy (EHA) aims to:
- (1) Increase the workforce at Tier 2 providing additional skills and resources to identify and respond to children with this level of need;
 - (2) Support the development of a skilled, responsive and informed wider workforce, by training a range of staff and volunteers in effective, early emotional health initiatives and interventions
 - (3) Reduce the pressure on CAMHS Tier 3 e.g. by reducing inappropriate referrals and enabling CAMHS Tier 3 to focus resources on children and young people with greatest need
 - (4) Engage the wider community, including children and young people, in increasing emotional health
- 2.12 In total the EHA has supported 609 children and young people since 1 April 2016. This is greater than initial expectations and demonstrates the value in engaging earlier and more briefly in order to reach a greater number of children, young people and families. The EHA received 9 self-referrals from CYP between July and December. This is positive given self-referral rates are typically low and may be due

to the EHA delivering a series of workshops at the 2016 Peer Mentor conference in October.

- 2.13 The EHA delivered training to 79 professionals across the sector; in total 237 members of the multi-professional workforce have been trained by the EHA since April 2016, also exceeding initial expectations. The EHA continues to offer bespoke training and development packages, co-designed with leaders in the workforce, which has primarily been taken up by early year's providers and schools and other universal voluntary, community and faith sector providers. The EHA team is keen to extend this training offer to private and independent schools, to parents and foster carers, to Children and Family Social Services, to General Practice and to Health Visiting and School Nursing in the next phase of development.

Impact on outcomes for West Berkshire Children

- 2.14 The EHA collects routine outcome measures (ROMS) that help service users track improvements in their symptoms, wellbeing and functioning. The core ROMS include:

- Strengths and Difficulties Questionnaire (SDQ) – A behavioral screening tool for emotional difficulties, as well as problems with peers, attention and concentration, and conduct.
- Outcome Rating Scales (ORS) – A quick self-report measure asking service users to rate their individual, interpersonal, social and overall wellbeing.
- Revised Children's Anxiety and Depression Scale (RCADS) – An assessment tool providing a profile on the clinical significance of specific anxiety and depression symptoms. This tool is used in assessment and to track changes over low intensity anxiety and mood interventions.
- Goal Based Outcomes (GBO) – A self-report tool used to track a service users progress towards their intervention goals.
- EHA Feedback Form – A self-report tool used to provide general feedback on the quality and impact of service.

- 2.15 Initial information yielded from ROMS in combination with feedback from service users and significant others (e.g. parents and teachers) suggest overall interventions are having a positive impact on the initial presenting concerns and quality of life.

- 2.16 For example, the EHA delivered the Overcoming Anxiety Parenting Program to six parents this last quarter. Both parent and child were asked to complete the adult and child version of the Outcome Rating Scales (ORS and CORS). Scores above 30 are indicative of good overall wellbeing; with scores below 30 indicate problems with overall wellbeing. The pre and post test results for both parent and child show that on average overall wellbeing was above 30 at the end of the program. This is illustrated in the figure below.

Pre and post intervention Outcome Rating Scale and Children's Outcome Rating Scale scores for parents and children who completed the Overcoming Anxiety Parenting Program

- 2.17 The EHA provides a wide range of brief interventions (individual, small group, classroom based) to children, young people and parents for a variety of different problems. Overtime, the EHA will be able to collect sufficient data to provide a more detailed analysis of the various interventions delivered in community and school settings.
- 2.18 The EHA will continue to collate data from ROM to provide an ongoing and increasingly sophisticated analysis of key target areas of impact identified by the CCG and Future in Mind. The EHA Operations Manager will also be meeting with the lead CAMHS ROMS analyst in February to discuss collaborative analysis of outcome measures across Tier 2 and 3 services.

