Individual Executive Member Decision

Highway Winter Service Plan 2023-2024

Committee considering report:	Individual Executive Member Decision
Date ID to be signed:	20 October 2023
Portfolio Member:	Councillor Denise Gaines
Forward Plan Ref:	ID4436

1. Purpose of the Report

1.1 To seek approval of the 2023/24 Highway Winter Service Plan.

2. Recommendation

2.1 That the Executive Portfolio Member for Highways, Housing and Sustainable Travel approves the 2023/24 Highway Winter Service Plan.

3. Implications

- 3.1 **Financial:** The cost of providing the Winter Service, including the maintenance of West Berkshire Council owned salt bins (30 no.) and undertaking up to 50 primary precautionary treatments on 529.5km of carriageway, is included in the 2023/24 revenue budget. (There is no budget provision for treatment of the secondary network, snow clearance network or footway networks).
- 3.2 **Policy:** To comply with best practice and the statutory duty to maintain the public highway in a safe condition, the Environment Department reviews and produces a Highway Winter Service Plan annually to set out its operational proposals for Members to consider.
- 3.3 **Personnel:** None arising from this report.
- 3.4 **Legal:** Following a House of Lords ruling, the Council has had a statutory duty from 10 October 2003 to ensure, so far as reasonably practicable that the safe passage along a highway is not endangered by snow or ice.
- The Winter Service is to be procured through the Highways, Bridges and Street Lighting Term Maintenance Contract 2016.
- 3.5 **Risk Management:** None arising from this report.

- 3.6 **Property:** None arising from this report.
- 3.7 **Other:** A Stage 1 Equality Impact Assessment has been prepared.

4. Consultation Responses

Members:

- Leader of Council:** Councillor Lee Dillon
- Overview & Scrutiny Management Commission Chairman:** Councillor Caroline Culver
- Ward Members:** All Ward Members.
- Opposition Spokesperson:** Councillor Richard Somner

Local Stakeholders: All Town and Parish Councils

Officers Consulted: Jon Winstanley, Jonathan Martin, Sarah Clark, Carolyn Richardson

Trade Union: Not applicable.

5. Other options considered

5.1 None.

6. Introduction/Background

6.1 Government guidance for highway management recommends the provision of an annually reviewed operational plan for winter service. A summary of the 2022/23 winter season and the 2023/24 Highway Winter Service Plan is provided below.

Summary of the 2022/23 Winter Season

- 6.2 October 2022 was a warm month, with temperatures trending around 1.5-2.0C above the monthly average. Rainfall was around the average for the time of year near the coast and slightly above the average elsewhere. Maximum temperatures were close to 3C above the usual October average as well. As it usually is, RSTs remained above zero throughout the month. October started off on a variable note, with spells of rain on the first two days, but it was then rather dry for the following week. It turned a little cooler from the 8th-12th of the month as a cold front moved through the UK, with a ridge of high pressure moving in. This brought the air temperature close to 0C overnight, but RSTs remained above zero. The rest of the month was rather mild with low pressure residing to the west of the UK, allowing for a warm, but moist south-westerly flow to set up. This meant that temperatures rose above 20C towards the end of the month, but there were thunderstorms and strong winds at times, particularly on the 23rd and 31st, when a gust of 110mph was recorded at Needles in the Isle of Wight.
- 6.3 November 2022 was another warm month. Temperatures were around 2C above the average for the time of year. However, it was a significantly wet month, with

rainfall totals over 200% of the average November totals in the Isle of Wight and the south-east of Hampshire. This was welcome relief to many as the previous 11 months had been very dry, with drought conditions for many areas of the UK. The rain fell across the month but was particularly intense during the first part of this. As a result, flooding occurred on the 3rd and 6th in parts of the region. The 15th to 18th was also particularly wet, with further flooding occurring on major parts of the road network. Due to the mild and wet conditions, RSTs remained well above zero for much of the month. There were a few chilly nights towards the end of the month in the wake of cold fronts, but there weren't any prolonged cold spells.

6.4 December 2022 was a cold month, with temperatures trending around 1C below the December average. Rainfall amounts were around average, but like with the temperature, there were significant swings within the month. This was the coldest December since 2010 and the first 17 days of the month saw exceptionally cold and frosty conditions. A strong upper-level ridge developed over Greenland, which pushed a deep trough from the Arctic towards the UK and north-west Europe, allowing very cold air from the north to rush in. RSTs regularly fell below zero and often struggled to rise above zero at times, mainly inland. Whilst it was a dry period, the 11th brought some snowfall in West Berkshire, but nothing compared to other parts of the south-east of England which saw significant accumulations. The 18th saw a return to a tropical maritime airmass, and RSTs recovered as a result. The final part of the month was rather variable in nature with spells of rain and a few chilly nights, notably on Boxing Day. However, the New Year's period saw a mild south-westerly flow, allowing for RSTs to remain above zero.

6.5 January 2023 saw temperatures trend around the average for the time of the year. Rainfall totals were above the average – 125-150% for most areas but West Berkshire had precipitation amounts around the average. It was again a month of two halves. The first half was mild and wet, with 14 of the first 15 days of the month seeing rainfall. As a result of the mild and cloudy conditions, RSTs generally remained above zero, with just a few marginal nights. However, the heavy rainfall resulted in further flooding in some parts of Central Southern England. The second half was much colder with a few sleet and snow showers at times. The nights were also much colder with frequent sub-zero nights as a deep trough pushed in from the Arctic again. RSTs again fell well below zero from the 16th to the 22nd. RSTs recovered somewhat for the rest of the month, with just 1 or 2 marginal to below zero nights.

6.6 February 2023 saw a mild month, with temperatures trending around 1C above the average for the time of year. It was also a very dry month with less than 20% of the average rainfall occurring. This temperature/rainfall pattern is unusual for winter-time as dry months are usually associated with cold months and wet months are associated with frequent areas of low pressure and therefore mild conditions. However, in this case, upper-level ridges and surface areas of high pressure were the dominant features of the UK. This pushed areas of low pressure and spells of rain to the north, keeping the UK dry, especially the south. Mist and fog were often a feature of the weather in February due to the calm and settled conditions. Within these conditions, there were times when skies were clear which allowed the RSTs to drop below zero particularly in the first and last week of the month.

6.7 March 2023 was an exceptionally wet month with over 175-200% of the average rainfall seen. Temperatures were around the average for the time of year. March started off with the continuation of the settled conditions that were seen in February.

However, from the 6th, a major change occurred with another strong upper-level trough from the Arctic bringing about another cold spell across the UK. Snow showers were seen on the 7th and 8th, with RSTs falling well below zero. One of the ingredients for this cold spell was the Sudden Stratospheric Warming which occurred towards the end of February. The trickle-down effects of the polar vortex weakening helped to push the trough over north-west Europe and bring the cold and icy conditions. Whilst the 9th-10th brought significant snowfall to northern and central parts of the UK, the south didn't see any significant accumulations and the rainfall and cloud cover associated with this event helped to keep RSTs above zero. The following week saw frequent areas of low pressure and transitory ridges, meaning that RSTs fell below zero at times. However, the end of the month saw a milder theme, with temperatures trending a little above the average. RSTs fell marginal on few occasions but generally remained above zero.

- 6.8 April 2023 saw a slightly wet month, with rainfall totals around 125% the monthly average. Temperatures were around the average for the time of year as well. The first week of April saw some clear and chilly nights, allowing for RSTs to drop marginal to below zero on a few occasions. However, for much of the rest of the month, RSTs remained comfortably above zero in the milder spring conditions. A northerly flow developed in the last full week of April, resulting in a few marginal nights locally, before turning milder in the last couple of days of the month, with air temperatures reaching the mid-to-high-teens.
- 6.9 During the season the Primary Treatment network was treated on 40 occasions and the Snow Clearance Network on 6 occasions. As a result approximately 2,748 tonnes of salt was used in total through the season. With this in mind the salt stock held at Chieveley Depot will be 1,200 tonnes for the coming season. This stockpile will be replenished throughout the winter season to maintain sufficient supply in accordance with the Winter Service Plan. However, should the need arise the Council have access to 1,000 tonnes of additional salt which is stored off site by the Council's Term Contractor (Volker Highways Ltd).
- 6.10 Details of Volker Highways Ltd performance and the number of treatments undertaken during the 2022/23 winter season are provided in Appendix C and D. Of the 414 routes treated during the winter period, 412 were completed within the specified 3 hour period.
- 6.11 For the 2022/23 winter period, the Highway Winter Service Plan and associated treatment routes were published on the Council's website and incorporated into the Council's online mapping facilities.
- 6.12 The "Safer Driving" leaflet was revised and copies were distributed to relevant stakeholders. It was also made available on the Council's website.

Highway Winter Service Plan 2023/24 – Treatment Networks

Primary Treatment Network

- 6.13 The Primary treatment Network, which represents 40.6% of the highway network, and will be treated when hoar frost and/or ice is forecast, includes all "A" and "B" classified roads and some strategically important "C" class and unclassified roads. No routes have been added or removed from this network for the coming season.

Details of these routes are given in Appendix A of the Highway Winter Service Plan 2023/24.

Secondary Treatment Network

- 6.14 The Secondary Treatment Network, which represents 19.9% of the highway network and will be treated when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights). No routes have been added or removed from this network for the coming season. Details of these routes are given in Appendix B of the Highway Winter Service Plan 2023/24.

Snow Clearance Treatment Network

- 6.15 The Snow Clearance Treatment Network, accounts for 51.2% of the highway network ensures, that as far as is reasonably practicable all bus routes and access routes to schools and doctors surgeries will be cleared of snow as a priority. No routes have been added or removed from this network for the coming season. Details of these routes are given in Appendix H of the Highway Winter Service Plan 2023/24.
- 6.16 Footways will be cleared of snow using cross-service resources as they become available. The Footway Snow Clearance Network includes major town and village centres as well as footways to NHS hospitals and surgeries, schools and other key public buildings owned by the Council. Details of these routes are given in Appendix I of the Highway Winter Service Plan 2023/24.

Contingency Treatment Network

- 6.17 The Contingency Treatment Network which covers 45.5% of the highway network, will be treated when hoar frost and/or ice or snow are forecast but only when there is a national shortage of salt or limited salt suppliers and/or there has been a Government directive to limit salt use. No routes have been added or removed from this network for the coming season. Details of these routes are given in Appendix C of the Highway Winter Service Plan 2023/24.

Salt Bins

- 6.18 Currently there are 476 salt bins on the network serving Council Offices and public buildings with daily access and the road network. Of these 30 are owned and maintained by the Council (WBC) and 446 are owned and maintained by the Town or Parish Council.

Operations

- 6.19 The Winter Service period for 2023/24 will operate from Monday 30 October 2023 to Sunday 31 March 2024, although this period may be extended if weather conditions dictate.
- 6.20 Precautionary salting, snow clearance, salt bin provision and the response to adverse weather will be carried out in accordance with the policy and guidance as detailed within the Council's Highway Winter Service Plan 2023/24.

