GREEN DEAL COMMUNITIES – LOCAL AUTHORITY FUND

Agreed Project Delivery

Name of lead Authority: South Buckinghamshire District Council

Date Prepared: 3rd April 2014 Revised 16th April 2014

DECC Green Deal Communities Local Authority Fund

Agreed Project Delivery Outline

All bids were assessed in accordance with the assessment criteria set out in the Green Deal Communities application pack. This document does not seek to record all details of your bid as these have already been assessed, instead it intends to capture all aspects which are relevant to record and assess and monitor delivery of the agreed bid.

SECTION 1 – OVERVIEW OF PROPOSAL

1.1 Applicant Details	
<i>Lead Local Authority</i>	
Name of Local Authority	South Buckinghamshire District Council
Name of contact within the Local Authority	Martin Holt
Address	Capswood, Oxford Road, Denham, Buckinghamshire UB9 4LH
Telephone number of contact	01494 732055
Email address of contact	Martin.Holt@southbucks.gov.uk
Alternative contact name	Jo Faul
Telephone number of contact	01895 837280
Email address of contact	Joanna.Faul@SouthBucks.gov.uk
<i>Other participating Local Authorities (add rows as needed)</i>	
Name of Local Authority	Aylesbury Vale District Council
Name of contact within the Local Authority	Robert Smart
Address	The Gateway, Gatehouse Road, Aylesbury, Bucks HP19 8FF
Telephone number of contact	01296 585147
Email address of contact	RSmart@aylesburyvaledc.gov.uk

Name of Local Authority	Buckinghamshire County Council
Name of contact within the Local Authority	Alexandra Day
Address	7th Floor, County Hall, Walton Street, Aylesbury, HP20 1UY
Telephone number of contact	01296 382409
Email address of contact	alexday@buckscc.gov.uk

Name of Local Authority	Cherwell District Council
Name of contact within the Local Authority	Tim Mills
Address	Bodicote House, Bodicote, Banbury OX15 4AA
Telephone number of contact	01295 221 655
Email address of contact	tim.mills@Cherwell-DC.gov.uk

Name of Local Authority	Chiltern District Council
Name of contact within the Local Authority	Louise Quinn
Address	King George V House, King George V Road, Amersham, Buckinghamshire, HP6 5AW
Telephone number of contact	01494 732209
Email address of contact	lquinn@chiltern.gov.uk

Name of Local Authority	Cotswold District Council
Name of contact within the Local Authority	Phil Measures
Address	Trinity Road, Cirencester, Gloucestershire, GL7 1PX
Telephone number of contact	01285 623600
Email address of contact	philip.measures@cotswold.gov.uk

Name of Local Authority	London Borough of Ealing
Name of contact within the Local Authority	Jo Mortensen
Address	Town Hall Annexe Ealing London W5 2BY
Telephone number of contact	0208 825 9394
Email address of contact	mortensenj@ealing.gov.uk

Name of Local Authority	Milton Keynes Council
Name of contact within the Local Authority	Neil Allen
Address	Civic Offices 1 Saxon Gate East Central Milton Keynes MK9 3EJ
Telephone number of contact	01908 252365
Email address of contact	Neil.allen@milton-keynes.gov.uk

Name of Local Authority	South Oxfordshire District Council
Name of contact within the Local Authority	Heather Saunders
Address	Benson Lane, Crowmarsh, Wallingford, Oxfordshire OX10 8HQ
Telephone number of contact	01491 823497
Email address of contact	heather.saunders@southoxon.gov.uk

Name of Local Authority	Three Rivers District Council
Name of contact within the Local Authority	Katherine Frost
Address	Three Rivers House, Northway, Rickmansworth, Herts, WD3 1RL

Telephone number of contact	01923 727 223
Email address of contact	Katherine.Frost@ThreeRivers.gov.uk

Name of Local Authority	Vale of White Horse District Council
Name of contact within the Local Authority	Heather Saunders
Address	The Abbey House, Abbey Close, Abingdon, Oxfordshire, OX14 3JE
Telephone number of contact	01235 520202
Email address of contact	heather.saunders@southandvale.gov.uk