Multi-agency Emotional Health Triage

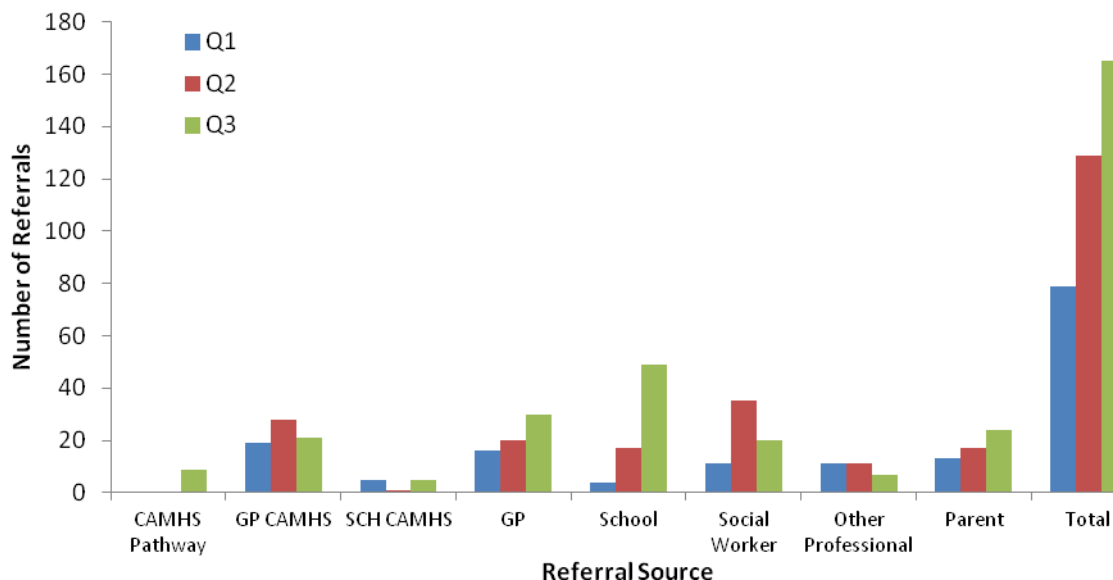

- 2.19 The total number of referrals to Multiagency Emotional Health Triage (EHT) between the 1 April and 30 December was 374. A total of 127 referrals were received between July and September (Q2), a 62% increase from a total of 79 referrals during the previous quarter of April to June 2016. A further 31% increase was observed in Q3 with a total of 167 referrals compared to the 127 in Q2. The volume of referrals exceeded initial modelling during the development of the Emotional Health Academy. However, Multiagency EHT is still being embedded and subsequently it is too early to draw long-term conclusions from these figures. A longer period of analysis is required to establish any increasing or fluctuating patterns in referrals. The total number of referrals by month from April to December 2016 is presented in the Figure below:

The cumulative number of referrals per month between April and December 2016.

2.20 There has been an increase in the volume of referrals to Multiagency EHT over the last three months. An additional Multiagency EHT meeting was held on 20 December 2016 to identify service help and support for these children and families; and to design group interventions that could support children with similar presenting needs.

2.21 A greater number of referrals were received from GPs, schools, parents or guardians. This data is presented in Table 1, and a comparison of referral sources by percentage is represented in the Figure below:

The percentage of referrals by source for the previous (Apr-Jun) and current review period (Jul-Dec).

2.22 The proportion of referrals from CAMHS Common Point of Entry (CPE), originally referred by GPs between July and December, decreased by approximately 50% from Q1.

2.23 There was an increase in referrals received directly from GPs and parents concurrently but this was not proportionally different to Q1. Meanwhile the number of school referrals more than doubled, accounting for approximately 22% of all referrals. Multiagency EHT is receiving a greater number of referrals from sources other than CAMHS CPE including direct referrals from parents and guardians. This suggests that pressures on CAMHS CPE should be experiencing reductions as more referrers come directly to EHT. However, a longer period of analysis and collaboration with CAMHS CPE is required to fully evaluate any impact Triage is having at the Tier 3 level.