- 6.21 All decisions and actions will be made/instructed by the Council's Winter Service Duty Officer using forecast information as supplied by the Council's contracted forecaster and local roadside weather stations.
- 6.22 Operationally, the delivery of the Highway Winter Service will be provided by the Council's Highway Maintenance Term Contractor, Volker Highways Ltd.
- 6.23 A copy of the 2023/24 Highway Winter Service Plan will be issued to all Members and all Town/Parish Councils as part of the consultation process. It will also be available on the Council's website.
- 6.24 Salt stocks to be maintained above the minimum requirement of 500 tonnes throughout the winter season. At the start of the winter season a total of 2,200 tonnes of salt will be available for the Council's use (1,200 tonnes at Chieveley Depot and 1,000 tonnes off site).

Communications

- 6.25 A copy of the Highway Winter Service Plan 2023/24 is provided in Appendix G.
- 6.26 Following approval of this report, the "Safer Driving" leaflet will be revised to reflect any changes in the Primary Treatment Network and any other recommendations within the report. The leaflet will also be made available on the Council's website.
- 6.27 Following approval of this report, an electronic copy of the Highway Winter Service Plan 2023/24 will be distributed to all Members and Parish/Town Councils.
- 6.28 The Highway Winter Service Plan 2023/24 and associated treatment routes will be published on the Council's website to allow users to make an informed decision whether to make a journey.
- 6.29 A map and list showing salt bin locations and ownership will also be published on the Council's website.

7. Supporting Information

- 7.1 In preparing this report, reference was made to the following supporting information/documentation:

The Overview and Scrutiny Management Commission's review of the 2010/11 winter season.

UK Roads Group publication "Lessons Learned from Severe Weather, February 2009.

Well-managed Highway Infrastructure – A Code of Practice, October 2016.

The resilience of England's Transport Systems in Winter – Interim report, July 2010.

8. Options for Consideration

- 8.1 None.

9. Proposals

9.1 It is proposed that the Highway Winter Service Plan 2023/24 is approved.

10. Conclusion

10.1 That the Executive Portfolio Member for Highways, Housing and Sustainable Travel approves the 2023/24 Highway Winter Service Plan.

Subject to Call-In:

Yes: No:

The item is due to be referred to Council for final approval
Delays in implementation could have serious financial implications for the Council
Delays in implementation could compromise the Council's position
Considered or reviewed by Overview and Scrutiny Management Commission or associated Task Groups within preceding six months
Item is Urgent Key Decision
Report is to note only

Wards affected:

All Wards, Town and Parish Councils

Strategic Priorities Supported:

The proposals contained in this report will help to achieve the following Council Strategy priority(ies):

- PC1: Ensure our vulnerable children and adults achieve better outcomes**
- PC2: Support everyone to reach their full potential**
- OFB1: Support businesses to start, develop and thrive in West Berkshire**
- GP1: Develop local infrastructure to support and grow the local economy**
- GP2: Maintain a green district**
- SIT1: Ensure sustainable services through innovation and partnerships**

The proposals contained in this report will help to achieve the above Council Strategy priorities by *(add text)

Officer details:

Name: Andrew Reynolds
Job Title: Asset Manager
Tel No: 01635 519076 (Ext: 2076)
E-mail Address: andrew.reynolds@westberks.gov.uk

11. Executive Summary

11.1 Following a House of Lords ruling, the Council has had a statutory duty from 10 October 2003 to ensure, so far as reasonably practicable that the safe passage along a highway is not endangered by snow or ice.

12. Conclusion

12.1 That the Executive Portfolio Member for Transport and Countryside approves the 2023/24 Highway Winter Service Plan.

13. Appendices

13.1 Appendix A – Data Protection Impact Assessment

13.2 Appendix B – Equalities Impact Assessment

13.3 Appendix C – Contractors Performance in delivering the 2022/23 Winter Service

13.4 Appendix D – Summary of Winter Operations 2022/23

13.5 Appendix E – Changes to the Primary, Secondary, Snow Clearance and Contingency Network 2023/24

13.6 Appendix F – Salt Bins to be removed from the Network 2023/24

13.7 Appendix G – List of departures from the Code of Practice for Maintenance Management

13.8 Appendix H – Highway Winter Service Plan 2023/24

13.9 Appendix I – Summary of Consultation Responses

Appendix A

Data Protection Impact Assessment – Stage One

The General Data Protection Regulations require a Data Protection Impact Assessment (DPIA) for certain projects that have a significant impact on the rights of data subjects.

Should you require additional guidance in completing this assessment, please refer to the Information Management Officer via dp@westberks.gov.uk

Directorate:	Place
Service:	Environment Department
Team:	Asset Management Team
Lead Officer:	Nick Dale
Title of Project/System:	Highway Winter Service Plan 2023/24
Date of Assessment:	6 September 2023

Do you need to do a Data Protection Impact Assessment (DPIA)?

	Yes	No
<p>Will you be processing SENSITIVE or “special category” personal data?</p> <p><i>Note – sensitive personal data is described as “ data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, and the processing of genetic data, biometric data for the purpose of uniquely identifying a natural person, data concerning health or data concerning a natural person’s sex life or sexual orientation”</i></p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Will you be processing data on a large scale?</p> <p><i>Note – Large scale might apply to the number of individuals affected OR the volume of data you are processing OR both</i></p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Will your project or system have a “social media” dimension?</p> <p><i>Note – will it have an interactive element which allows users to communicate directly with one another?</i></p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Will any decisions be automated?</p> <p><i>Note – does your system or process involve circumstances where an individual’s input is “scored” or assessed without intervention/review/checking by a human being? Will there be any “profiling” of data subjects?</i></p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Will your project/system involve CCTV or monitoring of an area accessible to the public?</p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Will you be using the data you collect to match or cross-reference against another existing set of data?</p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>Will you be using any novel, or technologically advanced systems or processes?</p> <p><i>Note – this could include biometrics, “internet of things” connectivity or anything that is currently not widely utilised</i></p>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

If you answer “Yes” to any of the above, you will probably need to complete [Data Protection Impact Assessment - Stage Two](#). If you are unsure, please consult with the Information Management Officer before proceeding.

Appendix B

Equality Impact Assessment - Stage One

We need to ensure that our strategies, policies, functions and services, current and proposed have given due regard to equality and diversity as set out in the Public Sector Equality Duty (Section 149 of the Equality Act), which states:

- “(1) A public authority must, in the exercise of its functions, have due regard to the need to:**
- (a) eliminate discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;**
 - (b) advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it; This includes the need to:**
 - (i) remove or minimise disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic;**
 - (ii) take steps to meet the needs of persons who share a relevant protected characteristic that are different from the needs of persons who do not share it;**
 - (c) foster good relations between persons who share a relevant protected characteristic and persons who do not share it, with due regard, in particular, to the need to be aware that compliance with the duties in this section may involve treating some persons more favourably than others.**
- (2) The steps involved in meeting the needs of disabled persons that are different from the needs of persons who are not disabled include, in particular, steps to take account of disabled persons' disabilities.**
- (3) Compliance with the duties in this section may involve treating some persons more favourably than others.”**

The following list of questions may help to establish whether the decision is relevant to equality:

- Does the decision affect service users, employees or the wider community?
- (The relevance of a decision to equality depends not just on the number of those affected but on the significance of the impact on them)
- Is it likely to affect people with particular protected characteristics differently?
- Is it a major policy, or a major change to an existing policy, significantly affecting how functions are delivered?
- Will the decision have a significant impact on how other organisations operate in terms of equality?
- Does the decision relate to functions that engagement has identified as being important to people with particular protected characteristics?
- Does the decision relate to an area with known inequalities?
- Does the decision relate to any equality objectives that have been set by the council?

Please complete the following questions to determine whether a full Stage Two, Equality Impact Assessment is required.

What is the proposed decision that you are asking the Executive to make:	Approve Highway Winter Service Plan 2023/24
Summary of relevant legislation:	Section 41 (1A) of the Highways Act 1980, which was modified on 31st October 2003, by Section 111 of the Railways and Transport Act 2003.
Does the proposed decision conflict with any of the Council's key strategy priorities?	No
Name of assessor:	Nick Dale
Date of assessment:	6 September 2023

Is this a:		Is this:	
Policy	Yes	New or proposed	n/a
Strategy	No	Already exists and is being reviewed	Yes
Function	Yes	Is changing	Yes
Service	Yes		

1 What are the main aims, objectives and intended outcomes of the proposed decision and who is likely to benefit from it?	
Aims:	To comply with best practice and the statutory duty to ensure, so far as is reasonably practicable, that safe passage along a highway is not endangered by snow or ice (Section 41 (1A) of the Highways Act 1980, which was modified on 31st October 2003, by Section 111 of the Railways and Transport Act 2003.
Objectives:	The Council aims to provide as far as reasonably practicable safe travelling conditions on the treated network during the winter season.
Outcomes:	Safe travelling conditions on treated roads.
Benefits:	Reduce the number of road traffic collisions during the winter season.

2 Note which groups may be affected by the proposed decision. Consider how they may be affected, whether it is positively or negatively and what sources of information have been used to determine this.

(Please demonstrate consideration of all strands – Age, Disability, Gender Reassignment, Marriage and Civil Partnership, Pregnancy and Maternity, Race, Religion or Belief, Sex and Sexual Orientation.)

Group Affected	What might be the effect?	Information to support this
Age	Older residents may have difficulty using footways during the winter season due to frost, ice or snow.	Customer Services calls. Claim submissions.
Disability	As above.	Customer Services calls. Claim submissions.
Gender Reassignment	n/a	n/a
Marriage and Civil Partnership	n/a	n/a
Pregnancy and Maternity	n/a	n/a
Race	n/a	n/a
Religion or Belief	n/a	n/a
Sex	n/a	n/a
Sexual Orientation	n/a	n/a

Further Comments relating to the item:

The Winter Service Plan is sent out to consultation to all Members and Town/Parish Councils each year and the Plan and associated treatment routes are published on the Council's website to allow users to make an informed decision whether to make a journey. As a result of the above, no Stage 2 Audit is required.

3 Result

Are there any aspects of the proposed decision, including how it is delivered or accessed, that could contribute to inequality?

No

Please provide an explanation for your answer: See above comment.

Will the proposed decision have an adverse impact upon the lives of people, including employees and service users?

No

Please provide an explanation for your answer: See above comment.

If your answers to question 2 have identified potential adverse impacts and you have answered 'yes' to either of the sections at question 3, or you are unsure about the impact, then you should carry out a Stage Two Equality Impact Assessment.

If a Stage Two Equality Impact Assessment is required, before proceeding you should discuss the scope of the Assessment with service managers in your area. You will also need to refer to the [Equality Impact Assessment guidance and Stage Two template](#).

4 Identify next steps as appropriate:	
Stage Two required	No
Owner of Stage Two assessment:	n/a
Timescale for Stage Two assessment:	n/a

Name: *W. Dale*

Date: 6 September 2023

Please now forward this completed form to Rachel Craggs, Principal Policy Officer (Equality and Diversity) (rachel.craggs@westberks.gov.uk), for publication on the WBC website.

APPENDIX C

Contractors Performance in Delivering 2022/23 Winter Service

Contract Performance Indicator – KPI 2.8 - the percentage of gritting routes (Primary Treatment Network) completed within the specified time (within 3 hours).