Name of Local Authority	Watford Borough Council
Name of contact within the Local Authority	Neil Walker
Address	Town Hall, Watford Hertfordshire WD17 3EX
Telephone number of contact	01923 278149
Email address of contact	neil.walker@watford.gov.uk

Name of Local Authority	West Berkshire Council
Name of contact within the Local Authority	Evangeline Wood
Address	Council Offices, Market Street, Newbury, RG14 5LD
Telephone number of contact	01635 503267
Email address of contact	EWood@westberks.gov.uk

Name of Local Authority	West Oxfordshire District Council
Name of contact within the Local Authority	Phil Measures
Address	Woodgreen Witney OX28 1NB
Telephone number of contact	01993 861376

Email address of contact	Philip.measures@westoxon.gov.uk

Name of Local Authority	Wycombe District Council
Name of contact within the Local Authority	Brian Daly
Address	Queen Victoria Road, High Wycombe, Buckinghamshire, HP11 1BB
Telephone number of contact	01494 461000
Email address of contact	brian.daly@wycombe.gov.uk

1.2 Summary of the proposal

Briefly give an overview of the proposal, how it will be delivered using the headings given (max 300 words)

Key features of the target streets:

24 areas will be targeted which have been chosen based on the following characteristics:

- High incidence of solid wall properties.
- Active communities who are engaged with the Local Authorities and keen to support the funding programme.
- Areas with a limited number of housing types/styles (allowing creation of standardised retrofit solutions)
- Areas with social housing and where the Registered Social Landlords are keen to engage both their own tenants and privately owned properties to reduce ‘pepper-potting’.
- Areas with existing or potential for demonstration homes which can be fast tracked.

The total numbers of households receiving measures:

924

Your street by street delivery approach (including how show homes will be used):

The 24 areas that have been identified each include properties of a similar age, construction and condition. This was determined through a mixture of local authority knowledge, property data and non-intrusive visual surveys. Figure 1 below summarises the areas that will be targeted, as well as an indication of the number of streets and specific street names. Whilst a number of the areas only have 1 or 2 streets that will be targeted through the programme (and therefore where the specific streets are already known), the areas also include a number of larger estates (e.g. Richings Park, South Bucks). We intend to reduce these areas down to a number of key streets early in the programme by;

- Working with local community groups/parish councils/residents groups to single out streets where there is likely to be a high engagement with the programme, and therefore where the uptake of funding will be maximised. In particular we will focus on streets where the houses could benefit from applying external solid wall insulation to adjacent properties, helping to drive down the ‘per unit’ costs of works by focusing on scaled installations to single streets of homes.
- Working with Registered Social Landlords (in areas where they have a presence) to identify streets where they intend to or are currently undertaking planned retrofit works, and therefore where there is an excellent opportunity to offer the incentivised measures to private owner occupier and tenanted households in adjacent homes.
- Surveying representative (archetype) homes in each area to 1. Identify the specific nature of the construction and preferred solution (e.g. solid wall insulation systems) 2. Identify indicative costs for the works alongside GD Providers 3. Calculate the carbon reduction potential in order to confirm the extent of ECO funding that will be available for each property.

By liaising with the local groups and RSLs, we will also be able to rapidly identify willing ‘early adopters’, householders who are happy to have their homes refurbished early in the programme to act as open homes (akin to a new housing estate ‘show-home’), helping to focus interest from adjacent householders in the street.