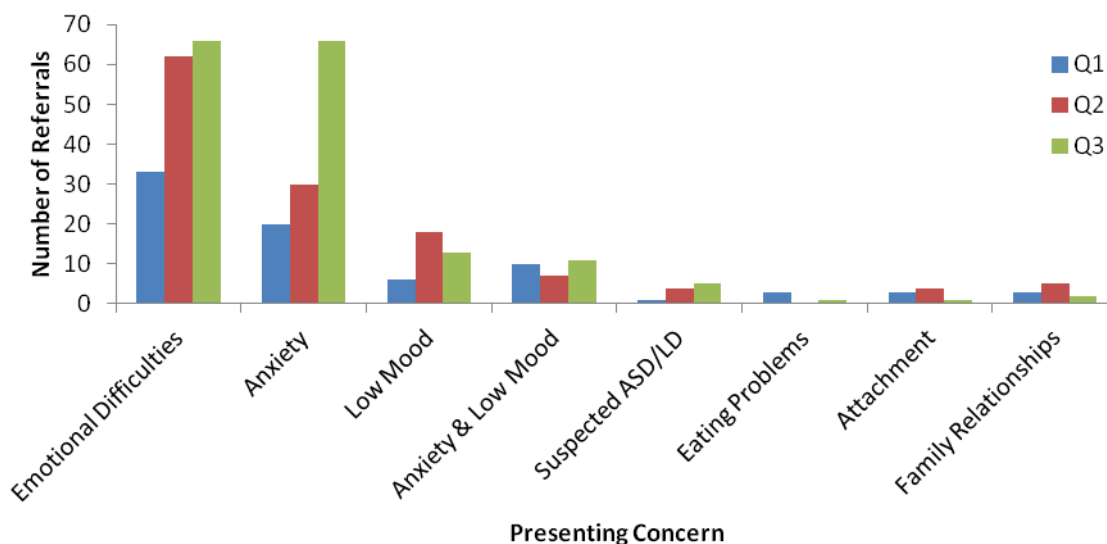

Table 1. The number and percentage of referrals by referral source over the previous (April to June) and current (July to September) quarterly reviews.

	April - June		July - December	
	<i>n</i>	%	<i>n</i>	%
CAMHS Pathway	0	0	9	3.08
CAMHS CPE				
(GP)	29	32.22	50	17.12
CAMHS CPE				
(School)	7	7.78	6	2.05
GP	15	16.67	49	16.78
School	4	4.44	64	21.92
Parent/Guardian	13	14.44	41	14.04
Social Workers	11	12.22	55	18.84
Other				
Professionals	11	12.22	18	6.16

Nature of Need

2.24 The proportion of children and young people referred with emotional difficulties ($n = 60$, 47%) increased from the previous quarter (39%). Anxiety ($n = 29$, 23%) and low mood ($n = 18$, 14%) still made up a significant proportion of referrals. Overall data on the reasons for referral is presented in Figure 3. A total of 27 children and young people referred were on the CAMHS waiting list for an ASD assessment and diagnosis. This continues to reflect the high level of need in this area.

2.25 Emotional difficulties described referrals for children and young people presenting with difficulties managing their emotions and behaviour and reflected the need for family based interventions. Triage has identified parenting/family support as a gap and area for further exploration, particularly for parents of school aged children with emerging emotional difficulties. This was due to the difficulties identifying appropriate support options, leading to often to referrals for an EHA assessment. It is recommended the Children's Delivery Group review this potential gap in service for parenting/family support of school aged children. The Emotional Health Academy will present a proposal for addressing the parenting gap at the March 2017 Children's Delivery Group meeting.

The number of referrals by presenting concern for the previous (Apr-Jun) and current (Jul-Dec) review period.

Quality Assurance

2.26 A BHFT Clinical Lead sits routinely on EH Triage and has recently summarised their view on the effectiveness of Triage, with words to the effect of, “The EHA Clinical Team has set up positive, reciprocal, trusting, respectful and supportive working relationships with the other services that comprise the Multiagency Triage Panel. This facilitates services working together effectively to achieve positive outcomes for children and young people”. This worker also provides clinical supervision to the EHA team and is available to the EHA on a weekly basis. This ensures that the standards of EHT and EHA activity and decision making are clinically overseen.