Month	Number of Routes Treated (Precautionary treatment only)	Number of Routes Completed within 3 hours	Percentage of routes completed within 3 hours
November 2022	81	81	100%
December 2022	117	117	100%
January 2023	135	133	98.5%
February 2023	90	90	100%
March 2023	63	63	100%
April 2023	0	0	n/a
Totals	441	438	99%

Note: Winter season not extended in 2022/23.

This page is intentionally left blank

Summary of Winter Operations: 31 October 2022 to 2 April 2023

Precautionary Treatment Runs

Month	Precautionary Salting Runs on Primary Treatment Network	Precautionary Salting Runs on Secondary Treatment Network	Precautionary Salting Runs on the Contingency Treatment Network
November 2022	9	0	0
December 2022	108	0	0
January 2023	126	0	0
February 2023	90	0	0
March 2023	27	0	0
April 2023	0	0	0
Totals	360	0	0

Number of snow clearance days	6*
-------------------------------	----

* The figure shown relates to the number of days the Snow Clearance Network was treated on the forecast of snow.

Note: Winter season not extended in 2022/23.

Departures from the Code of Practice for Maintenance Management Recommendations for Winter Service

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
1	Authorities should formally approve and adopt policies and priorities for Winter Service, which are coherent with wider objectives for transport, integration, accessibility and network management, including strategies for public transport, walking and cycling. They should also take into account the wider strategic objectives of the authority.	Yes	Plan to be approved by Individual Decision 20 October 2023.	
2	Authorities should consider, consult on and formally adopt local service standards for resilience of their winter service in terms of number of days continuous severe conditions salting on a defined Minimum Winter Network for the Overall Winter Period and for the Core Winter Period.	Yes		
3	Authorities should review their approach to climate change and in particular their resilience to prolonged cold weather.	Yes		
4	Authorities should consider whether collaborative arrangements such as shared services, lead authority arrangements, collaborative service procurement and sharing depots and salt stock, would prove effective and provide value for money approach to increasing winter service resilience.	Yes	Joint procurement with Berkshire Unitaries for sensor maintenance and forecasting services.	

Departures from the Code of Practice for Maintenance Management Recommendations for Winter Service

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
5	Authorities should determine critical areas and infrastructure in conjunction with key public services and other stakeholders and seek to ensure that appropriate winter treatment has been considered by the appropriate party.	Yes	See Item 1.	
6	Authorities should ensure effective communication of information for the public before and during normal and severe winter conditions.	Yes	Publication of 'Safer Driving this Winter on West Berkshire Roads' leaflet and Winter Service Plan and associated route plans via the website.	
7	Authorities should ensure that there is appropriate consultation and communication with other highway authorities, key public services and other stakeholders and seek to ensure improved service for the public.	Yes	All adjoining authorities and stakeholders informed of daily decisions via the forecaster provider message board.	
8	Authorities should formally approve, adopt and publish, in consultation with users and key stakeholders, a Winter Service Plan based on the principles of this Code	Yes	See Item 1.	
9	Authorities should define treatment route plans for carriageways, cycle routes and footways for pre-treatment and snow conditions, based upon the general maintenance hierarchy, but adapted to take into account the factors identified by this Code.	Yes	Route plans in place where appropriate.	The Council only salts specified sections of footway network during prolonged hazardous conditions and when snow is forecast. Remote cyclepaths are not treated.

Departures from the Code of Practice for Maintenance Management Recommendations for Winter Service

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
10	Authorities should prepare contingency Winter Service Plans for severe weather conditions, which include possibilities such as salting a Minimum Winter Network. Authorities should seek agreement on plans in advance with other highway authorities and key public services such as hospitals and public transport providers. There should be a co-ordinated approach to implementing Minimum Winter Networks across adjacent Authorities.	Yes	The Council has a defined Contingency network which is detailed in the Winter Service Plan. Route plans are also in place.	
11	Authorities should explore the potential for mutual aid in salt supply and other aspects of winter service and should make contingency arrangements in advance.	Yes	Alternative salt supply arrangements in place with WBC's Term Maintenance Contractor.	
12	Authorities should take full advantage of decision support systems and services to enable timely, efficient and accurate decision making.	Yes	West Berkshire Council makes use of information from roadside sensors and detailed site specific forecasts issued by forecaster provider in its decision making process.	

Departures from the Code of Practice for Maintenance Management Recommendations for Winter Service

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
13	Authority should continually monitor performance during service delivery and respond effectively to changing conditions or network incidents.	Yes	KPI's in Term Maintenance Contract and Winter Service Plan.	
14	To ensure appropriate level of competence, training and development needs of all personnel should be established and reviewed annually, including health and safety and appropriate vocational qualifications. Training should then be provided where appropriate before the Winter Service season.	Yes	All Duty Officers trained to City and Guilds Supervisor Standard. All Term Contractor WS operatives have City & Guilds 6157 accreditation (superseded by 6159). 4 no. West Berkshire Council staff accredited with City & Guilds Winter Service Supervisors qualification.	
15	Authorities and relevant organisations should provide training and conduct periodic exercising to test plans for responding to severe weather events.	Yes	Ad hoc audits are undertaken to test Winter Service Plan during winter season.	
16	Authorities and salt suppliers should treat the supply of salt as a service rather than a simple commodity purchase.	Yes	Term Contractor / Compass Minerals re-stocking arrangements in place.	

Departures from the Code of Practice for Maintenance Management Recommendations for Winter Service

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
17	As a means of enhancing local salt storage capacity, Authority and salt suppliers should jointly consider supplier owned salt stocks held on a short or long term basis in a number of widely distributed locations around the country. A joint approach may include agreements such as purchase of some or all stock by the end of season or provision of land.	Yes	The salt stock held at Chieveley Depot will be 1,200 tonnes for the coming season. However, should the need arise the Council have access to an additional 1,000 tonnes of salt held off site by the Council's Term Contractor (Volker Highways Ltd).	
18	Authority should seek a broad approach to salt supply, for example establishing framework contracts with more than one supplier.	Yes	Arrangements in place with Highway Term Contract for alternative salt supplies.	

Departures from the Code of Practice for Maintenance Management Recommendations for Winter Service

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
19	Authorities should consider whether efficiency benefits can be obtained from collaborative salt procurement and should also consider ways to improve the balance of risk between salt suppliers and themselves, e.g. Longer contracts, performance contracts with minimum guaranteed purchase and supply, and contracts that include supply of salt and investment facilities.	Yes	Arrangements in place with Compass Minerals to maintain a total salt stock of 2,220 tonnes.	
20	All aspects of the Winter Service Plan, including service delivery arrangements, should be reviewed annually in consultation with key stakeholders to take account of changing circumstances.	Yes	The Winter Service Plan is reviewed annually.

1. INTRODUCTION

1.1 There are two elements of legislation that relate to the provision of a Winter Service in England and Wales:

- Section 41 (1A) of the Highways Act 1980, which was modified on 31st October 2003, by Section 111 of the Railways and Transport Act 2003. The first part of Section 41 now reads:

a) The authority who are for the time being the highway authority for a highway maintainable at the public expense are under a duty, subject to subsections (2) and (3) below, to maintain the highway.

b) (1) In particular, a highway authority are under a duty to ensure, so far as is reasonably practicable, that safe passage along a highway is not endangered by snow or ice."

This is not an absolute duty, given the qualification of "reasonable practicability" but it does effectively overturn previous legal precedence, albeit not with retrospective affect.

- Section 150 of the Highways Act 1980 still imposes a duty upon authorities to remove any obstruction of the highway resulting from "*accumulation of snow or from the falling down of banks on the side of the highway, or from any other cause*".

In addition, the Traffic Management Act 2004 placed a network management duty on all local traffic authorities in England. It requires authorities to do all that is reasonably practicable to manage the network effectively to keep traffic moving. In meeting the duty, authorities should establish contingency plans for dealing promptly and effectively with unplanned events, such as unforeseen weather conditions, as far as is reasonably practicable.

The plan must also comply with the general duty imposed by Section 41 of the Highways Act 1980: to maintain those highways maintainable at public expense in a safe condition.

West Berkshire District Council therefore undertake to provide a winter maintenance service which, as far as reasonably practical, will permit safe movement of traffic and minimise delays and accidents directly attributable to adverse weather conditions.

- 1.2 The Winter Service Plan for 2023/2024 provides details of the policies, procedures and practices employed by West Berkshire Council, to ensure it meets the responsibilities for providing the Winter Service in West Berkshire.
- 1.3 The purpose of the Winter Service is to provide, as far as reasonably possible, the safe movement of all highway users on designated roads throughout the District whilst keeping delays and accidents brought about by adverse weather conditions to a minimum.
- 1.4 West Berkshire Council is the highway authority in West Berkshire. The Winter Service is delivered by the Council's Term Maintenance Contractor Volker Highways Ltd.
- 1.5 The M4 and A34 form part of the national Motorway and Trunk Road network and are the responsibility of the Department for Transport (DfT) through their agents National Highways. West Berkshire Council has no responsibility for the winter service activities on these roads.
- 1.6 The core Winter Service in West Berkshire shall be provided for a period of 22 weeks commencing Monday 30 October 2023 (Week 44) and finishing Sunday 31 March 2024 (Week 13). The service period shall be extended if sub-zero temperatures are forecast outside the core period.

2. WINTER SERVICE POLICY

- 2.1 West Berkshire Council aims to provide a service to reduce as far as possible the effects of hoar frost, ice and snow and other adverse weather conditions to provide travelling conditions as safe as reasonably practicable having regard to financial constraints and the road hierarchy detailed in Section 7 of this document.
- 2.2 Where reasonably practicable to do so, the Winter Service is delivered in accordance with the recommendations given within the Code of Practice for Highway Maintenance 'Well-Managed Highway Infrastructure' October 2016 and the recommendations given in 'The Resilience of Englands Transport Systems in Winter, Interim Report, July 2010.
- 2.3 The service cannot guarantee that the main routes will be kept open or free of ice or snow, and the provision of the service does not override driver's responsibility to drive safely and in accordance with the conditions. The Council has developed an information leaflet entitled "Safer Driving this Winter on West Berkshire Roads" which is available on the Council's website <http://www.westberks.gov.uk/>
- 2.4 **POLICY FOR TREATMENT WHEN HOAR FROST AND/OR ICE IS FORECAST**

Roads

The Road Primary Treatment Network (Appendix A) will receive precautionary treatment when hoar frost and/or ice is forecast.

The Road Secondary Treatment Network (Appendix B) will receive precautionary treatment **only when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights).**

The Road Contingency Treatment Network (Appendix C) will be treated when hoar frost and/or ice or snow are forecast but only when there is a national shortage of salt and salt supplies become limited or directions are received from Central Government. This will supercede the primary and secondary treatment networks in these circumstances.

Where the Council has been made aware of water being deposited on the highway as the direct result of an unforeseen incident (fire, road traffic accident etc), burst water main or water issuing from apparatus, salt shall be applied to reduce as far as possible the effects of hoar frost, ice and other severe winter weather conditions on the highway. Ice warning signs shall be erected where appropriate.

Where the Council has been made aware of a spring, ice warning signs shall be erected on site.

Paved Footways/Cycleways (adjacent to carriageways)

The Paved Footway Treatment Network (Appendix D) will receive precautionary treatment only **only when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights).**

Paved cycleways that form part of the carriageway and are located on a Primary, Secondary or Contingency treatment network will be treated as part of these networks when instructed.