Following this initial engagement / survey phase, which will result in a refined list of specific streets to target, the programme will follow three key stages (as previously detailed):

1. Developing the ‘offer’:

- Provide information to residents on GDPs able to deliver the large scale roll out of the measures on a street by street approach.
- Households can go to any GD provider, however alongside promoting any Green Deal provider; the authority may choose to develop a tender process to select a number of Green Deal providers to work on street by street delivery. This would be in parallel to enabling householders to select their own GDP. Such a tender would be developed to reduce the risk of failure to deliver the prescribed measures within the specified timeframe of the bid. The tender process would not delay the early engagement with residents.
- Provide information to residents on Green Deal and how to access a Green Deal Assessor

2. Engaging residents:

- Use show homes / open homes to demonstrate the proposed works, costs and to enable householders to talk to the owner about their experience before, during and after the works.
- Each authority will engage with residents in the street by street approach and support community engagement through community meetings, door knocking, member involvement to raise residents awareness of the opportunity to access the Green Deal Communities Fund. This aspect will enable an early opportunity to engage residents and raise their awareness of the need to access a Green Deal Assessment.
- Use a mixture of door to door canvassing, advertising and promotional events to engage residents and brief them on the programme / funding options at community events. Work alongside RSLs and Community Groups where they have an active presence.
- Pass household details onto selected GDPs who will arrange surveys.

3. Undertaking work

- GDP submits individual costs to the programme manager who will create a ‘funding plan’
- GDP will arrange for the work to be undertaken (focus on single roll out of works in a street where possible)

- Payment for works (based on funding plan) will be paid to the Provider subject to agreement by the household.

LOCAL AUTHORITY	TARGET AREA	Number of streets targetted	Example streets
Chiltern	Chesham	3	Sunnyside Road, Nalders Road, West View
Ealing	Elthorne	20	Alexandria Road, Williams Road, Green Man Lane, Romsey Road....
South Bucks	Richings Park	10	Bathurst Walk, Sommerset Way, Wellesley Avenue, Richings Way....
South Bucks	Burnham	4	Clonwell Way, Hanbury Close, Wilmot Road, The Green
South Bucks	Iver	2	Grange Way, Dutton Way
Three Rivers	Abbots Langley	1	Gallows Hill Lane
Three Rivers	Croxley Green North	5	Barton Way, Malvern Way, Winchester Way, Lancing Way, Sherborne Way
Vale of White Horse	Wantage	3	Courtney Road, Harcourt Road, Upton Drive
Watford	Watford	3	Oxhey Road, Thorpe Crescent, Elm Avenue
Milton Keynes	Lakes Estate	15	Windemere Drive, Bala Close, Tarbert Close, Garry Close, Corin Close....
Milton Keynes	Wolverton	7	Anson Road, Aylesbury Street West, Bedford Street, Buckingham Street....
West Oxfordshire	Long Hanborough	1	Church Road
West Oxfordshire	Brize Norton	1	Station Road
Cotswold	Blockley	1	Greenway Road
Aylesbury Vale	Stewkley	20	Ivy Lane, High Street North, Bletchley Road, Dean Road, High Street North....
Aylesbury Vale	Winslow	22	Burleys Road, Vicarage Road, St Laurence Road, Vicarage Road, St Albans Road....
Cherwell	Hook Norton	1	The Glebe
Cherwell	Bicester	2	Blenheim Drive, Leach Road
Wycombe	Longwick	1	Walnut Tree Lane
Wycombe	Marlow	1	Springs Gardens
Wycombe	High Wycombe	2	Gordon Street, Green Street
West Berkshire	Compton	3	Westfields, Manor Crescent, Burrell Road
West Berkshire	Kintbury	6	Holt Road, Kennet Road, Gladstone Close, Ashton Place, The Haven, Layland's Green
South Oxfordshire	Didcot	6	Queensway, Abbott Road, Hardings Strings, Tavistock Avenue, Bowness Avenue....

Figure 1. Target areas and names of individual streets

How you will engage households (& businesses if applicable):

The programme has been developed around a number of key principles aimed at maximising household engagement with the programme:

- Demonstrating the proposed works and benefits of the programme by creating **10 local 'Showhomes'**

We have already identified a number of SuperHomes which are local to many of the identified areas (Attached as separate doc but also included at end of this document). These are existing properties which have already been renovated to save at least 60% of their carbon emissions. Open House events will be held to provide early inspiration and to generate initial interest.

