Consultation Responses

General comment – No specific location

1. **Thames Valley police** - Thank you for the consultation documents relating to Draft Parking Review - Traffic Regulation Order Amendment No 37 (Ref: PSA037). On street parking restrictions are a council led enforcement function. Thames Valley Police have no objections. May I ask that the usual exemptions are written into the TRO to allow police staff and other emergency services to park any vehicle where needed to execute their duties.
- 2.

	ALDERMASTON – Wasing Lane (Plan BJ81)
	I OBJECT TO THE PROPOSAL
1	As per normal. No where to park. Too many cars crammed into small spaces.
2	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
	I SUPPORT THE PROPOSAL
1	We welcome the restrictions to prevent inconsiderate parking outside the school and improve safety and visibility for pupils
2	Y road is littered with parked cars, all on the pavement. All cars have a drive way yet there not used. I live in a dead end people keep blocking my drive. Being disabled it causes me distress.
3	Support as many irresponsibly people park blocking the road.

	BEENHAM – A4 Bath Road (layby) (Plan BL73)
	I OBJECT TO THE PROPOSAL
1	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more & pollution. All roads outside and around schools should be 20mph automatically
2	Object. Not enough parking space.

	CHIEVELEY - East Lane (Plan AN46)
	I OBJECT TO THE PROPOSAL
1	On behalf of Downland Pharmacy, East Lane, Chieveley, I submit this formal and urgent objection to the proposed Traffic Regulation Order (TRO) in my capacity as the Hybrid Pharmacy Manager. The implementation of this measure would significantly compromise access to essential NHS pharmacy services for the local community without substantive evidence that it would deliver any meaningful improvement in road safety. Downland Pharmacy fully supports evidence-based initiatives to improve road safety. However, the proposal to remove parking directly outside the pharmacy is

neither necessary nor proportionate. Such a restriction would severely hinder public and patient access to vital NHS healthcare services, particularly for vulnerable and less mobile individuals who rely on immediate proximity to the pharmacy. This TRO is fundamentally flawed and appears to be based on a limited understanding of local needs. Parking on East Lane is essential for individuals who depend on Downland Pharmacy for urgent medications, clinical services, and expert health advice. It is not for unrelated or discretionary purposes. Background Downland Pharmacy is the sole community pharmacy serving Chieveley and the surrounding area. It is located at the front of the healthcare building on East Lane, providing a vital access point for NHS services across a wide catchment. Like most high street community pharmacies, Downland Pharmacy does not have dedicated parking. On-street parking on East Lane remains the only practical means by which patients including those with limited mobility can safely and conveniently access NHS medicines and healthcare services. Each day, 5–8 medication delivery vehicles supply Downland Pharmacy, ensuring timely and uninterrupted access to life-critical medicines for hundreds of residents. Inadequate parking arrangements will disrupt these essential deliveries, posing a direct risk to patient care and community health. To provide detailed information to dispel any misinformation local private schools and local residential facilities use Downland Pharmacy, primarily for their prescription services, and are not registered with the GP surgery on site. In addition to NHS Downland Pharmacy East Lane Chieveley Newbury Berkshire RG20 8UY 01635 248251 prescription services, customers from Berkshire and the surrounding counties drive to and use Downland Pharmacy for NHS Seasonal vaccinations such as COVID and Flu vaccines (via the National Booking Service), NHS blood pressure checks and NHS Pharmacy First scheme, where patients get treatment from the pharmacist without needing a GP appointment. The NHS 111 service also directs people to Downland Pharmacy for all the above services and more. Safety Concerns To my knowledge, there has been no history of personal injury accidents, recurring safety incidents, or substantiated complaints arising from the existing unrestricted parking outside Downland Pharmacy. There have been no complaints or formal representations to Downland Pharmacy regarding the parking on East Lane. I therefore respectfully request clarification of: 1. The specific safety risk the Council is seeking to mitigate at this location. 2. The evidence or data relied upon to demonstrate that the existing parking presents a demonstrable hazard. No evidence has been presented to explain why less restrictive alternatives would not adequately address the stated safety concerns. I believe the TRO is extremely flawed, as it does not acknowledge the correct business affected, which will have a significant impact on Downland Pharmacy providing essential services. The impact on Downland Pharmacy cannot have been considered as Downland Pharmacy customers haven't been correctly identified as the source of the parking in the TRO. Proportional Response Double yellow lines prohibit stopping at all times and represent the most restrictive parking control available. If the Council's concern relates to peak-time congestion or occasional obstruction, then the proposed measure goes beyond what is required to address those concerns. I am concerned that less restrictive, more balanced alternatives have not been adequately considered, such as: 1. Time-limited parking during off-peak hours 2. Peak-hour restrictions only 3. Three short-stay bays (e.g. 30 minutes) with clear signage. 10-20 minutes would be inadequate for some of the services the Pharmacy provides to its customers, such as Pharmacy First consultations. 4. A restriction aligned with pharmacy opening times (8.30-1pm, 2pm-6.30pm Monday to Friday at present) Having reviewed best practice in highway management I note the following are requirements: 1. The least restrictive effective measure is used 2. The impact on frontages and essential services is fully considered These options would allow the Council to address any safety concerns, if safety

	improvements are genuinely required, while maintaining safe access for vulnerable patients and without removing essential access to the pharmacy. Impact on Services The premises directly affected are a community pharmacy (Downland Pharmacy) providing essential NHS healthcare services to local residents and customers who travel from as far away as Hungerford due to the demise of community pharmacy in West Berkshire. Please see the National Pharmacy Association website: Deprived areas with greatest health needs worst hit by pharmacy closures - NPA National Pharmacy Association Pharmacy Closure Rates & Impacts in the Community West Berkshire has the highest per capita rate of pharmacy closures in the country. Between 2022 and 2024, the number of pharmacies per 100,000 people fell from 12.4 to 9.9. The area has been designated a “pharmacy desert” by the National Pharmacy Association (NPA), with approximately 1 pharmacy for every 7,200 residents, compared to the national average of 1 per 4,600. This is four times fewer pharmacies than in Westminster, the area with the highest provision. The closures mean residents must travel further for medication and advice, which puts significant pressure on the remaining pharmacies and local GP surgeries and helps explain why patients travel from as far as Hungerford to use Downland Pharmacy. Lee Dillon MP, a great champion of community pharmacy, recently visited Downland Pharmacy and has been a great supporter. A significant proportion of customers using Downland Pharmacy are: 1. Elderly 2. Disabled 3. Living with long-term health conditions 4. Collecting urgent or time-critical prescriptions, which include end-of-life medication for those choosing to die at home and medications for the Community Nursing (District Nurse) service. I am deeply concerned that the restrictions proposed to remove the availability of short, close parking immediately outside the pharmacy on East Lane will remove the already limited access to safe and equitable access to essential healthcare services. Creating a clear barrier to healthcare access for vulnerable residents, many of whom are unable to walk significant distances or safely carry medication from alternative parking locations adding to significant health inequalities faced by rural populations. Equality Act 2010 – Public Sector Equality Duty Even where a scheme is promoted on safety grounds, the Council remains subject to the Public Sector Equality Duty under the Equality Act 2010, which stipulates that West Berkshire Council has a duty to have due regard to the impact of its decisions on protected groups, including disabled people and older residents. Removing parking outside a community pharmacy disproportionately affects: 1. Disabled people 2. Older residents 3. Those with mobility limitations or urgent medical needs I formally request the Council to confirm: 1. Whether an Equality Impact Assessment has been carried out for this proposal. 2. Whether it specifically considers the effect of removing parking outside a Community Pharmacy, a essential healthcare service. In summary I submit that: 1. The safety justification for the proposed double yellow lines has not been adequately evidenced. 2. The proposal is not proportional to the stated risk and is punitive in nature. 3. Less restrictive, safety-compliant alternatives have not been explored. 4. The impact to essential healthcare and protected groups has not been adequately addressed and the business affected has not been correctly identified. I therefore request that the proposal to introduce double yellow lines outside Downland Pharmacy, the community pharmacy on East Lane, Chieveley, is reconsidered without delay and alternatives are assessed before the TRO advances.
2	On behalf of Downland Pharmacy, East Lane, Chieveley, I submit this formal and urgent objection to the proposed Traffic Regulation Order (TRO) in my capacity as the Hybrid Pharmacy Manager. The implementation of this measure would significantly compromise access to essential NHS pharmacy services for the local community without substantive evidence that it would deliver any meaningful improvement in road safety. Downland Pharmacy fully supports evidence-based initiatives to improve road safety. However, the proposal to remove parking directly outside the pharmacy is

neither necessary nor proportionate. No evidence has been presented to explain why less restrictive alternatives would not adequately address the stated safety concerns. I believe the TRO is extremely flawed, as it does not acknowledge the correct business affected, which will have a significant impact on Downland Pharmacy providing essential services. The impact on Downland Pharmacy cannot have been considered as Downland Pharmacy customers haven't been correctly identified as the source of the parking in the TRO. Proportional Response Double yellow lines prohibit stopping at all times and represent the most restrictive parking control available. If the Council's concern relates to peak-time congestion or occasional obstruction, then the proposed measure goes beyond what is required to address those concerns. I am concerned that less restrictive, more balanced alternatives have not been adequately considered, such as: 1. Time-limited parking during off-peak hours 2. Peak-hour restrictions only 3. Three short-stay bays (e.g. 30 minutes) with clear signage. 10-20 minutes would be inadequate for some of the services the Pharmacy provides to its customers, such as Pharmacy First consultations. 4. A restriction aligned with pharmacy opening times (8.30-1pm, 2pm-6.30pm Monday to Friday at present) Having reviewed best practice in highway management I note the following are requirements: 1. The least restrictive effective measure is used 2. The impact on frontages and essential services is fully considered These options would allow the Council to address any safety concerns, if safety improvements are genuinely required, while maintaining safe access for vulnerable

	patients and without removing essential access to the pharmacy. Impact on Services The premises directly affected are a community pharmacy (Downland Pharmacy) providing essential NHS healthcare services to local residents and customers who travel from as far away as Hungerford due to the demise of community pharmacy in West Berkshire. Please see the National Pharmacy Association website: Deprived areas with greatest health needs worst hit by pharmacy closures - NPA National Pharmacy Association Pharmacy Closure Rates & Impacts in the Community West Berkshire has the highest per capita rate of pharmacy closures in the country. Between 2022 and 2024, the number of pharmacies per 100,000 people fell from 12.4 to 9.9. The area has been designated a “pharmacy desert” by the National Pharmacy Association (NPA), with approximately 1 pharmacy for every 7,200 residents, compared to the national average of 1 per 4,600. This is four times fewer pharmacies than in Westminster, the area with the highest provision. The closures mean residents must travel further for medication and advice, which puts significant pressure on the remaining pharmacies and local GP surgeries and helps explain why patients travel from as far as Hungerford to use Downland Pharmacy. Lee Dillon MP, a great champion of community pharmacy, recently visited Downland Pharmacy and has been a great supporter. A significant proportion of customers using Downland Pharmacy are: 1. Elderly 2. Disabled 3. Living with long-term health conditions 4. Collecting urgent or time-critical prescriptions, which include end-of-life medication for those choosing to die at home and medications for the Community Nursing (District Nurse) service. I am deeply concerned that the restrictions proposed to remove the availability of short, close parking immediately outside the pharmacy on East Lane will remove the already limited access to safe and equitable access to essential healthcare services. Creating a clear barrier to healthcare access for vulnerable residents, many of whom are unable to walk significant distances or safely carry medication from alternative parking locations adding to significant health inequalities faced by rural populations. Equality Act 2010 – Public Sector Equality Duty Even where a scheme is promoted on safety grounds, the Council remains subject to the Public Sector Equality Duty under the Equality Act 2010, which stipulates that West Berkshire Council has a duty to have due regard to the impact of its decisions on protected groups, including disabled people and older residents. Removing parking outside a community pharmacy disproportionately affects: 1. Disabled people 2. Older residents 3. Those with mobility limitations or urgent medical needs I formally request the Council to confirm: 1. Whether an Equality Impact Assessment has been carried out for this proposal. 2. Whether it specifically considers the effect of removing parking outside a Community Pharmacy, a essential healthcare service. In summary I submit that: 1. The safety justification for the proposed double yellow lines has not been adequately evidenced. 2. The proposal is not proportional to the stated risk and is punitive in nature. 3. Less restrictive, safety-compliant alternatives have not been explored. 4. The impact to essential healthcare and protected groups has not been adequately addressed and the business affected has not been correctly identified. I therefore request that the proposal to introduce double yellow lines outside Downland Pharmacy, the community pharmacy on East Lane, Chieveley, is reconsidered without delay and alternatives are assessed before the TRO advances. Please ensure this objection is formally recorded and considered as part of the TRO decision-making process. I would welcome the opportunity to engage further or attend any relevant meeting.
3	I write as Senior Partner at The Downland Practice, East Lane, Chieveley, to submit a formal objection to the above Traffic Regulation Order, which the Council has indicated is being promoted on the grounds of addressing road safety concerns. While I fully support proportionate measures that genuinely improve highway safety, I do not believe the removal of parking directly outside Downland Pharmacy meets the test of necessity,

