

## Project activities, evaluation and monitoring

| Desired   | Baseline   | Success  |   |
|---|--|--|---|
| Outcome   | Data/Monitoring<br>Methods   | Short Term   | Long Term   |
| Competition<br>to be entered<br>by the<br>schools                         | Total number of schools engaged in project   | Schools accepting the project in 2021  | Schools continuing to promote the project in 2022+  |
|   | Total number of children engaged in the competitions (attending the schools)               | Lots of children entering the competition  | Children still promoting<br>the AQ values to their<br>Families  |
|   | Total Number of parents given the information  | All of the Parents in the 3 boroughs to receive all the information  | The parents still receiving the information, this time about how well they are all doing in 2022+   |
|   | Total number of extra schools requesting to be involved.                                   | More Schools wanting to join the project   | New Schools continuing to promote the project in 2022+  |
|   | Total number of entries  | Total Number of entries  | Gaining a pictures we can use "forever"   |
|   | Total number of Bumper<br>Stickers Displayed   | Issuing the children with the bumper sticker   | Children continuing to get their parents to display it on all their cars 2022+  |
| Biggest NO <sub>2</sub> Loser entries, and to continue running each year. | Total Number of<br>Schools entering  | Schools accepting the challenge and us putting up the AQ tubes   | The same schools continuing to enter, and more schools entering and the NO <sub>2</sub> always decreasing. Eventually the competition will have to be change to "Who can keep the NO <sub>2</sub> the lowest. |
|   | Continuing reduction in NO <sub>2</sub> – or not!  | Reduction in NO <sub>2</sub>   | Baseline % reductions from COVID results achieved.  |
|   | Those who continue to enter in 2020 +  | Number of schools  | Number of schools who continue to lose or achieve COVID baseline.   |
| Changes in<br>behaviours  | Schools asked to see if the idling has reduced   | School noticing less cars idling and less cars driving to school   | The NO <sub>2</sub> reducing outside the school and an increase of alternative transports to school.  |
|   | Parents to find out if they have changed their behaviour/ or seen a change in others.      | Parents actively changing their habits and turning off the engines and using alternative methods of transport to collect their child(s). | The NO <sub>2</sub> reducing outside<br>the school and an<br>increase of alternative<br>transports to school.<br>Displaying the bumper<br>stickers.   |
|   | Taxi drivers to find out if they have changed their behaviour/ or seen a change in others. | Monitoring at taxi ranks<br>and seeing that they have<br>turned off.<br>No Warning of FPNs<br>issued                                     | Monitoring at taxi ranks<br>and seeing that they have<br>turned off.<br>No Warning of FPNs<br>issued  |

|  |  |  | & bumper stickers   |
|--|--|--|---|
|  |  |  | displayed.  |
|  | Air Quality Officer to see<br>if behaviour has<br>changed in relation all 3<br>of the PPP Boroughs             | NO <sub>2</sub> from the Diffusions tubes and CM showing a reduction.  | NO <sub>2</sub> from the Diffusions tubes and CM continuing showing a reduction year on year.                       |
|  | Assessment of levels of idling in the AQMAs.   | Reduction of NO <sub>2</sub> levels  | A continual reduction of NO <sub>2</sub> levels to prove that the message is spreading and be habit has been formed |
| Improvement<br>in local air<br>quality<br>within/near<br>AQMAs | Levels of NO <sub>2</sub><br>measured<br>within/adjacent to the<br>AQMAs.                                      | Reduction of NO <sub>2</sub> levels  | A continual reduction of NO <sub>2</sub> levels to prove that the message is spreading and be habit has been formed |
|  | Levels of NO <sub>2</sub> taken at the schools   | Reduction of NO <sub>2</sub> levels  | A continual reduction of NO <sub>2</sub> levels to prove that the message is spreading and be habit has been formed |
| Sign/ Banner<br>deployed                                       | The number of signs/banner deployed  | The number of banners deployed and people who actually notice them and take action.                                  | A reduction of NO <sub>2</sub> in those locations (monitored by diffusion tubes – already in place)                 |
| Publics Change in Behaviour from the AQMA signs and press      | Checking to see if more people have stopped idling under the posters, banners, and behind the bumper stickers. | Reduction in idling and NO2 and they areas which are advertising not to idle   | A continuing reduction on NO2 to show that the behaviours have changed.   |
| Bumper<br>Stickers to<br>be used                               | Seeing the vehicles with them on   | Seeing the vehicles with them displayed and seeing that the idling has decreased.                                    | Reduction in NO <sub>2</sub> as more vehicles continue to display them.   |
| PM 2.5<br>Reductions   | Indicative Monitors  | Finding what the annual mean is for PM2.5 at each school, and ascertaining any peaks and if so what is causing them. | Achieving the PM.2.5 objectives (2025) and removing the localise PM2.5 sources if peaks are found.                  |
| Deliver the project within budget                              | Check level of spend for budget code against anticipated spend. (Cost Code allocated)                          | Spread sheet balancing at all times  | Amount spent in-line with DEFRAs time table   |