Paved cycleways that form part of a footway (footways that are adjacent to carriageways) and are located on the Paved Footway Treatment Network will be treated as part of this network when instructed.

Paved Footpaths/Cyclepaths (remote from carriageways)

With the exception of subways and some identified link footpaths in town centres, no paved footpaths/cyclepaths that are remote from a carriageway will receive precautionary treatment on the forecast of hoar frost and/or ice due to the impracticability and financial implications of doing so. **The treatment of pedestrian ramps to subways will be prioritised, when resources become available.**

Footbridges

Only footbridges identified on the Footbridge Treatment Network (Appendix J) will receive precautionary treatment ***only when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights).***

Council Offices and Public Buildings with Daily Access

West Berkshire Council will provide and maintain salt bins at Council Offices and some public buildings with daily access (Appendix F).

Public Car Parks

Roof areas and the exposed parking area at Level 2 of the Kennet Centre and the roof areas at Northbrook multi-storey car parks in Newbury, will be subject to a risk assessment by the Car Parks service to determine what action, if any, is required. Open air surface car parks are not treated unless snow conditions are forecast.

Motorways and Trunk Roads

The treatment of the M4 motorway and the A34 trunk road is the responsibility of National Highways.

Railway Level Crossings

Level crossings will ***not*** receive precautionary treatment as salt acts as an electrolyte and short circuits the signal system. When an instruction to treat the highway network is issued, Network Rail will be contacted by email so they may arrange appropriate treatment using their own contractors.

All gritting vehicles will carry a notice issued by Network Rail giving instructions not to salt (Appendix P).

Treatment Times

Primary Treatment Network - Unless a variation has been agreed by the Council, the treatment time will be 3 hours from the instructed start time to the completion of the treatment for each route.

Secondary Treatment Network – No specified treatment time.

Snow Clearance Network – No specified treatment time.

In addition, the Contractor will be given at least 1 hour to mobilise the fleet.

2.5 POLICY FOR TREATMENT WHEN SNOW IS FORECAST

Roads

The Road Snow Clearance Network (Appendix H) will receive treatment of salt/grit (as appropriate) to help prevent the laying of snow/formation of ice and will be ploughed when conditions allow.

Paved Footways/Cycleways (adjacent to carriageways)

The Paved Footway Snow Clearance Network (Appendix I) will receive treatment of salt or grit to help prevent the formation of ice and to facilitate the removal of snow.

Paved cycleways that form part of the carriageway and are located on the Road Snow Clearance Network will be treated as part of this network when instructed.

Paved cycleways that form part of a footway (footways that are adjacent to carriageways) and are located on the Paved Footway Snow Clearance Network will be treated as part of this network when instructed, by Transport and Countryside staff/contractors as resources become available.

Paved Footpaths/Cyclepaths (remote from carriageway)

With the exception of subways and some identified linked footpaths in town centres, no paved footpaths/cyclepaths that are remote from a carriageway will receive treatment to facilitate the removal of snow due to the impracticability and financial implications of doing so. **The treatment/clearance of snow from pedestrian ramps to subways will be prioritised, when resources become available.**

Footbridges

Footbridges identified on the Footbridge Treatment Network (Appendix J) will receive treatment for the removal of snow. **Treatment/clearance of snow from footbridges will be prioritised, when resources become available.**

Council Offices and Public Buildings with Daily Access

The roads leading to Council Offices and some public buildings with daily access will be treated with salt or grit as part of the Road Snow Clearance Network (Appendix H).

Public Car Parks and Newbury Bus Station

The roads leading to public surface and multi-storey car parks (Appendix E) will be treated with salt or grit as part of Road Snow Clearance Network.

Surface public car parks and Newbury Bus station will be treated along with roads where width restrictions prevent mechanical spreading, by Transport and Countryside staff/contractors as resources become available.

Roof areas and the exposed parking area at Level 2 of the Kennet Centre and the roof areas at Northbrook multi-storey car parks in Newbury will be subject to a risk assessment by the parking staff to determine what action, if any, is required.

2.6 OTHER POLICIES

Salt Bins

Salt Bins are provided by West Berkshire Council to serve Council offices and public buildings with daily access (Appendix F) and Town and Parish Councils as a means of self-help to enable communities to treat targeted areas of the public highway (Appendix G). ***Salt bins are not provided for treating private property.***

West Berkshire Council and the Parish/Town Councils are responsible for the maintenance and refilling of their respective bins.

Motorways and Trunk Roads

The treatment of the M4 motorway and the A34 trunk road is the responsibility of National Highways.

Railway Level Crossings

Level crossings will not be cleared of snow. Network Rail will be contacted by email so they may arrange appropriate treatment using their own contractors.

All gritting vehicles will carry a notice issued by Network Rail giving instructions not to salt (Appendix P).

Cross Boundary Treatment

By agreement, no cross boundary salting and snow clearance will take place between West Berkshire Council and adjoining Counties/Unitary Authorities or vice versa.

3. WEST BERKSHIRE COUNCIL/CONTRACTOR RELATIONSHIP

- 3.1 The Winter Service is provided by the Council's Highway Term Contractor Volker Highways Ltd in accordance with the requirements of the Term Maintenance Contract for "Highways, Bridges and Street Lighting 2016".
- 3.2 The following table indicates how the principal winter service responsibilities are divided between the Council and Volker Highways Ltd.

Preparation of Winter Service Policy and Plan	West Berkshire Council
Road hierarchy priorities	West Berkshire Council
Salt purchase	Volker Highways Ltd
Routeing (salting and snow clearance)	Volker Highways Ltd - with guidance from the Council
Winter Service Vehicles (plant including gritters, snowploughs and snowblowers)	Volker Highways Ltd
Decision making	West Berkshire Council
Day-to-Day operations	Volker Highways Ltd - under the instruction and guidance of the Council
Manning levels	Volker Highways Ltd
Performance monitoring	West Berkshire Council / Volker Highways Ltd
Opening of Emergency Operations Centre and Emergency Planning Room	West Berkshire Council
Approval to commence operations in extreme snow conditions	West Berkshire Council

4 STAFFING AND MANAGEMENT (WEST BERKSHIRE COUNCIL)

- 4.1 The day to day overseeing and management of the Winter Service will be the responsibility of the Winter Service Manager. This role is normally performed by the Principal Engineer (Highway Maintenance and Street Lighting) or in his absence the Asset Manager.
- 4.2 The Council will operate a 24/7 Winter Service Duty Officer rota that covers the described Winter Service period. The Winter Service Manager shall issue a copy of the rota to the Council's Emergency Planning team, the Customer Services Team and the Contractor. The roster is detailed in Appendix K.
- 4.3 When on duty, each Winter Service Duty Officer will be available 24 hours a day and will be contactable on the dedicated Winter Service mobile telephone.
- 4.4 During office hours (08:30 to 17:00 Monday to Thursday, 08:30 to 16:30 Friday) all Winter Service enquiries from members of the public will be directed to the Customer Services team on 01635 551111.
- 4.5 For Emergency Enquiries outside of office hours, enquiries will be directed to West Berkshire Council's Emergency service on 01635 42161.

Winter Service Duty Officer's home/private telephone numbers along with the Winter Service Mobile telephone number shall not be released to members of the public.

- 4.6 Prior to the commencement of the Winter Service, each Winter Service Duty Officer will be provided with an information pack, which includes details of all appropriate telephone contacts, together with any additional information that may be appropriate.

5. STAFFING AND MANAGEMENT (HIGHWAYS TERM CONTRACTOR)

- 5.1 The Contractor shall provide all necessary plant, labour and materials to deliver the Winter Service in compliance with the requirements of the “Highways, Bridges and Street Lighting Term Maintenance Contract 2016”.

6. DECISION MAKING

- 6.1 Decision making is the responsibility of West Berkshire Council's on-call Winter Service Duty Officer.
- 6.2 When on duty, the Winter Service Duty Officer will make decisions regarding Winter Service action in accordance with this Plan. The Winter Service Manager will be available to give advice to the Winter Service Duty Officer if required.
- 6.3 The Winter Service Duty Officer is responsible for liaising directly with the forecast service provider's duty forecaster. Using the forecast data provided, the Winter Service Duty Officer will make his decision regarding treatment and will disseminate his decision along with any relevant supporting information first to Volker Highways Ltd and then to the following stakeholders:

West Berkshire Council	
Volker Highways Ltd	
Veolia Waste Management	
Hampshire County Council	
Vaisala / MeteoGroup (forecaste provider)	
Oxfordshire County Council	
Royal Berkshire Fire & Rescue Service	
Wiltshire Council	
National Highways (Area 3)	
Ambulance Service	
Heart Radio	
Radio Berkshire	
Kennet Radio	
Network Rail	

- 6.4 Further information concerning weather forecasts and decision making is provided in Sections 12 to 14. Call out guidelines are provided in Appendix L. The Winter Service Manager will also be available to give advice to the Winter Service Duty Officer when required.

Timing of Actions

- 6.5 Treatment during 'rush hours' should be avoided whenever possible. For the purposes of this plan, rush hour shall be taken as 07:30 – 09:30 in the morning and 16:30 – 18:30 in the afternoon/evening.
- 6.6 The Winter Service Duty Officer's decision will be recorded on the West Berkshire Council Winter Service Daily Action Report as detailed in Appendix M. This form is filed electronically by the Winter Service Duty Officer.
- 6.7 Requests to salt will be assessed by the Winter Service Duty Officer and his/her decision will be recorded on the West Berkshire Council Winter Service Request for Salting Form as detailed in Appendix O.
- 6.8 The Winter Service Duty Officer will communicate any decision with the Council's Highway Term Maintenance Contractor via telephone or email.
- 6.9 Appropriate training will be provided for all Winter Service Duty Officers particularly with regard to technological improvements in forecasting techniques and the ice prediction system.

7. TREATMENTS

7.1 TREATMENT WHEN HOAR FROST AND/OR ICE IS FORECAST

Roads

- 7.1.1 ***The Road Primary Treatment Network (Appendix A) will receive precautionary treatment when hoar frost and/or ice is forecast.***
- 7.1.2 The total length of the Road Primary Treatment Network is 529.5km which represents 40.6% of the highway network (excluding motorways and trunk roads) and comprises all A and B classified roads and some strategically important C and U roads.
- 7.1.3 The Road Primary Treatment Network is broken down into 9 individual treatment routes. Each route has been optimised so that it takes no longer than 3 hours to treat.
- 7.1.4 ***The Road Secondary Treatment Network (Appendix B) will receive precautionary treatment when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights).***
- 7.1.5 The total length of the Road Secondary Treatment Network is 259.2km which represents 19.9% of the highway network (excluding motorways and trunk roads) and comprises locally important C and U roads.
- 7.1.6 The Road Secondary Treatment Network is broken down into 11 individual treatment routes. There is no specified treatment time for these routes.
- 7.1.7 ***The Road Contingency Treatment Network (Appendix C) will be treated when hoar frost and/or ice or snow are forecast but only when there is a national shortage of salt/limited salt supplies and/or a Government directive.***
- 7.1.8 The Road Contingency Treatment Network has been designed in accordance with the governing guidance as detailed in Section 18 and provides a minimum essential service to the public, including strategic routes, access to key facilities and other transport needs. The network is approximately 592 Km in length and represents 45.5% of the total road network, ie, it is considerably less than the combined primary and secondary networks.