proportionality, or evidence-based decision-making, particularly given the impact on access to essential healthcare. I must also stress that the TRO is fundamentally flawed. The parking on East Lane is not the result of “parking by patients of The Downland Practice Surgery”. The parking on East Lane is a result of parking by customers using Downland Pharmacy, a community Pharmacy. Downland Pharmacy is a separate business to The Downland Practice (the GP surgery). Downland Pharmacy is situated at the front of the healthcare building that also houses The Downland Practice, fronting onto East Lane. The Downland Practice has extensive parking in the rear car park for its patients. In contrast, like most high street community pharmacies, Downland Pharmacy has no ownership or rent of parking spaces and relies on the on street parking on East Lane for its customers. Downland Pharmacy has an informal arrangement with The Downland Practice to use The Downland Practice’s rear car park for the 5-8 medication delivery trucks it receives daily, to avoid those 5-8 daily delivery trucks parking on East Lane. To explain further, it is often poorly understood that many individuals, local private schools and local residential facilities use Downland Pharmacy, primarily for their prescription services, and are not registered patients with The Downland Practice. In addition to NHS prescription services, customers from Berkshire and the surrounding counties drive to and use Downland Pharmacy for NHS covid and flu vaccinations (via NBS the NHS National Booking System), NHS blood pressure checks and NHS Pharmacy First scheme, where patients get treatment from the Pharmacist rather than needing an appointment with their Surgery. The NHS 111 service also directs patients who are not registered with the practice to Downland Pharmacy for all of the above services and more.

1. Safety justification must be supported by evidence Where a TRO is promoted on road safety grounds, it is reasonable to expect that it is supported by:

- Collision or near-miss data
- Recorded obstruction or enforcement issues
- Visibility or junction safety assessments

To my knowledge, there has been no history of personal injury accidents, recurring safety incidents, or substantiated complaints arising from the existing unrestricted parking outside Downland Pharmacy. As Senior Partner of The Downland Practice, I can confirm I am not aware of any complaints or formal representations to The Downland Practice regarding the parking on East Lane. I therefore respectfully request clarification of:

- The specific safety risk the Council is seeking to mitigate at this location
- The evidence or data relied upon to demonstrate that the existing parking presents a demonstrable hazard

2. Lack of evidence demonstrating necessity The existing unrestricted parking has operated for many years without causing:

- Documented safety issues
- Persistent obstruction
- Proven traffic flow problems

I respectfully request that the Council provides:

- Accident or safety data supporting the need for double yellow lines at this location
- Evidence that the current parking arrangement presents a demonstrable risk

Without such evidence, the proposal appears disproportionate, particularly given the severity of its impact on access to healthcare. Parking outside Downland Pharmacy is typically short-stay in nature, with high turnover and minimal dwell time, which materially differs from long-term or obstructive parking scenarios often associated with safety concerns.

3. Double yellow lines are a disproportionate response Double yellow lines prohibit stopping at all times and represent the most restrictive parking control available. If the Council’s concern relates to peak-time congestion or occasional obstruction, then the proposed measure goes beyond what is required to address those concerns. Best practice in highway management requires that:

- The least restrictive effective measure is used
- The impact on frontages and essential services is fully considered

No evidence has been presented to explain why less restrictive alternatives would not adequately address the stated safety concerns. I believe the TRO is fundamentally flawed as it does not acknowledge the correct business affected (Downland Pharmacy not The Downland

Practice), where there will be a significant impact on Downland Pharmacy's frontage and essential services. The impact on Downland Pharmacy's frontage and essential services can not have been considered as Downland Pharmacy customers haven't been correctly identified as the source of the parking in the TRO.

4. Reasonable, safety-compatible alternatives exist Double yellow lines represent the most restrictive option, removing all stopping at all times. I am concerned that less restrictive, more balanced alternatives have not been adequately considered, such as:

- Time-limited parking during off-peak hours
- Peak-hour restrictions only
- Three short-stay bays (e.g. 30 minutes) with clear signage. 10-20 minutes would be inadequate for some of the services the Pharmacy provides to its customers such as Pharmacy First consultations.
- A restriction aligned with pharmacy opening times (8.30-1pm, 2pm-6.30pm Monday to Friday at present)

These options would allow the Council to address any safety concerns, if safety improvements are genuinely required, while maintaining safe access for vulnerable patients and without removing essential access to the pharmacy.

5. Impact on access to an essential healthcare service The premises affected is a community pharmacy, Downland Pharmacy, providing essential NHS healthcare services to local residents and customers who travel from as far away as Hungerford due to the demise of community pharmacy in West Berkshire. Please see the National Pharmacy Association website: Deprived areas with greatest health needs worst hit by pharmacy closures - NPA | National Pharmacy Association

- Closure Rates: West Berkshire has seen the highest rate of pharmacy closures in the country on a per capita basis. Between 2022 and 2024, the number of pharmacies per 100,000 people fell from 12.4 to 9.9.
- Pharmacy Desert: The area has been designated a "pharmacy desert" by the National Pharmacy Association (NPA), with approximately one pharmacy for every 7,200 residents, compared to a national average of one per 4,600. This is four times fewer pharmacies than in Westminster, the area with the highest provision.
- Impact on Residents: The closures mean residents have to travel further for medication and advice, which puts significant pressure on the remaining pharmacies and local GP surgeries and helps explain why patients travel from as far as Hungerford to use Downland Pharmacy. Lee Dillon MP, who is a great champion of community pharmacy, has recently visited Downland Pharmacy and is of great support. A significant proportion of customers using Downland Pharmacy are:
- Elderly
- Disabled
- Living with long-term health conditions
- Collecting urgent or time-critical prescriptions, which includes end of life medication for those choosing to die at home and medications for the Community Nursing (District Nurse) service.

I am deeply concerned that the availability of short, close parking immediately outside the pharmacy on East Lane is essential for safe and equitable access to this essential healthcare service. Removing this parking will create a clear barrier to healthcare access for vulnerable residents, many of whom are unable to walk significant distances or safely carry medication from alternative parking locations. West Berkshire Council will already be aware of the significant work, resource and funding that the council and health and social partners are putting into projects addressing health inequality across the 136,000 residents of West Berkshire. This TRO will inadvertently worsen health inequality.

5. Equality Act 2010 – Public Sector Equality Duty Even where a scheme is promoted on safety grounds, the Council remains subject to the Public Sector Equality Duty under the Equality Act 2010, which stipulates that West Berkshire Council has a duty to have due regard to the impact of its decisions on protected groups, including disabled people and older residents. Removing parking outside a community pharmacy disproportionately affects:

- Disabled people
- Older residents
- Those with mobility limitations or urgent medical needs

I therefore ask the Council to confirm:

- Whether an Equality Impact Assessment has been carried out for this proposal
- Whether it specifically considers the effect of removing parking outside an essential healthcare provider

In my view, the

	proposed measure disproportionately impacts protected groups and risks failing the Council's Public Sector Equality Duty if appropriate mitigation is not provided. In conclusion, I respectfully submit that: • The safety justification for the proposed double yellow lines has not been adequately evidenced. • The proposal is disproportionate to the stated risk. • Less restrictive, safety-compliant alternatives have not been properly explored. • The impact on access to essential healthcare and protected groups has not been sufficiently addressed and the business and thus protected group affected has not been correctly identified. I therefore request that the proposal to introduce double yellow lines outside Downland Pharmacy, the community pharmacy on East Lane, Chieveley is reconsidered, and that access-preserving alternatives are assessed before the TRO proceeds.
4	I am writing as one of the Partners at the Downland Practice. I have considerable concerns about the restrictions that adding yellow lines to East Lane would have on our Practice. Putting these in place would prohibit customers of Downland Pharmacy from being able to park and utilise the community pharmacy, whose doors open onto East Lane. The Pharmacy does not have ownership of any parking spaces within the Practice carpark, which is a separate business. The Pharmacy is a vital community pharmacy for many patients travelling from far afield, and provides valuable services to the community. The addition of yellow lines outside this business would mean that frail patients would not have access to this Pharmacy and the services it provides, plus would risk further strain on the NHS Practice and carpark if this happened. We have not been made aware of any collisions, safety issues or traffic problems, and not encountered these as frequent users of the road. Therefore there is a lack of evidence and necessity to this proposal, as well as concerns that this will cause unnecessary strain on the Practice as the result of taking away the Pharmacy's access.
5	I write to formally object to the proposed installation of double yellow lines outside Downland Pharmacy and Hazeldene, East Lane, Chieveley, as set out in the above Traffic Resolution Order ("TRO"). Incorrect Attribution of Parking Demand: The TRO documentation appears to attribute parking demand on East Lane to patients of The Downland Practice. This assumption is incorrect. The Downland Practice is a separate entity and benefits from a substantial off-street car park located behind the surgery, which is routinely used by its patients. By contrast, Downland Pharmacy has no dedicated parking provision. Patients and service users attending the pharmacy are therefore reliant on short-stay on-street parking along East Lane in order to access essential healthcare services. Wider Catchment and Essential NHS Services A significant proportion of pharmacy users are not registered patients of The Downland Practice and travel from across West Berkshire and beyond. Demand has increased significantly following the closure of four community pharmacies in Newbury, since January 2023. Downland Pharmacy also provides commissioned NHS services including: COVID-19 and influenza vaccinations Pharmacy First consultations Blood pressure monitoring These services inevitably increase footfall and require safe, proximate access. Impact on Vulnerable and Protected Groups The proposed double yellow lines would have a disproportionate and adverse impact on elderly, disabled, clinically vulnerable, and mobility-impaired patients. Many pharmacy users are unable to walk longer distances due to frailty, disability, or illness. Patients frequently attend the pharmacy to collect urgent or time-critical prescriptions, including palliative and end-of-life medication for those choosing to receive care at home. Requiring such patients or their carers to park at a distance would present a significant barrier to access and poses clear risks to patient welfare. Downland Pharmacy performs a critical community function, being the only pharmacy serving an approximate 135 square mile catchment area. Restricting access at this location would therefore have far-reaching consequences. Traffic and Safety Considerations The proposed restriction is unlikely to

	achieve its intended traffic management objectives. Instead, it is likely to: Displace parking to less suitable locations further along East Lane Increase congestion rather than reduce it Create additional safety hazards, particularly given the limited footway provision in parts of East Lane This outcome would be contrary to the stated aims of effective traffic management and road safety. Failure to Properly Consider Equality Impacts West Berkshire Council is subject to the Public Sector Equality Duty (Section 149, Equality Act 2010), which requires the Council, in exercising its functions, to have due regard to the need to: Eliminate discrimination Advance equality of opportunity for protected groups Foster good relations Elderly and disabled persons are protected groups under the Act. The introduction of double yellow lines at this location would materially disadvantage these groups by restricting access to essential healthcare. Unless a robust Equality Impact Assessment has been undertaken and properly evidenced, the proposed TRO risks being inconsistent with the Council's statutory obligations. Request for Reconsideration and Alternative Measures Given the above, I respectfully request that West Berkshire Council reconsider the proposed double yellow lines outside Downland Pharmacy. A more proportionate and balanced solution would include: Time-limited short-stay parking Designated pharmacy/patient parking bays Limited operational hours for restrictions Such measures would address traffic concerns while preserving safe and equitable access to essential healthcare services. I trust the Council will give appropriate weight to patient safety, accessibility, and its statutory equality duties when determining this matter.
6	I object to this proposal as a partner at the Downland Practice. The Downland Pharmacy is an invaluable asset to the community, extending beyond just the village of Chieveley and the parking on East Lane is a result of parking by customers using Downland Pharmacy. Some of these customers may have a disability, be elderly, have long term health conditions or may be collecting urgent prescriptions. The availability of short, close parking immediately outside the pharmacy on East Lane is essential for safe and equitable access to this essential healthcare service. Removing this parking will create a clear barrier to healthcare access for vulnerable residents, many of whom are unable to walk significant distances or safely carry medication from alternative parking locations. I am not aware of any previous safety concerns or accidents in the area related to parking. I also feel that the measure of complete restriction has not been fully considered and is disproportionate. I strongly feel that this proposal needs to be reconsidered and other options for safe parking be considered [Name removed] (Partner Downland Practice)
7	I am objecting to the removal of the Downland Pharmacy parking at East Lane. I do not believe the removal of parking directly outside Downland Pharmacy meets the test of necessity, proportionality, or evidence-based decision-making, particularly given the impact on access to essential healthcare. I must also stress that the TRO is fundamentally flawed. The parking on East Lane is not the result of "parking by patients of The Downland Practice Surgery". The parking on East Lane is a result of parking by customers using Downland Pharmacy, a community Pharmacy which has no ownership or rent of parking spaces and relies on the on street parking on East Lane for its customers. In order for continued thriving of local businesses and community pharmacies in particular, parking for its customers is essential and also avoids taking up spaces within the carpark of The Downland Practice which is for patients of the practice and not customers of the pharmacy. Allowing no waiting at any time will drive cars to park further from the pharmacy and towards the bend which will become a bigger hazard.
8	1. Introduction I submit this objection in response to the proposed introduction of No Waiting At Any Time restrictions in the vicinity of The Downland Practice Surgery, which the Council states are intended to address road safety concerns arising from

