

Written submission from Sue Brown – Objector

I am not against this store being built in Tadley. However I do have grave concerns re the traffic. The road is not wide enough to have a dedicated right turn off the A340. There has been a recent accident opposite where the entrance to the store will be with the air ambulance having to attend. If traffic has to queue this will impact at the traffic lights on the junction of Franklin Avenue, Pamber Heath Road and the A340. Any queue on the left hand side of the road would impact on traffic at the lights at the Falcon triangle, again causing chaos. Obviously this would all then affect the smaller roads in Tadley. Either queues would make it extremely difficult for emergency ambulances to get to the doctor's surgery in Franklin Avenue or for the fire service to leave from their building again in Franklin Avenue.

Having attended their presentation, I know a traffic survey was undertaken. However I don't think they understood the amount of traffic that AWE produces particularly in the late afternoon or that from local business. We get a lot of large lorries/delivery vehicles passing through on the A340. There is also the school run to consider.

I hope you will take my views into consideration.