We will work with RSLs who are already working in the identified areas to arrange Show Home events. These will also provide inspiration, but visitors usually require more support as the 'homeowner' trusted source of information is not usually present. We will therefore need to undertake our own advertising and provide staff for events.

The project will cover costs of event promotion, provision of a booking system for the owner occupied properties, staff time at events and support for the openers. There is also an insurance cost.

- Working with **Community Groups** including Parish Councils who will act as local ambassadors to promote the project in their neighbourhoods and to organise show home open days.
- Working alongside **Registered Social Landlords** who are currently undertaking, or expect to undertake street by street improvements to their properties in the target areas.

We confirm that RSLs will not receive funding from the GD Communities Project. However it should be noted funding will be used to promote, organise and staff (by our delivery partner) these events which will in turn promote the entire project and increase uptake by other residents.

- Creating good communication channels by providing a **consumer ‘hot-line’** for booking survey appointments and working with local partners to arrange **‘retrofit days’** in local community centres and demonstration homes.

Proposed project start and end dates:

Start date: 14th April 2014

End date: 31st March 2015

SECTION 2 – MEETING THE CRITERIA

2.1 Delivering the Green Deal (see para 3.5 of original application guidance notes)

Which streets and/or areas are being targeted? (please provide details, including postcodes)	See Appendix A: Target Property List
How many buildings (households and/or businesses) are being targeted in total?	924
Please provide the number of Green Deal Plans that are expected to be entered into. <i>(NB this means those which are using Green Deal finance attached to electricity meter)</i>	554
Please provide the number of Energy Plans that are expected to be entered into. <i>(NB payment is <u>not</u> via Green Deal finance and attached to the electricity meter)</i>	370
What source of GD Assessors will you use?	All Green Deal assessments will be sourced and managed by the Green Deal Providers.
Who is your Green Deal Provider/s?	Although the Council is working with Green Deal Together, the consortium will work to develop the

	<p>programme alongside any Green Deal Provider delivering measures in the locality. Whilst the GDP will be the principle organisation to arrange GD surveys, households will not be tied to using them for undertaking the installation of measures.</p> <p>We propose two approaches to delivering the Green Deal measures.</p> <p>A) To enable householders to freely choose their GDP and claim the support funding following installation and</p> <p>B) Through a tender process to invite a number of providers in each area to bid for the work assuming a street by street roll out of measures. As both approaches would be run in parallel we do not envisage any delay in the process of engaging households.</p> <p>The tender process would be run in parallel with householders able to access their own GDP, however the tender process would enable the GDPs to provide a ‘best offer’ for the relevant streets. This will take account of cost, applicable ECO available, materials to be used, maintenance options, warranties available, speed and availability of installation teams and other criteria.</p>
Who is your ECO Provider/s?	Our Green Deal Provider partner (Green Deal Together) are in discussion with E.On and Scottish Power to agree a bilateral ECO rate for each measure based on the proposed number of measures identified in the bid. Where ECO funding through bilateral agreements isn’t available, we will be access the ECO brokerage system.

2.2 Innovation & partnerships (see para 3.6 of original application guidance notes)

Please describe the incentives you are offering:

The proposed incentive will be to offer householders a contribution towards the capital works of Green Deal eligible measures including redecoration costs and/or reinstatement of architectural detailing (where applicable). The incentive will be equivalent to the balance of the costs after taking into account ECO and a customer contribution. The customer contribution will be no less than the equivalent maximum loan that would be available through a Green Deal Plan, based on the Golden Rule. The customer will however have a choice as to whether the contribution is paid via a Green Deal Plan, or the customer meets the upfront costs themselves.

Please describe how households will be engaged:

See section 1.2

Please describe how you will ensure a street by street approach:

- See section 1.2

Please give the number of show homes you will deliver and describe how they will be used to engage residents:

We will develop up to 10 ‘show homes’ which will be located in or near to one or more of the target streets. The intention will be to fast track the works in these homes as they will help to promote the incentive scheme to local residents. All householders who agree will be required to join the ‘SuperHomes’ network and open their homes to the public over a 26 week period. SuperHomes (run by the Sustainable Energy Academy) will administer the booking system, provide guided tours, develop a key facts/FAQ document on solid wall insulation and create videos on the benefits of solid wall insulation which will be available on-line.