	obstructive parking. While I acknowledge the Council's statutory powers under the Road Traffic Regulation Act 1984 and the Traffic Management Act 2004, I respectfully submit that the proposed restriction, as drafted, fails to satisfy the requirements of proportionality, reasonableness, and equality of access required under UK public law. 2. Mischaracterisation of Parking Demand The consultation justification asserts that parking demand arises from patients attending The Downland Practice Surgery. This is materially inaccurate. The surgery itself benefits from a large, dedicated off-street car park which provides sufficient access for surgery users. The on-street parking activity in question relates predominantly to access to the adjacent pharmacy, which is a separate healthcare service serving both registered and unregistered patients. There is no shared or alternative off-street parking provision available for pharmacy users. 3. Importance of the Pharmacy as an Essential Local Service The pharmacy has become a critical local healthcare hub following the closure of multiple nearby pharmacies, including Lloyds (Sainsbury's), Boots (Thatcham), and Superdrug (Newbury). As a result, a larger and more vulnerable population now relies on this single location for access to prescriptions and healthcare advice. Many users are elderly, infirm, or have limited mobility. Access to medication is not discretionary; it is an essential service. 4. Equality Act 2010 – Public Sector Equality Duty Under section 149 of the Equality Act 2010, the Council must have due regard to the need to eliminate discrimination, advance equality of opportunity, and remove disadvantages suffered by disabled persons. A blanket No Waiting At Any Time restriction would disproportionately disadvantage elderly and mobility-impaired individuals, particularly where pavements are limited or absent. 5. Proportionality and Reasonableness It is a well-established principle of public law that statutory powers must be exercised proportionately. Double yellow lines represent the most restrictive form of parking control. Less restrictive alternatives, such as short-stay parking or time-limited waiting, have not been adequately considered. 6. Conclusion For the reasons set out above, I object to the proposed TRO amendment and request that the Council reconsider the restriction, giving proper weight to equality impacts and less restrictive alternatives.
9	Users of the Downland pharmacy include those with disability. Restricting parking outside the pharmacy discriminates against users who are not able to park and walk. The pharmacy is used by members of the public from the whole Newbury area, not just the practice catchment. This is due to multiple pharmacy closures in Newbury, with increased footfall at the Downland pharmacy as a result. This is a separate service to that of the Downland Practice GP surgery. The pharmacy is now relied upon for medications for children and young adults with learning disability in Priors Court School. Close parking is essential.
10	On street parking at this location is due to the Downlands Surgery carpark having insufficient capacity to cope with the number of patients and those collecting prescriptions, even though it was recently extended. For those of us who attend from neighbouring villages such as Hermitage, walking or public transport are not viable options. If this proposal is enacted then suitable and sufficient alternative parking provision must be made nearby, and clearly signed before on street parking is prohibited. Removing the on street parking will not address the cause of the problem. People still need to attend the surgery and so sufficient parking must be provided. Without this, people will likely park on the road away from the restrictions.
11	There is insufficient parking at The Downland Surgery to support those using the surgery alongside those using the pharmacy for a short period of time. The only option is to park on the road which is wide enough between the Downland car park entrance and Hazeldene to allow other vehicles to pass through. Restrictions will limit those who have to drive to Chieveley to collect prescriptions, and those with poor mobility, being able to access the pharmacy at times when the car park is full. There is also a proposal

	to submit a planning application for houses in East Lane, which is of very high density for the area. It is likely that this parking restriction is preliminary to supporting a forthcoming planning application.
12	Prevention of parking in this area, notably the widest part of this particular section, will encourage parking in narrower sections. The pharmacy and surgery are some of the most valuable community resources and removal of parking will place further pressure on an already constrained car park. It should also be noted that the surgery kindly hosts the Downland Volunteers bus. As a frequent traveller along that road for decades, I have yet to witness any issue that could give any justification to such an order.
13	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
14	Parking is a contentious issue but it's seems as though the council are trying to make life more difficult for motorists.
15	Object to the restrictions on parking. No additional comment provided (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	I support the proposal subject to there always being sufficient space in the downlands practice car park for patients visiting the pharmacy. I support it (with the above proviso) because cars parked on that section of east lane do cause a traffic hazard. There is a bend in the road which makes it impossible to see if something is coming the other way when you're overtaking the parked cars.
2	Traffic as a result of parked vehicles in this position is dangerous. Vehicles are parked here throughout the day due to use of the GP surgery and Pharmacy. So impact is constant.
3	I understand why people are frustrated by inconsiderate parking at the surgery. Maybe more parking could be provided to avoid this
4	We welcome the restrictions to improve safety and visibility for walking & cycling
5	(No other comment provided)

	CHIEVELEY - Hazeldene (Plan AN46)
	I OBJECT TO THE PROPOSAL
1	There is insufficient parking at The Downland Surgery to support those using the surgery alongside those using the pharmacy for a short period of time. The only option is to park on the road which is wide enough between the Downland car park entrance and Hazeldene to allow other vehicles to pass through. There is also a good footpath between the Hazeldene junction and the surgery entrance. Restrictions will limit those who have to drive to Chieveley to collect prescriptions, and those with poor mobility, being able to access the pharmacy at times when the car park is full. There is also a proposal to submit a planning application for houses in East Lane, which is of very high density for the area. It is likely that this parking restriction is preliminary to supporting a forthcoming planning application.
2	Again for all of the reasons listed above, extending the double yellow lines along to Hazeldene would further reduce access to healthcare as detailed above.
3	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically

4	No additional comment provided (Note: Objections with no supporting reasons for objection can be discounted)
5	No additional comment provided (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	Blocking the junction with parked cars is dangerous for other motorists and for pedestrians
2	This area should extend up to the suggested yellow lining at the GP surgery entrance or people will just park between the two parking restriction areas.
3	We welcome the restrictions to improve safety and visibility for walking & cycling
4	No additional comment provided

	GREENHAM - Hambridge Lane (Plans AP75 & AQ75)
	I OBJECT TO THE PROPOSAL
1	Please don't enforce any more parking restrictions. We need to get people out and shopping locally. Putting obstacles in the way for motorists will affect this.
2	There is already limited parking. This will make it even worse Why keep making life more difficult for users ?
3	No additional comment provided (Note: Objections with no supporting reasons for objection can be discounted)
4	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk& pollution. All roads outside and around schools should be 20mph automatically
	I SUPPORT THE PROPOSAL
1	We welcome the restrictions near to the junction to improve safety and visibility for walking & cycling
	I WISH TO RECORD A NEUTRAL POSITION
1	Parking on a junction has been reported to you due to many near miss accidents nothing ever was done. Most of the houses in greenham along the main nightingales don't have parking, bring home work vehicles and use my road to store them. They are all sat at the end of a junction at the bottom of a hill you can't see up or down, the amount of almost accidents is ridiculous. A neighbour reported this to you and you didn't want to know then so why now? You also can't see people when crossing if crossing between the vehicles parked. Greenham has become very over populated with vehicles as most homes now own more than 2 cars. I can't even park along my road due to the amount of cars my neighbours now own, thr carpark over the road is now used for people off the main nightgales road to store their holiday homes,and at

	times work vehicles. People who do have drives don't use them instead park on the side of the road.

	HUNGERFORD - Charnham Park (Plan L66 & L67)
	I OBJECT TO THE PROPOSALS
1	May i record that the proposal is a much welcomed start. Grasping of the nettle is now required to firm up the proposal, with a once and for all plan - "Right First Time" with a tweak to the plans proposed of simply North and South in its entirety of Charnham Park double yellow lines no waiting - no stopping clear way for any vehicles at any time of day or night 24/7 . Restricting the zone to no parking for HGV 6pm to 6 am has little benefit to relieve the daytime hazards which is a far greater problem. speed 80/90 mph is an attraction of this road with weaving in and out of parked cars Parked cars at any point along this stretch reduce to a single line - traffic flow north and south which is a destination of overnighted HGV's quite correctly servicing the industrial merchants. Speed restriction is required at 20 mph to appreciate this Charnham Park conservation area. My attention is drawn to the planning permission granted for the New Wetlands Conservation visitor centre. PP now granted will commence shortly with an expectation of 2 years to construct a visitor centre, extensive car parking, equipment to manage the wetland reinstatement. Upwards of 20,000 visitors per year, potentially with matching vehicle numbers of 1,666 per month. The site plan is unclear - it appears the site entrance / public entrance will be directly opposite an already dangerous - daily hazard of Kennet Way. Daily - Charnham Park now open over 20 years suffers from rat run traffic from Chilton Foliat to the A4 bypassing the town. The speed of vehicles can be as much as 80/90 mph with north and south drivers playing cat and mouse as to who gives way as Charnham Park is now a single lane road with the excessive nose to tail FREE parking, 24/7 North Bound. Current North Side restrictions from roundabout : yellow lines are abused with drivers of all types of cars/HGV's and unloading car transporters for BMW and Mini on this North Side creating havoc for drivers coming off the roundabout at speed overtaking these parked vehicles (that the drivers quite frankly believe with full road rage are in their way) hurtling past the junction of Kennet Way - meeting head on with residents of over 200 vehicles daily trying to safely exit Kennet Way usually turning right. Visibility for Kennet Way / Meadowview joining Charnham Park is extremely dangerous now with the speed, faded lines, sheer volume of traffic with visibility restricted both North and South . To exit Kennet Way drivers have to be in the middle of the road at the centre white line to see far enough to the left to pull out. Visibility to the right is a combination of being hemmed in at Kennet Way by traffic queuing southbound to the roundabout as far back as the bus stop with traffic queuing north bound as it cannot pass the parked cars and / or a vehicle is parked on the double yellow lines northbound having exited the roundabout which traffic is trying to queue around this whilst hemming in vehicles at Kennet Way. Visibility is further disadvantaged by weather conditions, speeding in the wet, the fog and mist from the river means drivers with no lights cannot be seen north or south. The road is subject to ice Aggression A female resident, local teacher in the high winds and heavy rain last week was forced to exit her car in the middle of road trying to exit Kennet Way to approach a male driver parked north bound on the double yellow lines close to the junction of KWay to bang on the window to ask him to move as she simply couldn't see. She was most distressed Residents feel enough is enough and many feel the only way it to move, myself included. Enforcement - Patrols to enforce required immediately and ramped up when construction work starts Safety - As above Whilst charging for parking

	raises funds and deters from parking, having now been made aware of the visitor centre build, access and conservation requirements there is only one solution for no parking in its entirety north - to south Kennet Way Residential Road. Please increase the no parking at any time double yellow lines into Kennet Way, continuing right the way from Charnham Park, across the front of the house 51 etc...to the Meadowview Entrance. On kerb pathway parking is a problem day and night, narrowing the entrances to Foundry house, Meadowview where parking on both sides of the road on the kerb corners especially close to the Thames Water Gates is so jam packed an emergency vehicle would not pass though. It's unfortunate the neighbour parks on the road opposite the Thames Water Gates is Gates so this restricts pulling out of Meadowview into Kennet Way with the vehicles parked on the kerb on your left. A road sign is required at the start of Kennet Way - to state "On road Car Parking is for Kennet Way residents only) This will be needed as of course we would be subjected to contractors for the new site looking to park whilst they create a site entrance initially The Highways will need to ensure mud on the site, stays on the site and is not transferred onto the Charnham Park Road Thank you for reading my comments.
2	Need to be able to park on road due to limited car parking at meadowview flats.
3	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk& pollution. All roads outside and around schools should be 20mph automatically
4	No additional comment provided (Note: Objections with no supporting reasons for objection can be discounted)
I SUPPORT THE PROPOSALS	
1	It is always difficult driving down this road when there are cars and lorries parked all the way down. Because of the bend it is difficult to see what is coming the other way sometimes.
2	The sites in question directly affect me as I live and work here. Each one should be restricted/prohibited for the reasons quoted, mostly obstructing the carriageway, or junction visibility. With traffic increasing in the town, more cars on the roads generally and associated parking problems on the rise, measures are needed to prevent a "free for all" and irresponsible parking. Can only be a good thing.
3	We welcome the parking restrictions to improve safety and visibility for walking & cycling & to address environmental concerns of overnight parking
4	Need to stop lorries parking blocking visibility and littering (Hungerford Town Council)
5	Road safety and environmental improvement
I WISH TO RECORD A NEUTRAL POSITION