2.27 In addition, the Quality Assurance and Safeguarding Service (QAAS) were commissioned to undertake a safeguarding audit over the Christmas period which reviewed 38 EHT cases and subsequent EHA records. The outcome of the audit was that the safeguarding practice of both EHT and EHA was identified as good overall.

3. Next Steps

3.1 The refreshed Berkshire West Transformation Plan (January 2017 onwards) has been approved by NHS England as both clear on the progress (as outlined above) and the remaining priorities ahead.

3.2 Our Local Transformation Plans continue to be about integrating and building resources within the local community, so that emotional health and wellbeing support is offered at the earliest opportunity. This will reduce the number of children, young people and mothers requiring specialist intervention, a crisis response or in-patient admission. Help will be offered as soon as issues become apparent.

3.3 Following a visit by the Director of Innovations UK to consider the Emotional Health Academy system change, to which we received excellent feedback, we continue to progress conversations to see how the learning from this model can be shared nationally and if additional national resources investment can be secured for West

Berkshire’s innovative work. Locally, we are also reviewing the sufficiency of mental health support to Looked After Children in partnership with Children & Families and Looked After Children’s Education Services.

3.4 As the plan becomes operational the intended outcomes will be that children and young people and their families are more resilient. There will be fewer children and young people escalating through to urgent or specialist interventions. There will be a positive impact on the perinatal mental health of mothers in the early years of children. There will be more young people reporting positive outcomes at a universal and targeted intervention level, including a positive experience of their services.

3.5 The plan expects these outcomes to be reached over the next 4 years;

- Children and young people mental health needs will be identified early, especially in universal services such as schools, setting and GPs
- Help will be easy to access, it will be coordinated, including the young person and family in the decision making process and provided in places that make sense to them.
- If support is required at a targeted or specialist/ urgent level that this is provided quickly, at a high quality level and safely.

4. Financial information

4.1 Current Tier two funding arrangements for 2016-17 is outlined in the table below. This is a mix of directly provided Local Authority provision as well as funded work in the voluntary sector. This information does not account for all the provision in tier two but the majority that is funded by the Local Authority and the CCG.

Service	Expenditure
Emotional Health Academy	£100,000 from CCGs Match funding of £230,000 from schools and WBC
Youth Counselling service (Commissioned)	£29,500 from CCG
Reading Mencap	£20,000 from CCG
Berkshire Autistic Society	£ 20,000 across Berkshire West from CCGs
Parenting Special Children	£33,974 from CCGs
Autism appreciative inquiry work	£5,225
Total	£
438,699	

- 4.2 Current Tier three funding arrangements for 2016-17 are outlined in the table below. This is solely funded from the NHS Berkshire West CCGs.

Service	Allocation
Tier 3 (specialist CAMHs) funding arrangements from Berkshire West CCGs as a whole, that is, Newbury & District, North & West Reading, South Reading, and Wokingham CCGs.	£ 6,306,000 This is the total 16/17 allocation for specialist (Tier 3) CAMHs.
Community Eating Disorders- this is a pan Berkshire service due to the population size required.	£ 236,000- Berkshire West contribution
CAMHs urgent care pilot project	£208,000 Future In Mind resources plus £150,000 non recurrent system resilience monies from 15/16

- 4.3 Additional CCG funding for perinatal mental health services and Early Intervention in Psychosis (age group 14 years and above) have been made available which are outside the scope of this report.

- 4.4 The recurrent Mental Health transformation funding has been used to improve a range of outcomes for children and young people mental health and spent across tiers 1 to 3 with a range of partners. The money outlined below in the bullet points is released to the 4 named CCG's and managed by Berkshire West CCGs.

- North and West Reading £ £145,265
- Newbury and District CCG £145,265

6. Equalities Impact Assessment Outcomes

- 6.1 Equality Impact Assessment was undertaken in the design and implementation of the EHA.

7. Conclusion

- 7.1 In conclusion, West Berkshire partners have made significant improvements in the quality and sufficiency of emotional health intervention and support available to children, young people and families in West Berkshire.

Appendices

Appendix A – Feedback from service users of the Emotional Health Academy is attached to this report.