As set out in the funding offer letter, DECC has awarded additional funding for subsidised or free Green Deal Assessments (so households not going on to install measures can also access a free or subsidised GDA) and £10,000 to spend in a cost effective manner on show homes on target streets. Please set out how this funding will be utilised:

Free Green Deal assessment: The additional funds will subsidise the cost of Green Deal assessments for any householder that doesn’t progress with the works. Based on an actual cost of £149 (inc VAT) per assessment, the funding could pay for 265 free assessments. We are predicting a ‘drop out’ of 20% following the surveys, equating to 265 households who don’t have measures installed v’s approximately 927 who will have measures installed.

Having re-reviewed the funding we propose to use the extra funding for the following, assuming an average cost of £150 for a Green Deal Assessment:

The first 5 households in each of the 24 areas who sign up for an assessment and undertake work will be eligible for a free Green Deal assessment (5 households x 24 areas x £150 inc VAT = £18,000.

The next 5 households who undertake work in each area will be able to claim £100 off their

Green Deal assessment (5 households x 24 areas x £100 = £12,000)

The remaining households will be able to claim £50 off their assessment costs until the funding is exhausted (192 households x £50 = £9,600)

Funding for showhomes: The additional funding will be used for the following:

- Create advertising material (flyers) and pay for adverting space (local press).
- Provide funds for advertising banners outside the homes during ‘open days’.
- Providing insurance for Open Homes events.

We will encourage the very early adopters of this project to open their homes to their neighbours. These homeowners are less likely to be able to provide detailed advice on the technologies and the programme itself as, unlike SuperHomers, they will not have undertaken the investigations themselves. We will use the additional funding to support Open Homes events in the streets identified by the project. Again providing marketing, media, insurance and staff support.

Note that altogether we intend to deliver at least 20 Show Homes or Open Homes during the project lifetime.

2.3 Value for money (see para 3.7 of guidance notes)

Total funding from DECC <i>Eligible expenditure is net of VAT recoverable by the grant recipient from HM Revenue & Customs, and gross of irrecoverable VAT.</i> <i>Do not include installer training funding here (see 2.5 below)</i>	£2,473,641
How will this be spent? (please provide a detailed breakdown) e.g.: Measures £x Incentives £x Green Deal Assessments £x Show homes £x Set-up/Admin costs for project (up to 10%) etc	Measures: £2,181,636 Incentives: included in above. Green Deal assessments: £39,600 Show homes: £10,000 Set-up/admin costs: £242,404
Please provide a breakdown of	ECO: £1,349,276

match/alternative/ECO funding that the proposals will attract	
How much ECO funding will be available to support each household as a %?	18%

2.4 Please provide a table of the key milestones for delivering the proposal (including a monthly profile for the delivery of Green Deal and Energy plans) and a brief risk register with mitigating actions (these can be pasted below or provided as separate Annex).

Please refer to Appendix B and Appendix C for the project plan and risk register respectively.

See Appendix B (Project Plan v0.2). We have reviewed the programme and have bought forward the canvassing and completion of Green Deal assessments for all three areas so that it is completed by November 2014 and December 2014 respectively. This gives between 3 and 6 months (depending on when the survey is undertaken) for householders in the last group of eight target areas to have the measures installed prior to the March 2015 deadline. The revised plan now also shows the Green Deal Plans and Energy Plans separately.

2.5 Installer Training

If awarded the separate installer training funding, give details of the proposal and how it will support the development of the installer supply chain (this should include any clarification you provided following DECC feedback):

Helping SMEs Enter the Supply Chain:

It is recognised that whilst awareness amongst installers about Green Deal is increasing, there is still considerable work remaining to promote the opportunities of the market to potential market participants.