Paved Footways/Cycleways (adjacent to carriageways)

- 7.1.9 ***The Paved Footway Treatment Network (Appendix D) will receive precautionary treatment only when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights).***
- 7.1.10 The network comprises primary walking routes (town centres including routes to main transport hubs, Council Offices, Council owned surface car parks and some public buildings with daily access) and footways adjacent to primary and secondary schools and doctors surgeries.
- 7.1.11 Paved cycleways that form part of the carriageway and are located on a Primary, Secondary, Snow Clearance and Contingency Networks will be treated as part of these networks when instructed.

7.1.12 Paved cycleways that form part of a footway (footways that are adjacent to carriageways) and are located on the Paved Footway Treatment Network will be treated as part of this network when instructed.

Paved Footpaths/Cyclepaths (remote from carriageways)

7.1.13 With the exception of subways and some identified link footpaths in town centres, no paved footpaths/cyclepaths that are remote from a carriageway will receive precautionary treatment on the forecast of hoar frost and/or ice due to the impracticability and financial implications of doing so. **The treatment of pedestrian ramps to subways will be prioritised, when resources become available.**

Footbridges

7.1.14 Footbridges identified on the Footbridge Treatment Network (Appendix J) will receive precautionary treatment ***only when hoar frost and/or ice have been experienced for an unbroken period of 72 hours or greater (ie, sub-zero road surface temperatures are continuously experienced through the period for 3 days and nights).***

Council Offices and Public Buildings with Daily Access

7.1.15 The roads leading to Council Offices and some public buildings with daily access will be treated as part of the Road Primary Precautionary Treatment Network.

Public Car Parks

7.1.16 When ice conditions occur on the roof areas and the exposed landing area at Level 2 of the Kennet Centre, and the roof areas at Northbrook multi-storey car parks in Newbury, a risk assessment will be undertaken by the parking staff to determine what action, if any, needs to be taken. Depending on the severity of the conditions some or all of the following actions may be carried out by parking staff:

- (a) Erection of prominent warning signs at the approach points to the exposed areas;
- (b) Sprinkling ice melting granules across the icy surface (these granules release a heat generating chemical when crushed by a passing vehicle). It is not possible to use traditional rock salt in multi-storey car parks as it has a marked deteriorating effect on the waterproof membrane of the roof areas leading to water ingress and a corrosive effect on the steel reinforcement within the structure;
- (c) Closure of the areas completely by use of tapes and cones.

7.1.17 On those occasions when the areas are closed they will be periodically checked during the day and if the ice has melted they will be re-opened for use. The intermediate indoor parking levels of the two multi-storey car parks will not be treated as they are unaffected by icy weather.

7.1.18 Open air surface car parks are not treated unless snow conditions are forecast.

7.2 TREATMENT WHEN SNOW IS FORECAST

Roads

7.2.1 In the event of snow being forecast, the Road Snow Clearance Network (Appendix H) will first receive a treatment of salt/grit (as appropriate) and will then be followed by ploughing/snow clearance if required.

The Snow Clearance Network is broken down into 9 individual treatment routes. There is no specified treatment time for these routes.

Paved Footways/Cycleways (adjacent to carriageways)

- 7.2.2 The Paved Footway Snow Clearance Network (Appendix I) will receive treatment to help prevent the formation of ice and to facilitate the removal of snow.
- 7.2.3 The network comprises primary walking routes (town centres including routes to main transport hubs, Council Offices, Council owned surface car parks and some public buildings with daily access) and footways adjacent to primary and secondary schools and doctors surgeries. Treatment will be managed by the Council's Highway Term Maintenance Contractor and carried out by Transport and Countryside staff/contractors as resources become available.
- 7.2.4 Paved cycleways that form part of the carriageway and are located on the Snow Clearance network will be treated as part of this network when instructed.
- 7.2.5 Paved cycleways that form part of a footway (footways that are adjacent to carriageways) and are located on the Paved Footway Snow Clearance Network will be treated as part of this network when instructed.

Remote Paved Footpaths/Cyclepaths (remote from carriageways)

- 7.2.6 As detailed in the Council's 'Safer Driving this Winter on West Berkshire Roads' leaflet, the Council does not promote the use of bicycles during periods of hazardous winter weather. With the exception of subways and some identified link footpaths in town centres, remote paved footpath/cyclepaths are not treated when snow conditions are forecast due to the impracticability and financial implications of doing so. **The treatment/clearance of snow from pedestrian ramps to subways will be prioritised, when resources become available.**

Footbridges

- 7.2.7 Footbridges identified on the Footbridge Treatment Network (Appendix J) will receive treatment for the removal of snow. **Treatment/clearance of snow from footbridges will be prioritised, when resources become available.**

Council Offices and Public Buildings with Daily Access

- 7.2.7 The roads leading to Council Offices and some public buildings with daily public access (Appendix F) will be treated as part of the Road Snow Clearance Network.

Public Surface and Multi-Storey Car Parks, and Newbury Bus Station

- 7.2.8 The roads leading to public surface and multi-storey car parks (Appendix E) will be treated as part of Road Snow Clearance Network (Appendix H). Surface public car parks and Newbury Bus Station will also be treated along with roads where width restrictions prevent mechanical spreading by hand using Transport and Countryside staff/contractors as resources become available.
- 7.2.9 In the case of multi-storey car parks, when snow conditions occur on the roof areas and the exposed parking area at Level 2 of the Kennet Centre, and the roof areas at Northbrook multi-storey car parks in Newbury, a risk assessment will be undertaken by the parking staff to determine what action, if any, needs to be taken. Depending on the severity of the conditions some or all of the following actions will be carried out by parking staff:

- (a) Erection of prominent warning signs at the approach points to the exposed areas;
- (b) Sprinkling ice melting granules across the snow surface (these granules release a heat generating chemical when crushed by a passing vehicle). It is not possible to use traditional rock salt in multi-storey car parks as it has a marked deteriorating effect on the waterproof membrane of the roof areas leading to water ingress and a corrosive effect on the steel reinforcement within the structure;
- (c) Closure of the areas completely by use of tapes and cones.

7.2.10 On those occasions when the exposed parking areas are closed they will be periodically checked during the day and if the snow has melted they will be re-opened for use. The intermediate indoor parking levels of the two multi-storey car parks will not be treated as they are unaffected by winter weather.

8 SALT BINS

General

- 8.1 Salt Bins are provided by West Berkshire Council at Council offices and public buildings with daily access and by Town and Parish Councils as a means of self-help to enable communities to treat targeted areas of the public highway. West Berkshire Council and the Parish/Town Councils are responsible for the maintenance and refilling of their respective bins. ***Salt bins are not provided for treating private property.***
- 8.2 30 salt bins are owned and maintained by West Berkshire Council (Appendix F) and 446 are owned and maintained by the Parish/Town Council (Appendix G). Unless alternative arrangements are put in place by Town or Parish Councils, salt bins sited on the public highway are expected to remain on the highway on a permanent basis.

Council Owned Salt Bins

- 8.3 Salt bins owned and maintained by West Berkshire Council (Appendix F) are clearly marked with the following information:

This Bin has been provided by West Berkshire Council
**for residents to use to treat local roads and
footways with salt or grit.**

**The Salt or grit must not be used on private
property.**

If this salt bin needs refilling please contact West
Berkshire Council's **Customer Services** on **01635
551111**

Requests to Remove, Move or Add a Salt Bin to the Network

- 8.4 When requested by a Town or Parish Council, the Council can arrange for a salt bin to removed, moved or added to the network on behalf of the Town or Parish Council. The cost for these services are as followed and will be reviewed annually.

Removal of a salt bin: £232.39 + VAT (includes salt removal, taking up and disposal of the bin and a general tidy up of the verge/footway).

Moving a salt bin to a new location: £193.07 + VAT (includes salt removal, taking up and resiting the salt bin, refilling and a general tidy up of the verge/footway).

Providing a new salt bin (170 litres): £319.87 + VAT (includes purchase, delivery, first fill of salt/grit and the issue of a license).

- 8.5 Where more than one bin is requested, a discount will be offered to reflect any savings that can be made on supply and delivery.
- 8.6 Any request to remove, move or have a new salt installed must come in writing from the Town or Parish Council Clerk. When the request is to have an existing salt bin moved or for a new salt bin, the suitability of site will be assessed taking into account the following:
- the bin must not cause a nuisance or obstruction (interfere with sight lines etc)
 - there must be sufficient space for the bin and safe access for the purposes of refilling

- 8.7 If approved, a licence will be issued to the Town or Parish Council. The salt bin will be clearly labelled to inform the public that the salt bin is owned and maintained by the Town or Parish Council.
- 8.8 Should a Town or Parish Council wish to purchase salt bins directly from an independent supplier, a formal request should be made by following the above procedure. If approved, the Town or Parish Council will be responsible for making the necessary arrangements with their suppliers for payment and delivery and the filling of the salt bin.
- 8.9 Salt bins owned by Town and Parish Councils will be clearly marked with the following information on stickers provided by The Council:

This Bin has been provided by the Town/Parish Council ***for residents to use to treat local roads and footways with salt or grit.***

The Salt or grit must not be used on private property.

If this salt bin needs refilling please contact the local Town/Parish Council

- 8.10 West Berkshire Council will be responsible for maintaining an electronic inventory of salt bins across the district and reserves the right to remove any salt bin from the highway network.

Refilling

- 8.11 With the exception of the salt bins owned by West Berkshire Council (Appendix F) requests to refill a salt bin should be directed to the appropriate Town or Parish Council.
- 8.12 The Council can provide a refilling service when requested by a Town or Parish Council. The cost of a refill is £122.87 + VAT and will be reviewed annually.

Advertising

- 8.12 Should a Town or Parish Council wish to use new bins for advertising, such adverts may require planning permission. The Town or Parish Council should be directed to the Council's website/Planning service.

9. OPERATIONAL INFORMATION

Response Time

- 9.1 Throughout the Winter Service season the Contractor will commence and complete treatment within 3 hours (Primary Treatment Network only) from the start time as specified by the Winter Service Duty Officer.

Salt and Stocks

- 9.2 At temperatures below minus 10°C, salt no longer acts as an efficient de-icer, however, in Britain, with rare exceptions, the temperature during periods of icing or snowfall is usually above minus 3°C making salt the most commonly used chemical in the UK.
- 9.3 Rock salt complying with BS 3247 shall be supplied by the Council's Term Maintenance Contractor. The salt shall be either stored in a purpose-built barn or in the open if covered by a proprietary sheeting system. Current salt stocks are summarised below.

Depot	Stock Capacity	Pre-Winter Stock	Minimum Stock Level
Chieveley	1200 tonnes	1000 tonnes	500 tonnes

- 9.4 Salt stocks will be in place by 30 September each year and maintained in accordance with the requirements of the Term Contract for Highways, Bridges and Street Lighting 2016.
- 9.5 Salt chemical composition is to be established by the Contractor through testing in accordance with BS 3247 (Part 1).
- 9.6 The rates of spread shown below will be used for the listed forecast conditions. For other forecast conditions, the Winter Service Duty Officer will liaise with the Duty Forecaster and the Term Contractor in finalising a rate of spread.