1	Difficult to see the situation as it is in the corner of the map and the map doesn't even show the full extent of the area proposed.
2	No additional comment provided
3	No additional comment provided

	HUNGERFORD – High Street (Plan L68)
	I OBJECT TO THE PROPOSAL
1	This loading bay is valuable for visitors to the northern end of town. It should not be reserved for goods vehicles only.
2	I think that in principle this bay should be mainly for goods vehicles, but perhaps cars could be limited to a 2 minute stop as it is used very often for people stopping to just post a letter on their way through the town. There is nowhere else nearby to be able to do this.
3	• Loading Bays (High Street Hungerford, Bartholomew Street Newbury): The introduction or extension of loading-only restrictions may increase short-term stopping and starting traffic. We recommend monitoring these areas to ensure they do not create pinch points or hazards for cyclists and other vulnerable road users.
4	It's difficult enough to park in Hungerford. Don't make it harder.
5	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
6	It will be ignored
7	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL

	HUNGERFORD - Salisbury Row (A338) (Plan L70)
	I OBJECT TO THE PROPOSAL
1	It's fine as it is.
2	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
3	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	I'm very keen for this to be implemented as I curse every time I drive past to have to pull out around the one car that is always parked there. I think it is made worse by the fact that it is just after the mini roundabout so coming off the roundabout driving on the extreme left. I assume it is outside their house and the spaces further along are used by the residents outside their houses, but it always feels like an obstruction because it is not a small car either.
2	Needed because of safety and visibility concerns (Hungerford Town Council)
3	You will not have to pull over as you go up Salisbury road.
4	There are always cars parked half in the road and obstructing the highway. Extension of the double yellows will prevent this.
5	Supportive of any restrictions in Hungerford, Theale, Purley, and Tilehurst that protect sightlines, reducing collision risks for cyclists. These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
	I WISH TO RECORD A NEUTRAL POSITION

2	No additional comment provided

	HUNGERFORD – Fairfield Close (Plan L70)
	I OBJECT TO THE PROPOSAL
1	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
2	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	we support this change as it will make it safer for the school.
2	Needed because of safety and visibility concerns (Hungerford Town Council)
	I WISH TO RECORD A NEUTRAL POSITION

1	I can't say I have noticed any problems on this junction when walking past, even when it is school time, but I think ensuring that there is no parking at the top where people are trying to cross is no bad thing.
2	No additional comment provided
3	No additional comment provided
4	No additional comment provided
5	No additional comment provided

	HUNGERFORD – Tarrant's Hill (Plan L70)
	I OBJECT TO THE PROPOSAL
1	I would like to raise my objections proposed changes to the parking restrictions on Tarrant's Hill. Firstly the road narrows to only allow one vehicle to pass even without vehicles there. The parking of vehicles on the lower part of Tarrant's Hill serve to slow traffic before the footpath at the bottom of Tarrant's Hill. Without vehicles parked on the hill vehicles travel at higher speeds and pull into the entrance to the footpath to pass each other. The proposed changes are detrimental to road safety and I would like to request a reply to address my concerns on this matter. My second issue is to do with the where you propose all the cars, currently using the stated areas to park, are going to be relocated too?
2	This will have a significant impact on parking for residents of Orchard Park Close who already have very limited parking options on both Orchard Park Close and the layby on Tarrant's Hill. The parking options are already too limited with us often having to search several roads away from our house for parking. If these restrictions are put into place, parking will become even more limited.
3	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
4	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	I support all the proposals but feel that pressure on spaces on the lay-by on Tarrant's Hill will increase. It needs to be re-surfaced as it is lethal when dark, and then bay lines drawn like the lay-by at the top of the High St, to discourage drivers from uneconomical parking. If there is a 2-car gap they will park in the middle of the gap. Also, too many people double-park vans and cars on the road against the lay-by making it difficult for the residents opposite to get in and out of their drives. Can there be double yellow lines on the road on the side of the layby to stop this anti-social practice.
2	We support this change to make the road safer and also to stop cars parking opposite the junction at the bottom of Tarrant's Hill one way system, so Lorries and also ambulances/fire engines can get round.
3	Overloaded with parked cars, sometimes double parked and blocking the road.
4	Needed because of safety and visibility concerns (Hungerford Town Council)
5	Supportive of any restrictions in Hungerford, Theale, Purley, and Tilehurst that protect sightlines, reducing collision risks for cyclists. These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.

NEWBURY - Andover Road (A343) (Plan AL77 & AL78)	
I OBJECT TO THE PROPOSAL	
1	There are many reasons for my (and many people's) objection to these plans, which I'll list below: Firstly, the designated parking bay that is there currently is fundamentally not big enough. It is almost always full - mornings, afternoons and evenings. The vast majority of these cars are not owned by people who live along Andover Road - commuters, tradespeople, weekenders and people living in and visiting Carnarvon Court also fill this bay. I do not use it because, quite simply, I literally can't. I can't because it is always full. If it's full now, how is this going to work out when roadside parking is banned completely, and everyone in this entire area is vying for one single tiny bay? If these proposals go ahead, I fully expect there to be guaranteed, free permit parking for residents of 16-34 Andover Road. It must be free because otherwise the

council will literally be taking away the roadside parking that was guaranteed when we bought the house 28 years ago, and selling us back the right to park near our own house. This would be pure profiteering, and if the council can afford to scrap the non-blue badge parking spaces that were raking in revenue in Newbury Wharf car park for the sake of an unfinished garden that cost £800,000, then that says to me that it can do without profiteering from bay parking that is currently free. Anything less is simply financial mismanagement. If there is a cost for residents' permit parking, it will only confirm that this is a purely political choice. It seems apparent that Newbury town council chooses where they put their policies into place completely without thought as to the day-to-day lives and non-negotiable needs of Newbury locals. We have the right to a choice over where our cars go, a right that came with the house when it was bought, with parking perfectly allowed. The changes to parking in the last few years, along with those proposed, deliberately target residents of houses without driveways and will devalue houses along this stretch. One of the points that is forever being touted is that the road will be safer for cyclists following the implementation of these changes. But I seldom, if ever, see cyclists along this stretch - I might see a handful a week, and I have never heard of someone being injured. Meanwhile, my 6 year old nephew and the toddlers next door will all be forced to cross roads to make it to their houses, when they could simply be taken out of the car in front of the house. This is even before we take into account damage that could be done to our vehicles - currently, we have a camera system in place that has a view of the front of our house, including our cars. That view does not extend to the bay, which is out of view of our house, and so our vehicles will have less security. Then there's the fact that, by removing parking and suggesting only a select number of permit parking spots, everyone along Andover Road is essentially being denied visitors. Unless guest permits/visitor parking is also arranged, these proposed changes will impose isolation on those living along Andover Road, as there will be literally no way for them to park, not with the bay opposite constantly full all day, every day, even before these changes are pushed through. Many of the people who occupy this stretch are older people who rely on visitors, not to mention newcomers to the street and young families who lead busy lives, with lots of family members visiting to provide childcare. How does this work when people visiting in person cannot park? It seems clear to me that these proposals are designed to force long-term Newbury locals out of the area, by making it impossible for them to live where they have made their homes. It's also clear to me that there are ulterior motives at hand, and that this follows a long and sustained campaign of disregard for actual residents of the road who have been quietly living their lives, paying their council tax, for decades. This disregard was demonstrated most traumatically when my dad received a parking ticket on his car following the first round of changes to the road, one that he could not pay because he had passed away, although it seems the council doesn't care how they make their cash grabs. These ulterior motives stem from the fact that the proposed changes only appear to serve one small demographic, and are being championed by that same demographic - cyclists - which is nothing even remotely resembling the demographic that is due to be impacted most by these proposed changes - the people actually living along Andover Road, not the handful of people at best that cycle down it each week. I can clearly see that these proposals are driven directly by personal interest rather than actual needs, given that the council is chaired by none other than Tony Vickers, an avid cyclist with a long and well-documented involvement with cycling organisations, e.g., Spokes. Can he say, in absolute truth, that his own interests in cycling have 100% nothing at all to do with the proposals? It appears that Newbury is under a council led by personal whims rather than the 'forward together' approach he spoke of when he was elected. Should the proposed changes go through, they will be absolute, concrete proof of self-serving, self-interested policy-making, and I know this to be true because I

	know how deeply they were opposed the first time around, as evidenced here - https://www.newburytoday.co.uk/news/will-it-devalue-our-house-price-9266873/. These ideas are plainly designed to quite literally force drivers to give up their cars as part of an irrational and ongoing vendetta against car owners - but here's the thing: if these proposals are passed, the people along Andover Road can't just give up their cars. Our livelihoods depend on getting to and from our jobs, and those jobs aren't scheduled according to public transport timetables. Even if they were, there's the cost of public transport, which, for many people, is quite simply unaffordable. All these proposed changes will do is create an insane demand for an insanely small number of spaces. A single bay is not enough to service an entire street of houses, let alone the residents of Carnarvon Court, who often park in it. It's simply not possible. The fact that there has already been significant objection to parking changes along this road, which has clearly been completely ignored, makes me surmise that we are being strategically victimised because we are not cyclists, unlike those forcing these policies upon people with young families, older relatives, jobs, hobbies and busy lives with places to go, things to do and a non-negotiable need for parking that doesn't stop being a need simply because Tony Vickers wants that to be the case.
2	It will make it very difficult for me to visit my family - parking spaces will be even harder to get and there will be even more competition for them, so it will limit me being able to spend time in my hometown.
3	North Bay does not offer enough parking to replace current demand (north+south combined). The 2 hour limit in day and no limit 6pm-8am on this North bay will still be used by non-residents (both day and night) due to it's close proximity to town centre attractions, making it difficult for residents to access any parking on a dependable basis. No alternative parking in nearby roads due to local school restrictions and other permit areas/parking restrictions. Further consideration should be made. Thank you for your time.
4	The properties were built and purchased before any of the cycle lanes were put down on the side of the road and those that have no parking will have to cross a very busy road with children and bags. The suggested parking spots are in an unsecured and none monitored place and when a car had been left in that spot before it had it's catalyst converter removed and stolen. There is plenty of space on the other side where a double cycle lane could easily be placed
5	I live on Andover Road at number [removed]. We do not have ample driveway space, added to which the council has not dropped the curb outside our house. The driveway is narrow and due to the curb, virtually inaccessible. We have a baby and a toddler and would not have the space to open the doors to get them in and out. While I appreciate that the lay-by may become permit only, it is still a long way from our door and when trying to corral a 2 year old, carry a baby and any shopping, it will be difficult at best and dangerous at worst. We are currently a one car family but due to my husband's work will soon go up to two. We would need at the very least to have the curb dropped AND a permit for the lay-by. It would still be unworkable and we would be obliged to knock down the wall outside our house in order to make our car accessible for getting in and out of. I would propose instead that the road is permit only, thereby avoiding people parking to walk into town, or parking for school pick ups
6	My families home will be affected by the parking ban. The house has no driveway or alternative parking available. The layby opposite is always full and therefore unusable. This cause issues for me as I have a young child and older parent with mobility issues that rely on parking close to the house for their safety.
7	The parking in the lay-by if used for visitors of the 15 flats next to it. By taking this parking away, it means there is no additional parking for residents who own more than one car and no visitor spaces for anyone in the flats. By taking this away there is no