Typically SME installers report that the barriers to entry of moving into this market, centre on the costs of becoming accredited and the associated implementation of a QMS.

By way of example, at a recent installer showcase, held by Green Deal Together, the majority of attendees reported that they were reluctant to invest the cost and time of going through the accreditation process and relatively few understood the detail of what the implementation of a QMS entailed.

The aim therefore would be to provide more direct support to installers by;

- Offering direct information on routes to accreditation
- Providing vouchers towards the cost of accreditation
- Providing direct support in helping installers implement QMS in their enterprises

These activities would take place in addition to operating an installer hotline and providing support to give installers a clear road map on how they can participate in the market.

This activity builds upon the experiences and competencies of the project partners, for example the Re:Start Local initiative which has offered up to 15 hours support to SME installers to give individual advice and support on how they can take advantage of the retrofit market.

Provision of Technical Training:

Similarly it is recognised that the distribution of trades within the existing installer network is under-represented in some areas. Typically this is manifest within the solid wall insulation sector, where there are very few installers available within the geography covered by the project bid. Solid wall insulation is central to the bid itself hence the desire to ensure that capacity is developed in this trade. The perception is that there are a number of allied trades such as plastering and general building, where there are transferable skills into solid wall installation.

The aim is to work with trade bodies such as NIA and INCA and the proprietary system manufacturers to offer technical training on the products so that installers can commence the process of up-skilling into the solid wall market.

How much installer training funding has been agreed? **£101,350**

Ref	Item	Outline work package	Unit	Rate	Cost
1	Staffing Installer Hotline	Assume c0.3 FTE for calendar year. Involves hosting a hotline for installers to answer general questions about becoming GDI, sign posting to accreditation bodies, trade associations etc.	80	275	22,000.00
2	Accreditation Support	Provision of step by step guide on how to become accredited. Project activity to meet and set up initiatives with accredited organisations to offer installers a training route.	25	340	8,500.00

3	Accreditation Voucher	Provision of £500 voucher to help with costs of going through GDI accreditation.	40	500	20,000.00
4	Installer Support on QMS activity	Provide practical assistance in writing QMS processes. Will provide model template QMS process and step by step guide on how to get accredited.	30	340	10,200.00
5	QMS in-house support	Offering 40 installing companies 15 hours of direct support to help them understand the QMS manual and implement it.	84	340	28,560.00
6	Technical training	Work with product manufacturers and trade bodies to provide training sessions to installers.	20	340	6,800.00
7	Marketing Collateral	Marketing collateral for the activity i.e. leaflets, banner stands, web design			2,650.00
8	Travel Expenses	Travel and Subsistence Expenses			2,640.00

2.6 State Aid Statement

Please provide a comprehensive statement of how the proposal has been designed and will be delivered to comply with EU law relating to state aid. Including, for example, how the de minimis Regulation will be complied with where the proposal seeks to rely on it and how delivery of the proposal will be monitored to ensure continued compliance throughout the duration of the proposal. This statement will also need to explain how proposals for the spending of additional funding to deliver free or subsidised Green Deal Assessments and show homes (as set out in 2.2) will be delivered to comply with EU law relating to state aid. (further guidance on State Aid can be found at: <http://www.bis.gov.uk/policies/europe/state-aid>)

BFG operates a Framework contract which has been procured in accordance with OJEU requirements. We have been in contact with BFG and are satisfied that the scope of works for the project management aspect of the bid is within the scope of the BFG arrangements.

We have also confirmed the OJEU contract notice 2012/S 144-241054 enables the local authority to utilise the framework contract to run a mini competition to deliver a successful contractor on a project by project basis, energy efficiency and renewables technical advice; green deal advice; business case development; feasibility study; energy audits; asset/stock analysis; options appraisal; financial funding options; behavioural training; energy project implementation support. We intend to use the BFG framework to appoint our Project manager via 'mini-competition'. The Councils Cabinet agreed 8th April to accept the award of funding for Green Deal Communities and to utilise the Buyforgood framework to appoint a project manager.