- 9.7 The Council reserves the right to use a salt/grit mix as circumstances dictate, particularly during snow conditions.

	Weather Condition	Spread Rate (g/m ²)	Comments
Precautionary Treatment when hoar frost and/or ice is are forecast	Forecast of hoar frost	8 - 10	6mm salt
	Forecast of Ice	10 - 40	6mm salt
Treatment prior to and after snowfall.	Prior to snowfall	20	6mm salt
	During snowfall	20 - 40	6mm salt
	After snowfall	10	Every 25mm of snow
Compacted Snow	Hard compacted snow and ice at air temperatures down to - 5°c	20	50/50 salt/single sized abrasive aggregate not exceeding 6 mm or 5 mm sharp sand
	Hard compacted snow and ice at air temperatures below - 5°c	10	Single sized abrasive aggregate not exceeding 6 mm or 5 mm sharp sand
Contingency Network	Salt shortage/rationing	10	6mm salt

Snow Clearance

- 9.8 When snow conditions are forecast with a high degree of confidence, the Winter Service Duty Officer will instruct the Term Contractor to prepare the vehicles for snow clearance and fit ploughs.
- 9.9 The Winter Service Duty Officer will liaise with the Council's Civil Contingency Manager and if appropriate, the Civil Contingency Manager will arrange for the Council's Emergency Operations Centre (EOC) to be opened and manned until conditions abate. Once opened, all incoming calls relating to winter service operations will be directed to the EOC.
- 9.10 The Winter Service Duty Officer may instruct the Term Contractor to patrol the Road Snow Clearance Network to monitor the weather / level of snowfall / snow clearance operation and will liaise with the Duty Forecaster to obtain accurate forecast information. The Winter Service Duty Officer will instruct the Highway Term Contractor to treat (precautionary treatment and snow clearance) the Road Snow Clearance Network as appropriate using the forecast information provided.
- 9.11 The Winter Service Duty Officer will ensure that all appropriate records of activities and actions taken by Highways in managing the snow clearance operation are electronically stored. Records will also include the activities and actions of the Asset Management team and the Term Contractor. These records are essential in dealing with claims and making bids for additional funding for winter damage repairs.

- 9.12 Following the thaw, the Snow Clearance Treatment Networks will be inspected for damage. Details of any damage along with repair estimates will be passed to the Asset Manager.

Wet Spots

- 9.13 Where the Council has been made aware of water being deposited on the highway, the Winter Service Duty Officer will inform the Street Works team if a utility company is involved and arrange for the site to be treated with salt and arrange for ice warning signs to be erected. A record of the wet spot will be recorded in the 'Wet Spot' register along with the actions taken.

Possible causes of wet spots may include the following:

- direct result of an unforeseen incident (fire, road traffic accident etc)
- burst water main
- water issuing from apparatus
- spring

Records

- 9.14 The Winter Service Manager will hold the following details:

- Road Primary Treatment Network
- Road Secondary Treatment Network
- Contingency Treatment Network
- Footway/Cycleway Treatment Network
- Snow Clearance Network
- Footway/Cycleway Snow Clearance Network
- Route plans where applicable
- Database of salt bin locations
- Wet Spot Register

10. PLANT, VEHICLES AND OPERATORS

10.1 A schedule of plant and vehicles owned by the Contractor is listed below:

Chieveley:	2 no	Econ purpose built 9 m ³ gritters
	7 no	Econ purpose built 6 m ³ gritters
	1 no	Econ 3.5 tonne transit pickup with 1.2 m ³ gritter (weight restricted routes)
	10 no	Snowploughs
	1 no	JCB tele handler loading shovel
	2 no	JCB tele handler loading shovel (owned by Sub-Contractor)
	3 no	7.5 tonne tipper lorries for hand spreading
	5 no	3.5 tonne tipper lorries for hand spreading
	1 no	Tractor with Snow Blower attachment (owned by Sub-Contractor)

10.2 Details of the treatment routes, information from Network Rail and any other relevant documentation will be kept in each vehicle.

10.3 To ensure effective and even salt distribution and the correct rate of spread, the spreading equipment will be calibrated annually and the controls marked accordingly for spreads of 10g/m² for normal pre-salting and 20g/m² and 40g/m² for more severe conditions by the Contractor.

10.4 All gritters are fitted with a GPS vehicle tracking system and the following vehicle tracking information is recorded:

- (i) Speed
- (ii) Width of spread
- (iii) Spreading rate
- (iv) Start and finish time
- (v) Lengths of gritting and free-running

Operator Training

10.5 All gritter drivers must hold a current City & Guild 6159 with the following units:

- (1) 080 Winter Service Operations Health & Safety
- (2) 013 Prepare and operate winter service vehicles over 7500kg LGV
- (3) 313 Plough angle blade / Vee blade.

11. OPERATIONAL COMMUNICATIONS

- 11.1 All winter service vehicles are in contact with the Contractor's depot via 'hands free' mobile phones in order that instructions can be passed and current information relayed back from the vehicles.
- 11.2 The Term Contractor is required to provide the Council with a list of the telephone numbers that are to be used prior to the commencement of winter service operations not later than 16 October 2023.
- 11.3 The Term Contractor is required to provide the Council with a copy of the Contractor's Winter Service Daily Action Report by 9:30 am the next working day (refer to Appendix N). This records details of each vehicle, driver, route number, start time, finish time, rate of spread and any other remarks.

12. WEATHER FORECASTS

12.1 During the winter period, West Berkshire Council will use the 'RoadMaster' forecasting service provided by DTN, from their UK Headquarters in Victoria, London. The information received each day includes the following:

- (i) detailed 36-hour forecast
- (ii) morning, afternoon and evening update forecasts
- (iii) site specific temperature graphs (obtained from the "A4 Halfway" primary weather forecasting station within West Berkshire)
- (iv) early morning summary and preliminary forecast
- (v) 2 - 10 day forecast

12.2 The 36-hour forecast is received at 05:00, 11:00 and 17:00 hours each morning/afternoon. The main features of this forecast are as follows:

(i) Readiness Colour

This is based on the traffic light system of colours; green, amber or red. The definitions are:

Green No hazard expected.

Amber RST's below zero but road dry
RST between 0 and +1 °C (inclusive)
RST > +1 °C and < +2 °C with low confidence Red
RST's below zero with a hazard.

Red RST's below zero with a hazard.

(ii) Hazards

This section includes the hazards causing the red or amber readiness colours as well as other weather hazards such as heavy rain, high winds or fog, which could accompany a green readiness colour. A qualifying time will be given for all hazards.

(iii) Minimum Temperatures

Minimum air and road temperatures for urban and rural areas are provided.

(iv) Confidence Statements

This consists of high, moderate or low confidence for each of the hazards described above, together with a qualifying statement. For example: low confidence regarding extent of showers this evening but high regarding road temperatures falling below zero.

(v) 36 hour Weather Summary

This is a general summary of the forecast for the period from midday to midday. An example of a typical forecast is shown on the following page.

12.3 At 17:00 hours each evening, a forecast update is issued by DTN and can be viewed by the Winter Service Duty Officer at home on a portable laptop computer. ***If further information is required, the Winter Service Duty Officer can make use of the 24 hour consultancy service provided by DTN.***

Example of 36 Hour Forecast Summary.

📅 Wednesday, 2020-11-04 11:00 [Go to latest issue](#)

🔥 Minimum RST past 18 hours: -0.3°C at 06:50 on A4 Halfway [View morning summary](#)

Forecaster: Chris Fischer

Short term forecast

The day will be dry and fine, with plenty of sunshine.

Remaining dry this evening, and turning chilly under clear skies. Overnight, mist and fog patches may form, persisting through till morning.

Mist and fog patches may linger through tomorrow morning in some areas. Once cleared, the rest of the morning and the afternoon will be dry and sunny, but rather cool.

Road conditions:

A chilly night, with RSTs falling away under fairly clear skies, dropping to marginal levels in the coldest spots. Fog formation may cause some RSTs to recover during the second half of the night.

2 to 5 day forecast

High pressure will dominate bringing calm and settled conditions. Friday, will be dry with sunny spells once overnight mist and fog patches clear. Saturday will be fine with sunny spells for a time once early fog clears, although cloud will thicken from the south later. Sunday will be foggy at first with rain falling during the morning, before clearing later in the afternoon.

6 to 10 day forecast

Low pressure is likely to bring some wetter and windier weather into early next week. Tuesday and Wednesday are expected to be dry. A warm southerly wind will be associated with this weather pattern so temperatures will likely be a bit above average and overnight frost is unlikely through midweek. Another low pressure system will approach from the south by the end of the week bringing the risk of more rain.

Hazard Summary

No Hazards for Rain resulting in Ice, Snowfall, Black Ice, Hoar Frost

13. THERMAL MAPPING AND ICE PREDICTION

West Berkshire Roads

- 13.1 Vaisala Ltd has undertaken thermal mapping across Berkshire, a technique for measuring and analysing the thermal characteristics of road surfaces. It is normally carried out under three different weather conditions, one of which is the extreme condition or night when skies are clear and winds light. The other weather conditions are known as intermediate and damped. Under extreme conditions, the maximum variation in road surface temperature is produced, this, together with the coldest absolute temperatures, leads to potentially hazardous road conditions. Under such conditions it is most important to be able to accurately predict road surface temperatures.
- 13.2 The information yielded from thermal mapping is used in conjunction with site specific forecasts to predict accurately the minimum temperature of road surfaces across the road network. This allows accurate decisions to be made not only about whether to salt or not but whether to salt only those roads that require treatment.
- 13.3 Thermal mapping has been used to produce data, which allows the pre-salting routes to be analysed objectively and to ensure the optimum location of road surface and atmospheric condition sensors. Ten sensor sites have been installed on the network locations shown on the following page.
- 13.4 Annual calibration checks on sensors are undertaken by the equipment supplier(s).
- 13.5 Every hour, information from these sensors is fed automatically into the Central Processing Unit at Vaisala's offices in Birmingham. The parameters recorded are, air temperature, humidity, precipitation, wind speed and direction, road surface condition (wet or dry) and depth temperature. Forecasts are produced by DTN based on this information. These forecasts when used in conjunction with the thermal mapping data forms one of the most sophisticated ice prediction systems in the UK.
- 13.6 West Berkshire Council acts as lead authority on behalf of the other Berkshire Unitary Authorities in respect of the co-ordination and procurement of contracts with Vaisala and DTN.
- 13.7 All six Berkshire Unitary Authorities have access to the ice detection equipment described above.