	space for work vehicles to park when work is being carried out in the flats (such as British Gas, Sovereign, etc) the car park for the flats allows one space per flat, some of us have to have two cars for working couples, and no visitors spaces provided. There is no where else close that is suitable to park as i have two young children and getting rid of a vehicle is not possible as i am disabled so need the second car.
8	When you built the cycle lane, the proposal was to introduce a semicircular bus stop and parking for residents in part of the gardens directly opposite our house, and that you would extend the layby and make the parking there residents' only. These two things never happened, and you impacted the value of our property (which did not at the time have any off road parking). We have two young children, and when you implement these changes, their extended family will have to park miles away in order to visit them.
9	There is a need to park here and restrictions could not only be dangerous as people will park in other places instead
10	We have permit parking in Gloucester Rd. Which has been reinstated after resurfacing. The council clearly did not take account of the width of cars growing on average 1cm / year which has meant that marked parking spaces block access to the highway from roads. Any new plans need to be redrawn to take account of this or there will be damage to vehicles and possible injuries.
11	I have only reviewed the Newbury changes as I do not know the other areas well, but I feel my comments apply for all. I find it hard to come to a decision because I feel I have not been given all the information I need to make an informed decision and the only reason you give is a blanket statement of "help manage traffic on our network, improve road safety and support wider transport objectives from any revenue raised.". It just gives me the impression this is some sort of "box ticking" exercise rather than a meaningful attempt at review and consultation? To get a better understanding of why these changes are being done and what they mean I would firstly expect you would fully indicate what the current status of street parking in the area is. Although the plans indicate boxed areas with different colours and shadings, there is no key or labels to explain what the different areas are. Secondly, even with the clear indications mentioned above, I would expect to know a more specific reason for each new proposal. Has the current state of affairs led to numerous complaints and reports? Is it purely to try and boost Council revenue? Is this part of some sort of council drive against motorists in general?
12	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
13	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
14	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	We welcome the parking restrictions to improve safety for cycling. The cycle lane is pointless without the parking restrictions - this is a major arterial route for residents to access the station, school and town centre. Almost all these properties have off-street parking. It is more important and aligns with West Berkshire Council's active travel policy to reallocate the roadspace to protected space for cycling, not parking.[West Berkshire Spokes.org]
2	I support the moves to remove parked cars from the dashed cycle lanes along the north side of Andover Road leading to St Johns Roundabout. Cars parked there during rush hours makes cycle travel very unsafe, especially as temp parking for delivery

	vans. for too long residents have used the sidewalk parking as an option rather than using their own private allocated parking spaces .
3	The prevention of car parking across the north side Andover road is essential for safe cycling. Currently cars park on the cycle lane. This forces cyclists travelling down Andover Road to st John roundabout who are using the cycle lane to deviate into the main traffic whilst travelling at speed. Sometimes on multiple occasion to cycle around cars parked across the cycle lane. This manoeuvre is dangerous and is not what cars travelling in the same direction are expecting. It is only a matter of time before this results in a serious accident. I support the proposal to prevent cars parking in the cycle lan
4	This is a significantly busy area, especially at school times. With cars currently parking over the pavement and cycle lane it forces cyclists heading towards St Johns roundabout off the cycle lane into the main carriageway. My experience of cycling this is the cyclist has to move into the path of the traffic when its expected you'll to remain on the cycle lane.
5	The proposals would prevent vehicles from parking in the existing cycle lane on the north side of Andover Road. Parked cars associated with the adjacent properties regularly obstruct the cycle lane, forcing cyclists out into the path of approaching traffic, which represents a significant threat to cyclists' safety. I cycle this route regularly and have had near misses on a number of occasions, where drivers do not anticipate that I would need to pull out to go round parked cars. This is a key route that connects the residential area of Wash Common to the town centre. It also links St Bartholomew's School to the town centre. As a key cycling corridor, this should have the highest level of provision. Waiting restrictions to keep vehicles out of the cycle lane would be a good start, but should be seen as the bare minimum. Physically segregated facilities should be provided where possible. It is likely that there will be objections to this proposal from property owners, but I would stress that they do not have any right to park on the road outside their property and the safety of vulnerable road users should come first. It is good to see that parking has been made available on the other side of the road. Priority for parking permits should be given to residents of those properties directly affected by this scheme.
6	I understand the purpose of the review and consultation but this really is common sense why have a cycling lane if it is just blocked by cars. - Improves safety for cycles - maintains a continuous, predictable cycling lane - reduces traffic congestion - supports active traffic goals - improves visibility and clarity for drivers - enables enforcement by authorities - reduced damage to infrastructure - encourage greener modes of transport - supports emergency vehicle movement - reduces door opening risks - improves driver behaviour and road etiquette - protects investment in cycling infrastructure - reduces noise and pollution - increases public confidence in cycling - enhances accessibility for vulnerable road users In addition, the council should exercise their authority to implement a 20mph zone on Andover Road with speed bumps due to its proximity to the town centre, a school, and it is an area with high pedestrian / cycling activity. The residential properties on Andover road potentially impacted are numbers 16,18,20,22,24,26,28,30,30a,32,34, of these eleven properties numbers 20,22,24,26,30,30a,32,24 all have off street parking. Therefore only 3 properties (16/18/28) can begin to attempt a valid objection, but they will be provided a sufficient residential parking area. Which will also increase the income for a debt stricken council. However, diplomatic this process is attempting to be the answer is clear. It just highlights the cost and waste of this review is.
7	I am writing to express my strong support for the implementation of yellow lines in the cycling lanes near St Barts school to prevent vehicles from parking in designated bike bays. As a mobility scooter user, I find it increasingly difficult and unsafe to navigate

	through areas where vehicles park in cycling lanes, particularly near schools, where the flow of both foot and bike traffic is high. The obstruction of cycling lanes by parked vehicles directly impacts my ability to move safely along the street. When vehicles block the bike lanes and the curb, poses a significant risk to my safety due to creating a narrow passage and the presence of pedestrians and bicycles. This is not just an inconvenience—it is a daily challenge that heightens my fear of accidents or collisions. Cycling lanes are essential for both cyclists and pedestrians to move safely and efficiently, but when those lanes are obstructed by parked vehicles, it causes dangerous situations for everyone. Cyclists, who are already struggling with limited space on the road, are pushed onto the curb to avoid collisions with parked cars. This forces them directly into pedestrian paths, which not only puts cyclists at risk of falling but also endangers pedestrians, especially those with limited mobility or children. I believe that the introduction of yellow lines to clearly mark no-parking zones in the cycling lanes would greatly enhance safety for everyone involved—drivers, cyclists, and pedestrians. It would allow all road users to have clear, unobstructed pathways, making it easier for me and others with mobility challenges to travel without fear of collision or further risk to our safety. Please consider taking action to implement this simple but effective solution for the benefit of all road users, and to foster a safer and more accessible environment for the community. Thank you for your time and consideration.
8	Comments via WDM - E47074 “I am writing to raise an urgent concern regarding the frequent and dangerous issue of cars parking in the designated bicycle lane along Andover Road, which is a main route used by school children. This ongoing problem not only puts adult cyclists at risk but also endangers the safety of young students who rely on this lane to safely travel to and from school. The bicycle lane is regularly obstructed by parked cars, forcing cyclists, including children, to swerve into moving traffic. This creates a serious hazard, particularly during peak school hours when there are large numbers of children on bicycles. The lack of clear yellow line markings or visible signage further exacerbates the issue, as drivers are often unaware that they are blocking a vital cycling route. As a community that is working to promote cycling and reduce traffic congestion, it is crucial that we provide safe, unobstructed bike lanes, especially on routes that are heavily used by school children. The absence of proper road markings and enforcement sends the wrong message and contradicts our efforts to encourage active travel and improve public safety. I urge the council to take immediate action to address this issue. This could include adding clear yellow line markings, improving signage, and increasing enforcement to ensure the bike lane remains safe and accessible for all cyclists, particularly school children. Thank you for your attention to this important matter. I look forward to seeing improvements that will better protect the safety of young cyclists and encourage more children to bike to school in a safe and supportive environment.”
9	This is the most important change WBC could make and I hope it goes through. The curb and cycle path are not currently safe for children (but also adults). Cars go flying down this road (despite the 30 speed limit) and because of cars/vans parked on the curb they have to go on the road to cycle or walk to school.
10	I support the proposal to add yellow lines in the bike lane because it creates a clearer, more enforceable boundary that keeps cars from parking where cyclists need safe, unobstructed space. When vehicles block bike lanes—even briefly—they force cyclists into traffic, increasing the risk of collisions and slowing down everyone on the road. Clear yellow lines make it obvious that the area is reserved for bikes, help enforcement officers issue penalties when needed, and remind drivers to respect shared road infrastructure. Overall, this simple measure can significantly improve safety,

	predictability, and comfort for cyclists while supporting a more efficient and considerate transportation environment.
11	I have read the plan and feel that further information could be provided. Originally, the lay-by had restricted times during the daytime which worked very well. When the lay-by was extended, the restrictions were removed, the lay-by has become a car park, and is full for most of the time, all day and every day, mainly due to so many roads in South Newbury now having charges for parking. Indeed, some cars are now in the lay-by people daily parking in the lay-by all day whilst the drivers go into town to work. There is one lady who parks there who, on getting out of her car, opens her boot and takes out a fold up bicycle, and rides into town, so her car is there all day. The current situation is that casual visitors to the post office and Thurlow Grange have nowhere to park for the short times that they need. Your description of the changes includes permits to be given to those on the north side of Andover road who currently block the cycle lane. These permits are to have no restrictions on parking in the lay-by, thus continuing its use as a car park, rather than for its purpose when it was first built. The plan gives no idea as to the number of permits to be issued, or whether access to the lay-by without restriction will be monitored. Perhaps the lay-by could be further extended a little past the bus stop, for the non-restricted cars with permits, leaving the rest of the lay-by having a 2 hour waiting restriction from 8am to 6pm. This will allow short time visitors to park legally. More information about the plans would be appreciated. I would hope that you would ensure that the plan takes account of everyone's needs rather than just giving precedence to on small group of drivers who, it seems, would be given that precedence for 24 hour parking. Having said that, I agree that the cycle lane referred to must be left clear of traffic at all times., and that no waiting signs and double yellow lines are placed on the section of the road affected
12	I also support this change because my child uses the bike path every day to travel to and from school, and their safety is my top priority. When cars park in the lane, it forces them to swerve into the main road, which is especially dangerous for young, less experienced cyclists. Clear yellow lines would help ensure that the path stays open and predictable, giving my child—and all children who cycle—a safer, more consistent route. Knowing the lane is protected offers parents greater peace of mind and encourages more families to choose cycling as a healthy, environmentally friendly way to get to school.
13	Supportive of Removal of unrestricted parking and introduction of No Waiting At Any Time restrictions to prevent obstruction of the cycle lane as These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
14	Current arrangements force cyclists into main carriageway. I have had several near misses due to drivers not paying attention and pinching me against parked cars
15	I fully support the proposal, Cyclist tend to use the pavement instead of the current cycle path and when vehicles are parked on the pavement and across the cycle path it is dangerous for both cyclists and pedestrians. Speed limit signs should also be considered or some form of traffic calming especially between St Johns Post office and the Speed cameras.
16	Also in addition, to avoid parking congestion on residential streets, can we make parking on the street only for those with permits (live there) as we often get out of town folk parking and blocking those spaces who live there as they get 2hrs free on a weekday and all day Sunday. They use this as a way to avoid in town parking but it's a nightmare for those residents living on the streets who then often have to block another parking space often on another st. (St Davids, Michael's etc)

17	The obstruction of the cycle path is dangerous and the cars obstruct both the pavement and the carriageway. When a bus is waiting at the bus stop, its chaos.
18	The parking at the bottom of the hill just after the St Bart's junction causes traffic issues and makes it nervewracking to ride on a bike
19	I support this proposal. The bike lane is currently unusable due to cars being parked over it . This forces cyclists onto the road.
20	Good. It will be nice to cycle down Andover Road without the cars parked in the cycle lane.
21	I think it's a wonderful idea can you get on with it as soon as possible please. The lay-by is used for cars to park and catch the train so I can't wait for you to start on it

