## Executive Report

---

### 1. Introduction

The Joint Strategic Needs Assessment uses data and evidence about the current health and wellbeing of residents in West Berkshire and highlights the health needs of the whole district. It demonstrates how needs might vary for different age groups and identifies health inequalities for disadvantaged or vulnerable groups.

The JSNA also takes into consideration a wide range of wider determinants that help shape the health and wellbeing of individuals, families and local communities.

This presentation shows the latest data that is currently informing the JSNA and is the second of two updates, the first being a report presented at the November 2015 Board meeting. The data items in the presentation are provided by the Berkshire Public Health Shared Information Team, based in Bracknell that provides JSNA updates throughout the year to all 6 Berkshire LAs. Public Health data sets are often delayed due to the requirement to process and clean data that is then made available nationally and locally which takes considerable time. Thus some data will go back to 13/14 and other data will refer to 14/15.

The updated JSNA chapters will incorporate this data and add in other locally provided data and information about available services. It is anticipated that all the JSNA chapters will be updated and available to become part of the West Berkshire District Needs Assessment by the end of April 2016. The DNA will then be available for commissioners, providers, partners and the general public on the Council website which will be updated throughout the year as new data becomes available.

The following areas are covered in this presentation:

Children in poverty

Oral health

Childhood obesity

Cancer screening

Seasonal flu

Adult mental health

Suicide rates

Mental health in old age

Safeguarding adults

Residential and nursing care