Consultees

Local Stakeholders: All Future in Mind stakeholders across Berkshire West; including joint partners in West Berkshire's Emotional Health Triage

Officers Consulted: Head of Service P&DCR and Emotional Health Academy leaders

Trade Union: N/A

The journey of children and young people supported by the EHA.

David

David has a diagnosis of ADHD. He had been finding primary school extremely difficult, resulting in numerous exclusions due to disruptive behaviour. David was offered a new start at a nearby school. We supported his transition alongside the exclusion officer and educational psychologist by providing holistic consultation and direct support around his emotional health needs. David has settled well into his new setting with no behavioural incidents, which is a significant improvement from his previous school. His mother provided the following feedback:

‘Hi, I just want to thank you all for all your help and support you have given David and myself over the last few weeks, it has been a really hard time but I can finally see a light at the end of the tunnel, I have just picked David up from his visit and he was smiling. I’ve not seen him smiling at school in a long time, he was also telling me how much work he has done and has made some friends, he can’t wait to go back Friday. I really appreciate all your help’ **David’s mother**

Timothy

Timothy was referred to the service through his school. He was initially referred for low mood and anger management, with additional difficulties due to his ADHD and ASD. Timothy Completed 12 sessions with the Emotional Health Worker and then took part in group anger management. He is now happy at school, learning and making friends.

‘The EHA has been brilliant for Timothy. We have seen a vast improvement in his emotional state. He no longer states he wants to kill himself or this is the worst day of my life which were both a daily occurrence. He has become less volatile and angry and his outbursts have decreased. He is also more open to discussing what went wrong and what he could do next time’.

Timothy’s Head Teacher

Sarah

Sarah attends an independent school that provides an alternative curriculum for the most vulnerable young people. Sarah has ongoing struggles with social anxiety and anger, and has experienced extensive bullying in mainstream education. Her parents also struggle with mental health difficulties, maintaining employment and ongoing financial burdens. The Emotional Health Worker provided a highly individualised, relational and restorative approach in partnership with her school. This involved drawing on her love of animals to improve her social and communication skills, and address her worries about her family’s wider struggles.

Overtime Sarah has grown in confidence, been able to speak more openly with her parents, and engage in education and targeted vocational training. She has provided the following feedback:

‘By using the ‘I’ statements I can communicate better with my mum and dad at home.’ **Sarah**

Todd

Todd is a young boy that has struggled for some time with a food phobia. He had a very limited diet, which consequently restricted his overall quality of life as well as his family. An EHA Mental Health Worker provided a short term evidenced based anxiety intervention which was lead by Todd, and his mother over 12 sessions. By the end of the intervention Todd was eating a much wider variety of foods and his family had eaten at a restaurant for the first time in years. Both Todd and his mother provided feedback:

'I think [Mental Health Worker] has been really helpful with all the help and time she's giving me. I wouldn't be eating without her!' **Todd**

'I have sought help for my son for 10 years now and to no avail, however since seeing the Emotional Health Academy we have come on in leaps and bounds. We are now at a stage that I had lost hope that we were ever likely to achieve. A massive thank you to all involved.' **Todd's mother**

Adam

Adam is a looked after child who was at risk of permanent exclusion due to poor behaviour at school. At the time the EHA LAC Clinician became involved there was not a clear plan around how various therapeutic inputs were working together to support Adam's needs, as well as his transition to a new school. The LAC Clinician took responsibility as the lead professional and provided holistic supporting including supporting the school transition, building a relationship with Adam to facilitate his engagement with specialist mental health services, and to carry out any joint working alongside his specialist plan.

The LAC Clinician's impact resulted in a cohesive team approach that was lead by Adam. He successfully transitioned to his new school without incident and engaged with specialist mental health services. Unexpectedly as a result of this work a connection with a Marine Biologist, who is now personally supporting Adam in working towards his dream of a career in Marine Biology.