In respect of the Supply Chain Development work package, which has a value of c£100k, we intend to let this out via the Council's procurement process, in compliance with the Council's contract procedures.

We envisage that the time frame for letting out and appointment of the project manager and supply chain development contractor will not exceed 10 weeks, and therefore can be accommodated within the overall timeframe of the project without jeopardising the key milestones. A revised project plan is submitted to take this into account.

In respect of the choice of Green Deal Providers that we shall work with, we are conscious of the impact of state aid on businesses and have decided to allow any authorised Green Deal Provider to be part of the scheme. The choice on which Provider to use will reside with the customer, so it will be for each Provider to prepare their own value proposition.

The project manager will identify the early adopting streets and will work with householders to enable them to access a Green Deal Assessor and then provide information on how to access a Green Deal Provider(s). The scheme will enable a fully open offer for any Provider to deliver the work and enable householders to choose any GDP, to install measures identified through the Green Deal Assessment.

As well as the above, the project manager and Council will explore the options for developing an open tender process utilising the Buyforgood framework to appoint a number of GDP's that are able to identify their approach to a large scale roll out of measures on a street by street basis. This approach may enable the GDP's to provide a best offer for the relevant streets based on open competition. This would take account of cost, applicable ECO available, materials to be used, maintenance options, warranties available, speed and availability of installation teams and other criteria. Once these have been received a clear offer could be made to the consumer. If this approach is taken we would always ensure that the various options are made clear to the customer as well as the opportunity for them to select their own GDP as stated above. The development of a tender process will be run in parallel with engaging residents as to the offer and directing them to access Green Deal assessments and to select their own Green Deal Provider. As it is being run in parallel and would follow procurement processes it will not delay the delivery of the scheme or the early engagement with residents over the offer.

In relation to the financial assistance provided to householders, Section 3 of the Regulatory Reform (Housing Assistance) Order 2002 gives a power to local housing authorities to provide, directly or indirectly, assistance to any person to enable improvements to living accommodation. The 'incentive' funding provided by this application and detailed in the example page 22, would be treated as assistance under the Order. This approach is the same as the Council approach to the delivery of its Housing Grants programme.

The assistance or incentive paid to the householder does not distort or threaten to distort competition as the incentive grant paid to the householder would enable the householder to access measures from any Green Deal Provider. Householders will be asked to authorise payments to the contractor via the Councils project manager to ensure the allocation of funds following the completion of works.

Similarly the Order enables indirect assistance to be provided to the householder to enable improvements to living conditions. Funding allocated to partners for the administrative and marketing costs and supply chain development would form part of the indirect assistance under the order.

The proposal seeks to develop the supply chain involving local contractors supporting training and accreditation as green deal installers supporting competition.

Accordingly, the scheme has been designed to comply with State Aid rules and will not to distort competition. This has been achieved by appointing the project management through a competitive, EU-compliant procurement process. Grants for energy efficient measures and show homes are awarded to householders, under statutory powers, rather than to businesses and the Supply Chain development work and Green Deal assessments will again be awarded following a competitive procedure. Alternatively an award to an organisation undertaking the supply chain development work may be made under the de minimis regulations as the value of this work falls under the threshold. The grant letter to the recipient would confirm the award was being made under the de minimis aid rules, include the amount of the award in euros, ask whether they have received other de minimis aid within the previous 3 financial years and any such amount received , as well as including the following standard paragraph -

Under EC regulation 1998/2006 (de minimis aid regulation), this is a de minimis aid. There is a ceiling of €200,000 for all de minimis aid provided to any one firm over a 3-year period. Any de minimis aid awarded to you under this offer letter will be relevant if you wish to apply, or have applied, for any other de minimis aid. For the purposes of the de minimis regulation, you must retain this letter for 3 years from the date on this letter and produce it on any request by the UK public authorities or the European Commission. (You may need to keep this letter for longer than 3 years for other purposes.)

The approach as to how the Council will deal with State Aid has been agreed by both the Head of Finance and the Head of Legal Services for South Bucks District Council.