NEWBURY - Bartholomew Street (Plan AL75)	
I OBJECT TO THE PROPOSAL	
1	People wanting to go into town will have yet another obstacle to shop The town will become even more deserted
2	There are lots of restaurants and other food outlets along the street and I object to the lack of free parking along bartholomew street after 6pm
3	Please don't enforce night time charges. People will stop going out!
4	I have only reviewed the Newbury changes as I do not know the other areas well, but I feel my comments apply for all. I find it hard to come to a decision because I feel I have not been given all the information I need to make an informed decision and the only reason you give is a blanket statement of "help manage traffic on our network, improve road safety and support wider transport objectives from any revenue raised.". It just gives me the impression this is some sort of "box ticking" exercise rather than a meaningful attempt at review and consultation? To get a better understanding of why these changes are being done and what they mean I would firstly expect you would fully indicate what the current status of street parking in the area is. Although the plans indicate boxed areas with different colours and shadings, there is no key or labels to explain what the different areas are. Secondly, even with the clear indications mentioned above, I would expect to know a more specific reason for each new proposal. Has the current state of affairs led to numerous complaints and reports? Is it purely to try and boost Council revenue? Is this part of some sort of council drive against motorists in general?
5	Observation : • Loading Bays (High Street Hungerford, Bartholomew Street Newbury): The introduction or extension of loading-only restrictions may increase short-

	term stopping and starting traffic. We recommend monitoring these areas to ensure they do not create pinch points or hazards for cyclists and other vulnerable road users.
6	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
7	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)

	PURLEY-ON-THAMES - Long Lane (Plan BX39)
	I OBJECT TO THE PROPOSAL
1	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	The traffic calming measures are significantly affected by vans from a neighbouring house which are constantly parked by them. This creates an additional obstruction, akin to a super long chicane, which increases the amount of space and time needed to pass the actual chicane. The result of this is that people take unnecessary chances to pass the obstruction and are blatantly rude about not waiting at the 'give way' as they should do. Traffic travelling north is frequently made to stop abruptly because cars wish to pass the chicane and the vans. It is downright dangerous. Making the road no stopping at any time will be a great step forward in making this part of the road safer and will reduce people taking outrageous chances
2	Please implement these proposals! As a resident of Long Lane these restrictions are long overdue.
3	The parking outside No 19 is a nuisance for the car users and pedestrians who are using the width restriction area to cross the road. Most of time, a few big vehicles are parked there which restricts the view. At dark, it is even worse. The lazy parking during school's drop-off & pick-up times near both Long Lane Primary and Denefield School on Long Lane should be banned for the safety of other pupils who walk to

	schools. And, entire Long Lane should have speed limit in place or speed cameras for the safety of school pupils. There are a handful of school in this area, eg Denefield Secondary School, Long Lane Primary, Downsway Primary, Westwood Farm Primary plus Brookfield Special Needs School. Also, every width striction area on Long Lane should have double yellow lines to stop drivers to park cars on their own convenience. Fully understand that many parents have to dash off for work right after dropping off children to schools. But a pity that some don't show any respect to other road users and residents. Residents who live near schools try not to leave house if possible during school's drop-off and pick-up times due to this mad and lazy parking by both schools.
4	The no restrictions stretch on Long Lane always causes obstruction as there always seems to be 2 vans parked there which restrict vision. School times are problematic too as drivers ,"stretch" the allowed parking area. Please note that any restrictions (particularly outside schools) should be better policed. There is very little of this and the restricted areas are abused every day at school times. Obstructive parking is causing problems.
5	Vehicles (regularly more than 1) parked in the area marked on map make it difficult to pass safely when approaching from A329 lights.
6	Vehicles parked in this space block vision for other drivers coming from Oxford Road and it is difficult to pull in the small space available when traffic is coming from the other direction. This is particularly a problem when traffic is busy due to the 2 schools in Long Lane and as the space is used almost all day every day by 2 large vans which seem only to go out at night,.
7	Very supportive of this and think it will greatly increase safety. Current vehicles parking behind the traffic island significantly block visibility for those coming up Long Lane. This forces traffic to commit to unsafe road positioning which cannot easily be corrected (due to the distance to clear these vehicles). These are parked here at all hours. Very supportive and hope this is implemented ASAP.
8	Desperately needed - the place is a zoo at start and end of school day with cars all over the place. Also some residents park large vans on the road and footpath blocking flow and sight lines. A very bad spot.
9	Supportive of junction Visibility Improvements in Purley that protect sightlines, reducing collision risks for cyclists. These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
10	Parking around the school in particular has become incredibly dangerous with several drivers parking on pavements, double yellow lines and residents driveways. This proposal should make this area safer for children and families of Long Lane Primary and Purley Pre School as well as ensure residents can access their driveways
11	The commercial vehicles parked by traffic calming causing dangerous obstruction as you have no sight lines on the give way. Surprised there has not been an accident as it is impossible to see if cars are coming towards you until it is too late.
12	It is impossible to see with cars/vans parked in this position, you have to move out into potentially on coming traffic to see if it is clear. This is especially dangerous with children going to/from school
13	Free flow easy access for emergency services and non obstruction of bus routes.
14	Support because it is a problem for vehicular access
15	We welcome the parking restrictions to improve safety and visibility at this location for walking & cycling

	I WISH TO RECORD A NEUTRAL POSITION
1	If this goes ahead, then more parents will park cars in Orchard Close, and Highfield road. This is inevitable. I would like to see the double yellow lines at the entry to Orchard close extended so that cars entering from Long Lane are not confronted head on by a car at the entry due to cars parked nose to tail on the south side as they do at present. On the east side of Long Lane, just north of the road narrows, there is parking available just south of the road narrows restriction. There are usually 2 panel vans parked there. South bound traffic has very reduced visibility when going out round the restriction, also because of the vans the restriction is more than trebled in length. I would like to see the parking removed and replaced with double yellow lines.
2	This proposal penalises the residents while it will NOT stop parents dropping off and picking up children from Long Lane school. These parents constantly park on the double yellow lines obscuring the view for other drivers and road users of the crossing. Unless this area is constantly monitored it will not be taken seriously by these very inconsiderate and often very rude parents.
3	No additional comment provided

	PURLEY-ON-THAMES – Wintringham Way (Plan BZ37)
	I OBJECT TO THE PROPOSAL
1	It is unclear from the drawings if this is to restrict parking on both sides of Wintringham Way however from the text I assume that it is on one side only. I have objected to this proposal although I'm agreement that restricting parking to one side on this stretch of Wintringham Way is necessary but on the basis that you have selected the wrong side of Wintringham Way. As I live opposite the Social Club in Wintringham Way, it is not the parking on my side of the road that is the problem. By only allowing parking on the Social Club side my access issues will not be resolved - it is often extremely difficult to get out of my driveway due to inconsiderate parking on that side of the road. I feel that this could only get worse if this is the only side of Wintringham Way where parking is allowed. My suggestion is to restrict parking on the Social Club side of the road to alleviate the issue rather than the side in front of 55, 57, 59, 61 and 63 Wintringham Way
2	The yellow lines should go, this is affecting businesses.
3	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	Free flow easy access for emergency services and non obstruction of bus routes. But especially for emergency services accessing the river end residents of Wintringham Way (and River Gardens) - currently, with no parking restrictions, cars parked on the road outside the Purley Riverside Social Club and towards River Gardens block access for any emergency vehicles, especially if a fire engine needed to get through - most of the time they would not be able to access past the Chestnut Grove junction because of parked cars.

2	As a resident of River gardens, i broadly support the proposal. The restriction at the social club end of wintringham is essential for access to river Gardens, for residents, bin collection, post deliveries, other deliveries and couriers, and most importantly for emergency vehicle access. These have all become an increasing issue over the last year. I have one concern. The restriction in Brading way would potentially prevent river gardens residents parking their cars their when threatened by flooding, or during a flood event. Vehicles need to be removed from river gardens during floods and without the option of parking on Brading way, it would be a problem as there is no current alternative.
3	It can be incredibly difficult to utilise the car park at the social club and cafe as drivers park up across the road from the entrance.
4	Supportive of junction Visibility Improvements in Purley that protect sightlines, reducing collision risks for cyclists. These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
5	Inconsiderate parking has been going on for years - blocks the buses, refuse collection and commercial deliveries. Several campaigns by the council and residents has failed to solve the problem
6	Access into River Gardens is currently impeded on numerous occasions. Hopefully this will ease the situation as particularly concerned about emergency vehicle access
7	We welcome the parking restrictions to prevent obstructive inconsiderate parking, this will make it safer for walking & cycling
8	Support so buses can safely drive and not blocked by inconsiderate drivers
9	No additional comment provided
10	No additional comment provided
11	No additional comment provided
	I WISH TO RECORD A NEUTRAL POSITION
1	It does not affect me. The only issue is the bus being able to get through and emergency vehicles.

	PURLEY-ON-THAMES – Chestnut Grove (Plan BZ37)
	I OBJECT TO THE PROPOSAL
1	The proposed clearway will force the bus route to be driving on the wrong side of the road. This is unsafe. There are already regular near misses when the bus sits stationary for long periods of time and cars have to drive around it. By making the side of the road opposite the bus a clear way only encourages this bad behaviour. There are issues with the side proposed as when busses stack (2 stationary is regular occurrence) this will force the stacked bus to park on the wrong side of the road to the

	bus stop. Please stop the insanity and make the clearway the correct side of the road. The side the bus drives on!!!
2	As explained above, river gardens residents move their cars to Chestnut Grove and particularly Brading Way when there is a threat of flood, or an actual flood event. If parking is restricted on these roads it would severely impact flood management.
3	The bus is forced onto the wrong side of the road. Shouldn't this be considered?
4	These yellow lines need to be gone. We never used to have a problem down here.
5	Not needed, please publish the results of this survey, 20 houses in the street and zero want the double yellow lines.
6	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	Inconsiderate parking has been going on for years - blocks the buses, refuse collection and commercial deliveries. Several campaigns by the council and residents has failed to solve the problem.
2	Free flow easy access for emergency services and non obstruction of bus routes.
3	Support so buses can safely drive and not blocked by inconsiderate drivers
4	as above, we welcome the parking restrictions to improve safety and visibility at junctions for walking & cycling
5	The bus often struggles to get through.
6	Access into River Gardens is currently impeded on numerous occasions. Hopefully this will ease the situation as particularly concerned about emergency vehicle access
7	Supportive of junction Visibility Improvements in Purley that protect sightlines, reducing collision risks for cyclists. These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.