14. MEDIA COMMUNICATIONS

- 14.1 The Winter Service Duty Officer will notify the relevant organisations via the Message Board on the DTN's Winter Service web portal when a decision to treat has been made confirming what actions have been taken.
- 14.2 During periods of prolonged adverse weather and snowfall, the Winter Service Duty Officer shall liaise with the Council's Public Relations team who will provide relevant information to all interested organisations.
- 14.3 Prior to the onset of winter, details of the Council's Winter Service Plan will be published in the local press and made available through the Council's web site: www.westberks.gov.uk
- 14.4 A leaflet called 'Safer Driving This Winter on West Berkshire Roads' will be produced which shows the primary salting network and provides winter driving tips. This leaflet is available from Council offices and libraries as well as being displayed on the Council's web page (www.westberks.gov.uk)

15. PERFORMANCE MONITORING AND AUDIT

- 15.1 The Winter Service provided by West Berkshire Council is carried out by the Council’s Highway Term Maintenance Contractor Volker Highways.
- 15.2 Performance of the Contractor in relation to response and treatment times shall be monitored to ensure satisfactory service delivery and contract compliance in accordance with the following Contractual requirements.

	Performance Criteria	Frequency
1.	Winter Service Operations: Start Time Finish Time	Weekly by Winter Service Manager
2.	Winter Service Audit	At times agreed by the Winter Service Manager

- 15.3 The Contractor’s performance will be reported annually as part of the Highway Winter Service Plan approval process.
- 15.4 Throughout the Winter Service season and where reasonably practicable to do so, the Winter Service Manager will arrange for ad hoc audits to take place. The audit will consist of West Berkshire Council staff following a gritter on an actual salting run to record and verify the following:
 - (i) Time vehicle left depot.
 - (ii) Vehicle following agreed route.
 - (iii) Vehicle travelling at appropriate speed whilst salting.
 - (iv) Ensure vehicle driver stops to check spreading equipment is working correctly.
 - (v) Check that salt is being spread.
 - (vi) Time vehicle arrives back in depot.
- 15.5 Following an audit, a formal meeting will be held with the Contractor to discuss their performance, results and any urgent actions required to achieve the contract standards.

16. OTHER SEVERE / ADVERSE WEATHER

16.1 Please refer to the Council Severe Weather Plan.

17. BUDGETS

17.1 West Berkshire Council's 2023/2024 budget for winter service allows for the following:

- (i) Maintenance, repair and calibration of communication and ice prediction equipment.
- (ii) Fixed costs of standby arrangements.
- (iii) 50 precautionary salting runs on the Road Primary Treatment Network.
- (iv) Weather forecasts and ice prediction service.
- (v) Provision and maintenance of salt bins.

17.2 It should be noted that whilst snow clearing operations will be undertaken in accordance with the Winter Service Plan and as instructed by the Winter Service Manager, there is no specific budget for this work. However, a report will be prepared and submitted to the appropriate committees as soon as possible after snow clearing has been completed in order for any budgetary pressures and adjustments to be discussed and agreed.

WINTER SERVICE CALL OUT GUIDELINES

FORECAST WEATHER

- A** R.S.T. above freezing
 - (i) + 4° C or above
 - (ii) above 0° C, below +4° C
- B** R.S.T. at or below 0° C
 - (i) 0° C to -3° C
 - (ii) below -3° C
- C** B (i) or B (ii) with rain beforehand
- D** Hoar Frost / Ice
- E** Freezing fog
- F** Freezing rain
- G** Snow
 - (i) light falls up to 30 mm
 - (ii) falls over 30 mm

FORECAST ROAD CONDITIONS

- 1** Road surface dry
- 2** Road surface wet but may dry
- 3** Road surface wet
- 4** Road surface dry but may become wet

RECOMMENDED ACTION

- a) No Precautionary salting.
- b) Partial salt - wet patches, major structures, high ground etc.
- c) Inspections at a time to enable any necessary action to be taken before conditions become critical.
- d) Full pre-salt to be completed before onset of freezing conditions.
- e) Full pre-salt after rain has finished.
- f) Salting crews to remain in Depot awaiting instructions.
- g) Road conditions to be monitored by duty officer using ice prediction system.

CLEARING SNOW AND ICE FROM PAVEMENTS AND PUBLIC SPACES

This guide is designed to help you to act in a neighbourly way by safely clearing snow and ice from pavements and public spaces.

Will I be held liable if someone falls on a path I have cleared?

There is no law preventing you from clearing snow and ice on the pavement outside your property, pathways to your property or public spaces.

It is very unlikely that you would face any legal liability, as long as you are careful, and use common sense to ensure that you do not make the pavement or pathway clearly more dangerous than before. People using areas affected by snow and ice also have responsibility to be careful themselves.

What can I do to help clear snow and ice from pavements and public spaces?

Practical advice from highway engineers is given below. This is not a comprehensive list.

- Start early: it is much easier to remove fresh, loose snow compared to compacted ice that has been compressed by people walking on it.
- **Do not use hot water.** This will melt the snow, but may replace it with black ice, increasing the risk of injury.
- Be a good neighbour: some people may be unable to clear snow and ice on paths leading to their property or indeed the footway fronting their property. Snowfall and cold weather pose particular difficulties for them gaining access to and from their property or walking to the shops.
- If shovelling snow, consider where you are going to put it, so that it does not block people's paths, or block drainage channels. This could shift the problem elsewhere.
- Make a pathway down the middle of the area to be cleared first, so you have a clear surface to walk on. Then you can shovel the snow from the centre to the sides.
- Spreading some salt on the area you have cleared will help to prevent any ice forming. Table salt or dishwasher salt will work, but avoid spreading on plants or grass as they may be damaged by it. A few grams (a tablespoon) for each square metre you clear should work. The salt found in salting bins will be needed for keeping roads clear.

Particular care and attention should be given to steps and steep gradients to ensure snow and ice is removed. You might need to apply additional salt to these areas.

- Use the sun to your advantage. Removing the top layer of snow will allow the sun to melt any ice beneath; however you will need to cover any ice with salt to stop it refreezing overnight.
- If there is no salt available, then a little sand or ash is a reasonable substitute. It will not have the same de-icing properties as salt but should offer grip under foot.

CLEARING SNOW AND ICE FROM PAVEMENTS AND PUBLIC SPACES (cont'd)

Where can I find out more information about what I can do in an emergency?

The Preparing for Emergencies web pages on GOV.UK contain useful information on how you can prepare for the impacts of all emergencies. The pages can be found at:

<https://www.gov.uk/government/publications/preparing-for-emergencies>

Why is the Government publishing this information?

During the severe winter in 2009/10, many people across the country worked very hard to keep our transport network open. This included many members of the public who cleared pavements and public spaces around their homes. Some people, however, were deterred from taking action to clear pavements and other public spaces because they feared that they might be sued.

An independent review of the transport sector's response to the severe weather of 2009/10 recommended that the Department for Transport should publish this note on good practice for members of the public in clearing snow and ice from footways and other public spaces. The Local Government Association published a report on behalf of Councils which reached the same conclusion. The Government is committed, as a key part of the Big Society agenda, to remove the barriers which may unnecessarily prevent people from helping themselves and those around them.

Recommendations

Code of Practice for Maintenance Management for Winter Service - 2009/2010

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
1	Authorities should formally approve and adopt policies and priorities for Winter Service, which are coherent with wider objectives for transport, integration, accessibility and network management, including strategies for public transport, walking and cycling. They should also take into account the wider strategic objectives of the authority.	Yes	Winter Service Plan reviewed in accordance with recommendations of the Overview and Scrutiny Management Commission (OSMC) and COP as amended December 2009. Plan to be approved by Individual Decision 11 November 2010.	
2	Authorities should consider, consult on and formally adopt local service standards for resilience of their winter service in terms of number of days continuous severe conditions salting on a defined Minimum Winter Network for the Overall Winter Period and for the Core Winter Period.	Yes	Revised Contingency Treatment Network.	
3	Authorities should review their approach to climate change and in particular their resilience to prolonged cold weather.	Yes	Emerging Severe Weather Plan covering flooding, severe winter conditions, heatwaves and droughts.	
4	Authorities should consider whether collaborative arrangements such as shared services, lead authority arrangements, collaborative service procurement and sharing depots and salt stock, would prove effective and provide value for money approach to increasing winter service resilience.	Yes	Joint procurement with Berkshire Unitaries for sensor maintenance and forecasting services.	

Recommendations

Code of Practice for Maintenance Management for Winter Service - 2009/2010 (cont'd)

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
5	Authorities should determine critical areas and infrastructure in conjunction with key public services and other stakeholders and seek to ensure that appropriate winter treatment has been considered by the appropriate party.	Yes	Scrutiny by WBC's OSMC involving all interested internal and external parties.	
6	Authorities should ensure effective communication of information for the public before and during normal and severe winter conditions.	Yes	Publication of 'Safer Driving this Winter on West Berkshire Roads' leaflet and Winter Service Plan and associated route plans via the website.	
7	Authorities should ensure that there is appropriate consultation and communication with other highway authorities, key public services and other stakeholders and seek to ensure improved service for the public.	Yes	Comprehensive consultation was carried out by OSMC during their review and during the development of the 2011/12 Winter Service Plan. Consultees included internal stakeholders, Council and Parish/Town Council Members, transport providers, adjoining councils and emergency services.	
8	Authorities should formally approve, adopt and publish, in consultation with users and key stakeholders, a Winter Service Plan based on the principles of this Code	Yes	Winter Service Plan reviewed in accordance with recommendations of the OSMC and COP as amended December 2009. All interested internal and external parties consulted as part of scrutiny and development and approval of Plan.	

Recommendations

Code of Practice for Maintenance Management for Winter Service - 2009/2010 (cont'd)

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
9	Authorities should define treatment route plans for carriageways, cycle routes and footways for pre-treatment and snow conditions, based upon the general maintenance hierarchy, but adapted to take into account the factors identified by this Code.	Yes	Route plans in place.	The Council only salts specified sections of footway network during prolonged hazardous conditions and when snow is forecast.
10	Authorities should prepare contingency Winter Service Plans for severe weather conditions, which include possibilities such as salting a Minimum Winter Network. Authorities should seek agreement on plans in advance with other highway authorities and key public services such as hospitals and public transport providers. There should be a co-ordinated approach to implementing Minimum Winter Networks across adjacent Authorities.	Yes	<p>Comprehensive consultation was carried out by OSMC during their review and during the development of the 2011/12 Winter Service Plan. Consultees included internal stakeholders, Council and Parish/Town Council Members, transport providers, adjoining councils and emergency services.</p> <p>Thames Valley Police 'Salt Cell' working group to develop GIS plans for Thames Valley to assist authorities with cross boundary treatment.</p>	
11	Authorities should explore the potential for mutual aid in salt supply and other aspects of winter service and should make contingency arrangements in advance.	Yes	Alternative salt supply arrangements in place with WBC's Term Maintenance Contractor.	

Recommendations

Code of Practice for Maintenance Management for Winter Service - 2009/2010 (cont'd)

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
12	Authorities should take full advantage of decision support systems and services to enable timely, efficient and accurate decision making.	Yes	West Berkshire Council makes use of information from roadside sensors and detailed site specific forecasts issued by MeteoGroup UK in it's decision making process.	
13	Authority should continually monitor performance during service delivery and respond effectively to changing conditions or network incidents.	Yes	PI's in Term Maintenance Contract and Winter Service Plan.	
14	To ensure appropriate level of competence, training and development needs of all personnel should be established and reviewed annually, including health and safety and appropriate vocational qualifications. Training should then be provided where appropriate before the Winter Service season.	Yes	Formal training of WBC Staff undertaken with Vaisala 2009. All Duty Officers trained to City and Guilds Supervisor Standard. All Term Contractor WS operatives have City & Guilds 6157 accreditation (superseded by 6159). 2 staff are now accredited City & Guilds Winter Service Supervisors.	
15	Authorities and relevant organisations should provide training and conduct periodic exercising to test plans for responding to severe weather events.	Yes	Ad hoc audits are undertaken to test Winter Service Plan during winter season.	
16	Authorities and salt suppliers should treat the supply of salt as a service rather than a simple commodity purchase.	Yes	Term Contractor/salt Union re-stocking arrangements in place.	

