1. Additional Consultation Responses

Conservation:	The window sections in aluminium which have been submitted are acceptable, but would like confirmation of the colour and finish.
----------------------	--

Plans had been submitted in the course of the application indicating sections for the doors and windows. These have been confirmed as being aluminium. However further information is required of the colour and finish, and so condition 2 has been amended to include the door and window details. It is proposed to amend the wording of condition 4, so that details of the colour and finish are approved before the window are installed.

2. Access During Construction Works

The application site is situated adjacent to the Lime Avenue which is also a Public Right of Way Newbury/23/1. In addition the park is also visited by a wide range of members of the public including children, and young people. The application has not included details of how

deliveries to the site will be accommodated, or how the site and materials will be safely accommodated in close proximity to the skate park and play areas. It is considered that in the interests of public safety that a plan is submitted to indicate parking for site operatives; loading and storage arrangements for plant and materials; access to the site, including hardstandings, and the haulage across the site, as well as details of any hoardings around the site. This can all be addressed through a condition, which is included in the updated recommendation.