Jane

Jane is currently under a special guardianship arrangement with her grandparents. She was referred to the EHA by her school to help engage the family in working together to support her behaviour in the classroom. Jane was having tantrums, defiant, stealing and damaging property. This was having a significant impact on her friendships and learning. The Emotional Health Worker identified these problems were directly to difficulties in the home. As such they provided direct support to Jane and used a family centred approach to establish better relationship dynamics within the family over an extended period. The Emotional Health Worker helped the grandparents address negative lifestyle factors and to develop a great sensitivity to Jane's needs which resulted in improved emotional regulation. Jane's family relationships have now improved significantly. Difficulties at school have also decreased to the point where Jane is now supported fully by her pastoral care team and is enjoying closer friendships. The feedback from grandparents was:

'Jane's behaviour has really improved and we really enjoyed the flexibility of the Emotional Health Worker's approach. This is the first time we have felt able to trust a mental health professional' **Jane's grandmother**

Stacey

Stacey was struggling with anxiety, particularly in relation to obsessive thoughts and compulsive behaviours. Stacey was supported at her school over a period of 12 weeks. The Emotional Health Worker provided an evidenced based anxiety intervention that focused on helping Stacey to gradually overcome situations she was worried about and manage her thoughts and behaviours. Stacey experienced a significant reduction in her symptoms and improvements in wellbeing. Follow-up feedback from her family was that Stacey continues to make gains in her mental health and they now feel confident taking what they learnt during intervention and building on her gains.

'I found the techniques for managing my anxiety really useful' **Stacey**

'We have definitely seen a change in Stacey's emotional health and are really grateful for your help. We wish we had of known about the Emotional Health Academy sooner. We were unsure about what would happen after the support ended but by the end we were very confident in being able to move forward on our own'.
Stacey's mother

Alex

Alex is diagnosed with ASD and ADHD and was referred by his mother due to problems with low mood and aggression that was putting the family under significant pressure. Our Emotional Health Worker used a combination of restorative techniques and innovative coping strategies to help Alex improve his mood, behaviour and family relationships. His family described the positive impact to be huge, especially when many other interventions had been unsuccessful in the past.

'I would like to say a huge thank you to the Emotional Health Worker for the work that he has done with Alex - it really has had a positive impact. The focus of the work was on Alex's responses to demands and on helping him to manage feelings of anger or frustration. As a result of the input from the Emotional Health Worker, I can see that Alex is taking time to think about his responses and trying really hard to practice the strategy that the Emotional Health Worker taught him.

Thanks again for all of your help and support, Alex really valued it and myself and his step-father did too. I am so pleased that we have this provision available for children and young people and their families in West Berkshire.' **Alex's mother**

Head Teacher Feedback

Staff had an initial session with the Emotional Health Worker (EHW) beginning to look at Restorative Practice. This has been immediately put into practice by the staff. We are all looking forward to further training. The EHW has also been working with individual children and with a group of Year 6 children.

As Head Teacher, I was privileged to observe the EHW dealing with the group. The group totally engaged with the EHW and through restorative justice began to realise the impact of their behaviour. Obviously, there is still further work to be done for this group of pupils as they transition to Secondary School.

It is early days, and the EHW has only visited our school four times during this term. However, there has been an immediate impact. All my staff feel supported as well as the children which is an added bonus. As a result I have just increased our buy back from one hour to two hours per week.

Head Teacher Feedback

The Emotional Health Worker has had a positive impact on the school in that she has been able to support parents who have been desperate for CAMHS support. This in turn helped lessen the load on existing ELSA support assistants. We have had patients independently access the service. Do not stop or cut back the available service!

Head Teacher Feedback

The Emotional Health Worker has been fantastic in supporting a group of staff at my school. She comes with a wealth of experience and knowledge, and her sessions have been well received.

Head Teacher Feedback

We have been very impressed by the EHA offer. The staff we have worked with have been highly skilled, effective and professional. For us, the main benefits have been:

- an additional and higher level element to our established ELSA systems
- professional development opportunities for teachers and support staff
- excellent resources
- positive engagement with parents
- a clearly identifiable and positive impact on the children being supported

It is our intention to work very hard to build additional funding into our budget next year in order to buy more EHA time. That statement, in such challenging financial times, probably says more than anything about how highly we rate both the concept and delivery.