Recommendations

Code of Practice for Maintenance Management for Winter Service - 2009/2010 (cont'd)

Recommendation	Description	Adopted by WBC	Comments	Reason for not adopting recommendation
17	As a means of enhancing local salt storage capacity, Authority and salt suppliers should jointly consider supplier owned salt stocks held on a short or long term basis in a number of widely distributed locations around the country. A joint approach may include agreements such as purchase of some or all stock by the end of season or provision of land.	Yes	WBC's salt stock for the coming season will be 2500t. Being a predominantly rural district, WBC's winter service requirements do not favourably align with those of the more urban UA's in Berkshire.	
18	Authority should seek a broad approach to salt supply, for example establishing framework contracts with more than one supplier.	Yes	Arrangements in place with Highway Term Contract for alternative salt supplies.	
19	Authorities should consider whether efficiency benefits can be obtained from collaborative salt procurement and should also consider ways to improve the balance of risk between salt suppliers and themselves, e.g. Longer contracts, performance contracts with minimum guaranteed purchase and supply, and contracts that include supply of salt and investment facilities.	Yes	Arrangements in place with salt union to maintain 2500t salt reserve.	
20	All aspects of the Winter Service Plan, including service delivery arrangements, should be reviewed annually in consultation with key stakeholders to take account of changing circumstances.	Yes	The Winter Plan has been comprehensively consulted on and reviewed 2010/11. The next annual review will take place next summer in advance of the 2012/13 winter season.	

Recommendations

The Resilience of England's Transport Systems in Winter - An Independent Review July 2010

No.	Recommendation	Action by:	Comments
1.	<p>That for the forthcoming winter the need for a strategic reserve stock of salt for England's highway authorities be recognised, if the resilience to handle the risk of its being as severe as last winter is to be secured, and given the projected shortfall of UK production against the possible demand; and that the Highways Agency should be tasked, on behalf of the Secretary of State, to acquire by import, store and make available on terms to be agreed an initial reserve stock of some 0.25m tonnes</p> <p>of salt for 'last resort' use by local highway authorities and for itself; and that the DfT at the end of December should formally lead the consideration and review (using information and forecasts then available) of whether further additional reserve stocks should be secured for the remainder of the winter.</p>	DfT/HA	N/A
2.	<p>A systematic year-round process of collecting data, monitoring salt stocks and movements and disseminating the findings should be put in place by DfT, to give advance warning of any issues affecting prospective salt supplies and availability, and to provide the basis for regular strategic overviews of the salt supply chain and any necessary decisions by them or other parties. This should be independent of any need for the operation of Salt Cell in 'allocation' mode.</p>	DfT	N/A

Recommendations

The Resilience of England's Transport Systems in Winter - An Independent Review July 2010 (cont'd)

No.	Recommendation	Action by:	Comments
3.	The vulnerability and lack of resilience of the salt supply chain as currently configured should be recognised; that some targeted intervention needs to be designed which will substantially improve the resilience of the supply chain with minimal impact on the normal functioning of the salt market in the UK; and to note that the development and evaluation of proposals for this is a key part of the Review's stage two work, which will be presented in the Final Report in the autumn.	N/A	N/A
4.	DfT should consult with the Scottish and Welsh authorities about the implications for Scotland and Wales of these short term recommendations for the salt supply chain.	DfT	N/A
5.	Every local highway authority should have a robust winter service plan, and should regularly review the key elements of it, including network coverage, operational procedures and standards and appropriate salt stockholding to meet defined resilience standards, all in line with current best practice.	WBC	West Berkshire has a robust Plan in place that has been reviewed as a result of internal scrutiny and in line with the recommendations of the CoP as amended December 2009.
6.	Consultation on treated networks should be broadly drawn to include business representatives, passenger and freight transport operators and local communities, as well as health and education service providers; and to help manage public expectations should be followed by clear and comprehensive communications of winter service plans, supported by good real-time communications through media and on-line when winter conditions arrive.	WBC	Appropriate stakeholders were consulted as part of the scrutiny review. The 2010/11 Plan has been developed in accordance with the scrutiny panel's recommendations.

Recommendations

The Resilience of England's Transport Systems in Winter - An Independent Review July 2010 (cont'd)

No.	Recommendation	Action by:	Comments
7.	As many local highway authorities already do, authorities should collaborate with and support lower-tier authorities to help ensure that maximum practical winter support can be given in areas and communities beyond the treated networks, including possibly the treatment of key footways and pedestrianised areas.	WBC	Use of internal staff to treat town centre footways identified and included in revised 2010/11 Plan. Consultation ongoing regarding the use of farmers.
8.	While recognising that research and technical information in this area is relatively fragmented and uncoordinated, and that available evidence needs to be presented more authoritatively, local highway authorities should be aware of the opportunities to improve salt utilisation through adopting lower spread rates and alternative treatment methods, both to reduce cost and to reduce demands on a potentially vulnerable salt supply chain.	LHA	Await further research.
9.	Professional bodies and the Local Government Association should encourage the more widespread dissemination and adoption of best practice in the preparation and delivery of winter service plans.	LGA	N/A

Recommendations

The Resilience of England’s Transport Systems in Winter - An Independent Review July 2010 (cont'd)

10.	<p>While recognising that the resilience of salt supply is being addressed as a nationwide issue, local highway authorities can support this and should:</p> <ul style="list-style-type: none"> • all participate fully in the year-round systematic information collection and monitoring of salt stocks and movements which we are recommending should be adopted by DfT; • ensure their own planning of salt stocks and supply is sound and carried out in accordance with best practice, and supported by practical measures to improve salt utilisation; • put in place (or confirm where existing) mutual aid with neighbouring authorities to help address localised shortages. 	DfT	3500t of salt purchased to provide additional resilience.
-----	---	-----	---

Recommendations

The Resilience of England's Transport Systems in Winter - An Independent Review July 2010 (cont'd)

No.	Recommendation	Action by:	Comments
11.	Local highway authorities should treat their winter service planning as an integral part of wider general resilience planning for civil contingencies, bringing to the development of winter service plans the benefits of processes and disciplines associated with resilience planning, together with the culture of constructive challenge and validation.	WBC	Winter Service Plan will form part of a larger emerging Adverse Weather Plan.
12.	<p>The Highways Agency should be commended for the research-based measures it has put in place to improve its salt utilisation. It should:</p> <ul style="list-style-type: none"> • continue to research and monitor the efficiency of its practices and strive to improve the cost-effectiveness of its winter service operation; • share best practice, research and knowledge with other highway authorities. 	HA	
13.	There should be a comprehensive, authoritative review of technical standards and guidance relating to both the treatment and the spread rates of salt, based on research and evidence as necessary, leading to the production of practical guidance for practitioners as well as at a policy and planning level. This should be led by the UK Roads Liaison Group (see next recommendation).	UKRLG	
14.	The valuable initiative and work of the National Winter Service Research Group should be brought under the wing of the UK Roads Liaison Group, who should take responsibility for and set the strategy for its work programme, including its contribution to the comprehensive review of technical standards and methods.	UKRLG	

Recommendations

The Resilience of England's Transport Systems in Winter - An Independent Review July 2010 (cont'd)

No.	Recommendation	Action by:	Comments
15.	<p>The Department for Transport should develop, in collaboration with local government representatives and appropriate experts, a code setting out good practice for members of the public, including business owners, in clearing snow and ice from footways. This should:</p> <ul style="list-style-type: none"> • be produced by the end of October 2010 in time for the coming winter; • be short, along the lines of Westminster's advice to its residents; • set a standard which, if observed, should guard the public against negligence claims; • be made available to households by local authorities. 	DfT	
16.	<p>We note and commend the generally high quality and accuracy of short term (0–5 days) weather forecasting now available to support the operational decisions of highway authorities and their contractors, and recommend that the weather forecasters continue to develop their capabilities both for 15–30 day forecasting to meet the resource planning needs of highway authorities, and for longer term seasonal forecasting.</p>	Forecast Agencies	
17.	<p>Given that the probability of next winter being severe continues to be relatively small but that severe winters are still possible despite the warming trend, we recommend that winter resilience planning – and the securing of greater resilience in the supply of salt – should continue on the basis of dealing with winters of a severity similar to that of 2009–2010.</p>	WBC	Salt stock 2500t. Alternative sources of salt available through Term Contractor (off site). Further sources being explored.

Summary of Consultation Responses

APPENDIX I

Ref Number	Name / Organisation	Date Received	Comments	Response Issued	Action
1	Mark Lewis (WBC)	13/03/2023	Consideration be given to promoting Highwood Copse, Newbury to Primary Network.	02/10/2023	No action. Road does not meet current criteria for inclusion on Primary Treatment Network. Action required. Footways directly outside school to be added to the Footway Snow Clearance Network.
2	West Ilsley Parish Council	14/03/2023	Consideration be given to promoting Bury Lane, West Ilsley to Primary Network. Salt bins on Bury Lane should be responsibility of WBC.	02/10/2023	No action. Oxfordshire County Council do not treat their section of Bury Lane, in addition there are no arrangements in place for cross boundary treatment. To be kept on Secondary Treatment Network. Salt bins - the filling of salt bins to remain with the PC.
3	Councillor Stuart Gourley	25/06/2023	Consideration be given to adding Walton Way, Newbury to the Secondary Network.	28/09/2023	No action. Already forms part of the Secondary Network.
4	Brimpton Parish Council	07/07/2023	Footway Snow Clearance – consideration be given to extending this on Brimpton Lane (between War Memorial and junction with Wasing Road). Also, to include the footway along Brimpton Road (Manor View).	28/09/2023	No action. The existing Footway Snow Clearance Network already comprises primary walking routes (including footways adjacent to primary and secondary schools).
5	Lambourn Parish Council	11/07/2023	Consideration to be given to adding Greenways to the Primary Network. Parish Council prepared to pay.	02/10/2023	No action. Due to the width of the road and size of the vehicle, it is not operationally possible to include Greenways, Lambourn on any treatment network.

Summary of Consultation Responses

APPENDIX I

Ref Number	Name / Organisation	Date Received	Comments	Response Issued	Action
6	Enborne Parish Council	21/07/2023	Consideration to be given to adding Wheatlands Lane to the Primary Network. Parish Council prepared to pay.	02/10/2023	Action required. Wheatlands Lane to be included on Primary Network. Parish Council to pay for the additional length of treatment.
7	Aldermaston Parish Council	15/08/2023	Consideration be given to promoting Frouds Lane to the Primary Treatment Network.	28/09/2023	No action. Frouds Lane – currently forms part of the Secondary Network and will remain so for the coming season. If it is being used as a diversion route Frouds Lane will receive treatment when the Primary Treatment Network is being treated.