	STRATFIELD MORTIMER – Tower Gardens (Plans BX84 & BX85)
	I OBJECT TO THE PROPOSAL
1	The restriction does not go far enough on The Street to stop the parking of cars near to the exit of Tower Gardens onto The Street. It is impossible to see oncoming traffic and make a safe exit. Double yellow or better, single yellow lines should be extended with restrictions during school drop offs and pick ups. Delivery vans will not have any safe

	stop along Tower Gardens restriction. There needs to be single yellow lines with specific times restrictions during school drop off and pick up.
2	With limited parking facilities in the village. And the no waiting at anytime zone on the street, this will create even more difficulties for the parents of Mortimer schools.
3	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	Parking leading up to the Tower Gardens junction (up to 5 cars at a time) both in the morning and evening during term time and on the main road either side of the junction means you are unsighted. This very dangerous particularly at night or bad weather. A similar scenario also occurs on Tuesday lunchtimes. I should point out that trucks for the TA Fisher site often block park on the road (3-5 trucks at a time) and waiting to get in. This can start from 7:15 am.
2	At certain times of day (typically school opening and closing or events at the nearby amenities) there is no visibility to safely pull out of Tower Gardens on either a bicycle or car. The visibility is constantly being blocked by cars parked blocking the exit/junction. School children walking to school and bus stops are at risk of cars turning in with poor visibility. It is unsafe and something needs to be done.
3	I live in Tower Gardens and there is a safety concern regarding the parking situation in Tower Gardens, particularly during school drop-off and pick-up times. As a member of the community, I have observed the growing number of vehicles that are parked also illegally along the double yellow lines within the main entrance in the mornings. This is causing significant traffic congestion and, more importantly, creating dangerous conditions for both drivers and pedestrians. Also pulling out onto The Street, cars are parked either side of the junction which severely limits visibility and make it extremely difficult for drivers to safely pull out, increasing the risk of accidents. The congestion, particularly during peak hours, already poses a risk to children, parents, and other pedestrians who are moving around the area. When vehicles park on the double yellow lines, it not only reduces the available space for moving traffic but also forces vehicles to make unsafe manoeuvres when exiting, as they have limited sightlines due to parked cars. This combination of factors is a recipe for an accident waiting to happen. I understand the challenges that come with managing traffic around schools, but I would like to stress that this situation needs urgent attention. It may be beneficial to consider increased enforcement of parking restrictions or to explore alternative traffic management strategies during school hours, including possible signage, fines, or temporary restrictions on parking. I look forward to seeing positive changes in the area soon.
4	Background I discussed the matter with officers to get a clear understanding of the context, proposal and the options. I understand that MOST of the section of parking restriction that is proposed to be formalised under this proposal, is already marked on the ground, and that BROADLY all we are proposing to do here is formalise what exists, now that a section of road has been adopted. I understand that the current on-the-ground markings were applied by the house builder, to try to dissuade cars - assumed to be school parents - from parking on the approach to the new estate, to avoid obstructing construction traffic. I am not sure whether it is "OK" for a developer to do this, but that appears to be what happened. Analysis 1) I don't think that the whole stretch needed such extensive parking restrictions in the first place. The approach road is reasonably wide and has a straight section. As with any restriction, the questions include why is it needed, where will cars that parked there go instead? Might they go somewhere "worse"? And we have to consider whether drivers will take notice of double lines. Whilst cars parking along one side probably impacted

	construction traffic, that work is close to completion. There seem to me to be an argument for removing some of the restrictions. 2) the proposed restricted area, goes beyond (north of) the junction of the Tower Farm entrance road and The Street. Whilst the red line on the drawing understandably goes round the road junction, east and west, the current on-the-ground markings do not. I am opposed to spending council time and money (we don't really have) adding road markings to match the drawing(s). I think the drawings should be amended to match the as-is/on-the-ground situation. The Highway Code after all supports the fact that no one should park on the corner of the junction. Conclusion: 1) I rule out asking for a section of lines to be removed, along one side of the carriageway, as being too much effort/cost versus reward. I suspect parents will still park/wait on the double yellows if they can't find somewhere else to park. 2) I approve the scheme with the proviso that a) the drawing be amended to match the on-the-ground restriction - so that the drawn lines stop at the junction of Tower Farm approach and The Street as they do on the ground 2) no signage is added (I know none is intended or needed, but I just document this for the record/clarity). I have an on-the-ground photo I have sent to officers to support my description. Thanks [name removed] Ward Member, Burghfield & Mortimer etc
5	We welcome the parking restrictions to prevent obstructive inconsiderate parking, this will make it safer for walking & cycling

	THATCHAM – Lower Way (Plan AU74)
	I OBJECT TO THE PROPOSAL
1	Survey Response – Objection to Making Double Yellow Lines Permanent on Lower Way I strongly object to making the existing double yellow lines on Lower Way permanent. These restrictions were introduced on 5 October 2020 without proper justification, and they should not be legalised now. 1. The original imposition was improper and unjustified According to WBC's own explanation at the time, the lines were installed because this section is part of National Cycle Route 4. This reasoning is no longer valid. The cycle paths- traffic signal and pavements already provide sufficient space for cyclists and pedestrians, and the restrictions have created more safety problems than they solved. 2. Removal of on-street parking in this section of the Lower Way has created a dangerous road environment Since parking was prohibited, traffic speeds have increased significantly. Parked vehicles previously acted as natural traffic-calming. Their removal has resulted in: excessively fast traffic, increased noise, and higher pollution levels. This road is residential, not a through-route or high-speed corridor. 3. The restrictions leave residents without adequate parking When I purchased my home in 2017, on-street parking was permitted. My driveway, at 2.5m wide, does not meet the recommended 3m width and cannot safely accommodate three vehicles. The Council's actions have effectively removed essential parking provision for multiple households. 4. The changes negatively affect residents' wellbeing and right to peaceful enjoyment of their homes The combined impact of these measures over the last five years has been deeply detrimental to health, wellbeing, and quality of life. The situation undermines residents' ability to peacefully enjoy their homes, which is protected under Articles 1 and 8 of the Human Rights Act 1998. 5. The appropriate solution is traffic-calming, not punitive restrictions Instead of legalising these improperly imposed restrictions, the Council should: Remove the double yellow lines, and Impose a 20mph speed limit from the Moor's roundabout to

	the new traffic signals, to address the increased speeding, noise, and emissions. This would improve safety for cyclists, pedestrians, and residents. Final Statement The double yellow lines were imposed without proper justification, have damaged residents' quality of life, and have made the road less safe. Making them permanent would further entrench an unnecessary and harmful measure. I strongly urge the Council to remove the lines and take genuine safety-focused action instead.
2	The map says the proposal is to keep the yellow lines "to prevent obstruction of on-carriageway cycle lane". The cycle lane on this part of Lower Way is on the north side and it is shared with pedestrians. It isn't 'on-carriageway' and so the justification doesn't exist and so the lines should be removed. I'm not saying that cars should be parked on the road all the time but most residents wouldn't do that anyway and the excuse used to keep the lines is incorrect. It's a straight road and if an occasional car parks here it isn't any more of a problem than nearly every other road in Thatcham and we're told by highways when we make complaints about parking in other roads that it helps keep traffic speeds down.
3	Regarding the lower way stretch there is total confusion where the cycle lane is markings are poor and it won't be long before a cyclist is injured as they use the foot path daily. Secondly the double yellow lines has made it into a race track on this stretch. Some drivers cannot get cars off the road as they are too small. It's easy to make these new rules without proper investigation. 20mph required on this stretch. Please investigate [name removed]
4	This is used to park while attending the park or local facilities There will be reduced usage if once again parking is restricted
5	If I'm reading your proposal correctly, wbc have already put the lines on lower way without consultation with the residents. I visit friends, in ill health, regularly in lower way. Their driveway does not have capacity for additional cars. I now have to park in the estate opposite. I have on occasion been verbally abused for doing so, despite not being illegally parked. In addition, the speed on lower way has now increased because there are no obstructions to slow traffic down. These lines were put in place on the whim of a local cyclist, and passers by who don't like having to slow down. There is no logical reason for these double yellow lines whatsoever.
6	Driving around Thatcham is slow as it is, the roads are not frequently involved in dangerous crashes. Total waste of money whilst you're looking to cut services or increase charges elsewhere to balance your huge debt next year. Stop wasting money!
7	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
8	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
9	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
10	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
11	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
I SUPPORT THE PROPOSAL	
1	I strongly support the proposed parking restrictions at this location to prevent motorists from parking on this busy cycling corridor. This will improve road safety for cyclists as they will not have to pull out into approaching traffic to get around parked vehicles. All of the adjacent properties have off-road parking, so they would not be inconvenienced by the waiting restrictions.

2	I support this proposal. The parking restrictions are required to compliment the changes and improvements to the cycle way along Lower Way. The on street parking for Lower Way ensures that the cyclists have a clear line of sight from the Moors roundabout to the pedestrian crossing.
3	Access to Green Lane from Church gate has become difficult with minimal visibility because of cars parked immediately after the junction. These steps will help. It would be wonderful if parking on pavements could be regulated. As a pensioner I try walk rather than drive into the village centre and I always have to walk in the road, often directly from my home at 1 Rosedale Gardens. There are numerous green verges that could be converted into proper parking spaces, instead of the quagmire they have become as people park on them regardless. Mainly though, any parking/traffic regulations need to be enforced or they will just be ignored. [name removed]
4	Despite double yellow lines, there is still unnecessary parking at times.
5	100% behind this We have had countless accidents and near misses at the Meadow Close / lower way Junction This proposal would help a lot
6	I fully support this as so may cars are parked up and causing backlog of traffic during school run / working hours in rush hour(s) there has been a numerous of near-misses with cars going round and leaving the drivers to break or stop. I personally think there should be double yellows all the way through Ilkley Road in Thatcham. I've had a near-miss here several of times. Cars and a white van parked just outside of one of the roads off Ilkley Road which restricts the view of pulling out and going round when turning. A person that lives on Ilkley Road has his own drive way and every morning he will move his car to the road on a bend and leaves it until after school run in the morning and then does it again in the afternoon. I've witnessed him doing this in the mornings. During the school holiday he leaves the car on his car most of the time but occasionally moves it to the road.
7	These changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
8	We welcome the parking restrictions to make it safer for walking & cycling. This is a weak point in the active travel route and these will improve it
9	No additional comment provided
10	No additional comment provided
	I WISH TO RECORD A NEUTRAL POSITION
1	Whilst pavement access is an issue, the allowance for vehicle parking is rarely allowed for in the planning of newer housing developments. How long before this change is being considered in a badly designed new development?

	THATCHAM – Green Lane (Plan AU74)
	I OBJECT TO THE PROPOSAL
1	I believe parking in this area is helpful and useful for both the church and Crown Mead in view of inadequate parking available for both. Even if on street parking was for a limited time, such as 2 hours, rather than not at all.
2	Regarding the lower way stretch ther is total confusion where the cycle lane is markings are poor and it won't be long before a cyclist is injured as they use the foot path daily. Secondly the double yellow lines has made it into a race track on this stretch. Some drive cannot get cars off the road as are too small. Its easy to make these new rules

	without proper investigation. 20mph required on this stretch. Please investigate [name removed].
3	Keep cars away from the junctions but there's no reason to prevent parking on the straight lengths up to the chicane as residents have nowhere else to park and they'll just move into Meadow Close
4	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
5	Driving around Thatcham is slow as it is, the roads are not frequently involved in dangerous crashes. Total waste of money whilst you're looking to cut services or increase charges elsewhere to balance your huge debt next year. Stop wasting money!
6	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
7	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
8	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	I support this proposal. When walking into Thatcham town centre I walk over Green Lane. This can be quite difficult when the cars are parked and other cars are entering or leaving the Green Lane junction with Church Gate. From the path I do not have a clear sight line up Green Lane to the A4. With the no waiting the view up Green Lane will be very much improved.
2	Access to Green Lane from Church gate has become difficult with minimal visibility because of cars parked immediately after the junction. These steps will help. It would be wonderful if parking on pavements could be regulated. As a pensioner I try walk rather than drive into the village centre and I always have to walk in the road, often directly from my home at 1 Rosedale Gardens. There are numerous green verges that could be converted into proper parking spaces, instead of the quagmire they have become as people park on them regardless. Mainly though, any parking/traffic regulations need to be enforced or they will just be ignored. [name removed]
3	Turning onto Green Lane from church gate very dangerous due to parked cars obscuring ability to see oncoming traffic. Also very dangerous for pedestrians crossing. I've witnessed several near misses involving cars and pedestrians here and feel it's only a matter of time before an injury occurs.
4	It is next to impossible to see on coming vehicles when turning in to green lane from church road. Very dangerous when cars are parked
5	I live down meadow close and the parking on green lane is very dangerous you have a restricted view of what is coming the other direction and there is also no need to park along there
6	The junction at Green lane is dangerous with parked vehicles.
7	We welcome the parking restrictions to prevent obstructive inconsiderate parking, this will make it safer for walking & cycling

	THATCHAM - Meadow Close (Plan AU74)
	I OBJECT TO THE PROPOSAL
1	I believe parking in this area much be very useful for the church in view of the very inadequate parking for the church, especially at times of attendance for stressful things such as funerals. Again, a limited timeslot would be better than no parking at all and would allow time for a church service, after all, the church was there first!!
2	Regarding the lower way stretch there is total confusion where the cycle lane is markings are poor and it won't be long before a cyclist is injured as they use the foot path daily. Secondly the double yellow lines has made it into a race track on this stretch. Some drive cannot get cars off the road as are too small. Its easy to make these new rules without proper investigation. 20mph required on this stretch. Please investigate [name removed].

	THATCHAM – Enterprise Way (Plan AY75)
	I OBJECT TO THE PROPOSAL
1	1.0 Background 1.1.1 SLR Consulting Limited (SLR) has been instructed by Forterra to review the amendment of on-street parking restrictions proposed by West Berkshire Council. 1.1.2 Forterra operate a building supply production facility located on Enterprise Way, Thatcham (the Site). The Site is served by typical HGV distribution of inbound raw materials and outbound finished product. 1.1.3 West Berkshire Council are undertaking statutory consultation on the amendment of onstreet parking restrictions. The proposals seek to remove sections of unrestricted waiting/parking on Enterprise Way. 1.1.4 The following provides a review of the local highway conditions and how the parking amendment proposals could affect the local highway and the operation of the Enterprise Way Forterra site. 1.1.5 This Technical Note concludes that the parking amendments are not necessary and will in fact have an overall adverse impact on the local highway. 1.1.6 Forterra therefore strongly object to the proposed parking amendments detailed within Area AY75 and request that these elements are removed from the overall scheme. 2.0 Local Conditions 2.1 Enterprise Way 2.1.1 Enterprise Way is a single carriageway road, subject to a 30mph speed limit, which serves commercial/industrial land uses. There are street-lit footways on both sides of the carriageway. 2.1.2 Enterprise Way forms a simple priority junction with Pipers Way at the west and runs in a west-to-east alignment for approximately 600 metres where it terminates with a turning head. A map showing Enterprise Way in its local context is provided within Figure 2-1. 2.1.3 There are four main businesses served directly off Enterprise Way; Forterra, Gist Limited, an M&S distribution centre and SSE (rear access only). Enterprise Way also serves Berkshire Drive where there are a number of smaller industrial/commercial uses. 2.1.4 Forterra makes up the majority of the southern side of Enterprise Way, other than businesses served off Berkshire Drive to the west, and has two points of access/egress. 2.1.5 Enterprise Way is covered by an on-street parking restriction (double yellow lines), other than three uncontrolled sections (unmarked) on the southern side of the road which measure approximately 40 metres, 105 metres and 40 metres. The uncontrolled sections are used for on-street parking and waiting by cars and HGVs. These sections have the capacity to accommodate approximately 30 cars (if exclusively cars). 2.1.6 The first 100 metres of Enterprise Way from its junction with Pipers Way is covered by double yellow lines. 2.2 Local Highway 2.2.1 Access to the strategic road network is via Pipers Way, which links with the A4 Bath Road to the north. 2.2.2 Pipers Way is largely unrestricted in terms of on-street car parking, but parking tends not to occur. A review of the 'West Berkshire Interactive Parking Restrictions Map1' available online indicates that no waiting/parking is allowed on the footway or verges at any time. 2.2.3 The A4 Bath Road and its roundabout junction with Pipers Way is signed as a 'Clearway', therefore vehicles are not permitted to stop on this link. 2.2.4 Surrounding

residential streets, served off Falmouth Way and Agricola Way are unrestricted in terms of on-street parking, which are all located within an 800m distance (10 minutes walk time at industry acknowledged average pace) from Enterprise Way.

2.3 Accident Data Review

2.3.1 A review of Personal Injury Accident (PIA) data available on the web-based database Crashmap2 indicates that there have been zero incidents recorded during the most recent 10-year period on record anywhere on Enterprise Way or in the proximity of its junction with Pipers Way. An extract of the data is provided at Figure 2-2.

2.3.2 The above indicates that there are no highway safety issues on Enterprise Way

3.0 Proposed Parking Amendments

3.1 Context

3.1.1 West Berkshire Council are undertaking statutory consultation on the amendment of onstreet parking restrictions. The Statement of Reasons for the proposed amendments are as follows: 'WEST BERKSHIRE DISTRICT COUNCIL (PROHIBITION AND RESTRICTION OF WAITING AND LOADING, PARKING PLACES AND RESIDENTS' PARKING (CONSOLIDATION) ORDER 2009 (AMENDMENT NO 37) ORDER 202[] STATEMENT OF REASONS This Order is proposed to revise existing parking restrictions and introduce additional parking restrictions to improve road safety at identified problem locations. Specifically, this Order will address concerns related to inconsiderate parking in the vicinity of the mandatory cycle lanes on Andover Road in Newbury and Lower Way in Thatcham and address HGV parking on Charnham Street in Hungerford. The Order will also resolve issues related to resident parking, together with the management of parking on highways in various locations across the district. Accordingly, with reference to Section 1(1)(a) (c) and (f) this Order is necessary to:

1. Avoid danger to people and other road users / or for preventing the likelihood of danger
2. Facilitate passage on the road of other road users
3. Preserve or improve the amenities of the area'

3.2 Area Code AY75 Enterprise Way

3.2.1 Enterprise Way is located within Area AY75. An extract is provided within Figure 3-1, the plan is attached in full at Appendix A.

3.2.2 The above plan shows that the three sections of unrestricted on-street parking on the southern side of Enterprise Way will be amended to 'No Waiting at Any Time' consistent to the rest of Enterprise Way. This will be marked by double yellow lines.

3.2.3 These amendments remove local on-street parking capacity by approximately 30 cars, or a combination of cars and waiting HGVs.

4.0 Overview and Potential Implications

4.1.1 The proposed amendments seek to remove the three sections of Enterprise Way on-street parking, which equates to a capacity of approximately 30 cars, or a combination of cars and waiting HGVs.

4.1.2 West Berkshire Council have stated that the parking amendments may be required for the following reasons:

- Avoid danger to people and other road users / or for preventing the likelihood of danger;
- Facilitate passage on the road of other road users; and
- Preserve or improve the amenities of the area.

4.1.3 Enterprise Way serves an established industrial/commercial area with no through route. It is street-lit and has standard footways on both sides of the carriageway which are not impeded by on-street parking activity. Enterprise Way has a carriageway width of 7 metres which is wide enough for a HGV to pass a parked/moving HGV without any issues.

4.1.4 The first 100 metres of Enterprise Way from Pipers Way is covered by double yellow lines restricting any parking/waiting close to the junction, as to not impact the operation of the junction.

4.1.5 A review of accident data has determined that there have been no incidents recorded on Enterprise Way or its junction with Pipers Way in the most recent ten-year period on record.

4.1.6 The proposals are likely to result in the displacement of existing car parking to nearby roads without restrictions; this could be Pipers Way or surrounding residential streets, served off Falmouth Way and Agricola Way which are all located within a 800m distance (10 minutes walk time at industry acknowledged average pace) from Enterprise Way.

4.1.7 The proposals are likely to result in the displacement of HGV parking/waiting which is currently accommodated

	within Enterprise Way to elsewhere on the highway network. 4.1.8 On the basis of the above review, it is deemed that the parking amendments proposed on Enterprise Way are not justified by the West Berkshire Council Statement of Reasons and will in fact have an overall adverse impact on the local highway. 4.1.9 Additionally, the parking amendments may result in the need for costly redevelopment of the Site's layout on Enterprise Way to accommodate additional car parking and HGV parking/waiting. 5.0 Objection 5.1.1 In view of the above, Forterra strongly object to the proposed parking amendments detailed within Area AY75 and request that these elements are removed from the overall scheme.
2	Business require the ability to park here and have access to services
3	Driving around Thatcham is slow as it is, the roads are not frequently involved in dangerous crashes. Total waste of money whilst you're looking to cut services or increase charges elsewhere to balance your huge debt next year. Stop wasting money!
4	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically
5	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
6	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	We welcome the parking restrictions to prevent obstructive parking in the vicinity of the junction, this will make it safer for walking & cycling

	THATCHAM – Colthrop Lane (Plan AZ75 & AZ76)
	I OBJECT TO THE PROPOSAL
1	You will simply force the drivers parking in the industrial estate to find alternative places to park which will be in residential areas in Thatcham - where else do you think they will go. Have you considered this - probably no! Why don't you just leave things as they are. I am fed up with this council making stupid decisions with tick box consultation exercises. You are the most unpopular council ever and you will be forced out at the next local elections.
2	This is used by locals and business visitors. Without parking the ability to trade will be affected
3	Any obstructions that slow traffic is a good thing. Removing parking speeds up roads causing more risk & pollution. All roads outside and around schools should be 20mph automatically

	THEALE – Englefield Road (Plan BT56 & BT57)
	I OBJECT TO THE PROPOSAL
1	I am writing in my capacity as Clerk to Englefield Parish Council in response to this statutory consultation on the amendment of on street parking restrictions. Englefield Parish Council's concerns relate to Amendment 37 and the proposals affecting Englefield Road, Theale, which will also affect Englefield Parish. Whilst Englefield Parish Council supports practical and proportionate measures to improve the safety of road users and pedestrians around Theale Primary School, we wish to object to these proposals on the following grounds: 1. We are concerned that the current restrictions are already being ignored and not effectively enforced by the authorities. We attach photographs showing examples of this and what is happening in practice in North Street too. 2. We understand that the proposals are in response to concerns due to an incident or incidents relating to parking adjacent to Nos. 63 & 64 Englefield Road and the entrance to Theale Social Club, which lies to the east of the school, whereas these proposals also extend over a much larger area to the west of the school and into North Street itself, albeit not far enough into North Street. 3. We are very concerned that the additional restrictions to the west of the school on Englefield Road will have the unintended consequence of creating more danger than at present by displacing parking westwards around the North Street and Deadman's Lane junctions, on a bend in Englefield Road, and towards the A340. Has the Council undertaken a traffic study and risk assessment to model the impact of these proposals? 4. We would urge the Council to consider whether the additional restrictions to the west of the school will be effective, especially if the current restrictions are not being enforced. 5. Whether or not these proposals proceed, Englefield Parish Council requests that robust parking restrictions must be in place and enforced around the North Street junction and into North Street itself but extending further than now proposed to go beyond the Golf Club drive up to the point at which North Street narrows. We attach your plan ref BT56 with that additional area shaded in blue.
2	We object to your proposal to restrict the parking seven days a week, twenty four hours a day. We agree that there is an issue with parking during school term times and on Saturday mornings when Theale Parish Council allow football matches to be played on the North Street recreation ground. We suggest that a more effective solution would be restricted parking between 8 am and 5 pm Monday to Saturday by way of a single yellow line with appropriate signage, as is the case further down Englefield Road near St Luke's Church.
3	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	I support this proposal as the road gets very busy and congested during school drop off and pick up times. it is a death trap and I worry every morning and afternoon when taking and collecting my children from school. I do wish the council would install double yellow lines along the Englefield Road from outside the school to the narrowing before the doctors surgery and to install a zebra crossing outside the school gates! like the have with every other school in the borough, I don't why the new development in Theale has been granted a zebra crossing to the secondary school however we have

	been told no to the primary school. Waiting for an accident to happen is an absolute disgrace!
2	As a North St resident, it is impossible for us to leave North St and drive into Theale during 8.30am - 8.50 and then again at 3pm - 3.30pm as cars are parked along this road waiting to get into kiss and drop. Unless there is a person managing this I doubt anything will change. You certainly cannot try and get to the Dr's surgery or the village during this time period.
3	I support the proposal to alleviate the need at certain times to drive in the wrong side of the road right up to the junction on North street/Englefield Road due to parked cars dropping or collecting children. I have had approximately 7 near misses in 2025 alone of cars turning into the top of north street and narrowly avoiding accident due to my forced position in the road. I also feel the restriction at the top of north street doesn't extend far enough down North street and should continue to the next junction towards Theale Golf club behind the Primary school. This also needs to be strictly enforced during peak times as I feel a simple signage and road markings will not prevent this dangerous issue.
4	Supportive of junction visibility improvements in Theale as these changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
5	The issues were highlighted before the Primary School was built, so these additions are welcome. A Zebra Crossing should also be considered for additional safety.
6	We welcome the parking restrictions to prevent obstructive parking in the vicinity of the new school, this will make it safer for pupils to travel by walking or cycling
7	No additional comment provided
8	No additional comment provided
9	No additional comment provided
	I WISH TO RECORD A NEUTRAL POSITION
1	More needs to be done to stop cars parking along entire stretch of North Street between the junction with Englefield Road and the entrance road to the golf club. Cars park all the way along this stretch such that often vehicles heading south to Englefield Rd are forced to travel that entire length on the wrong side of the road. Several near misses have occurred when vehicles then turn into North Street at the same time. Cars also park on the pavement opposite the golf club road entrance blocking the pavement and endangering pedestrians. With the proposed restrictions on Englefield Road more cars will seek to park on that stretch of North Street inappropriately. They have even blocked the road due to bad parking and trying to park on the single carriageway part!

	THEALE – North Street (Plan BT56)
	I OBJECT TO THE PROPOSAL
1	The on-street parking restriction should be extended to include the section of North Street from and including the junction of North Street and Englefield Road, on both sides of North Street, to the point where the road narrows to a single track about twenty metres north of the junction with the access road to Theale Golf Club. The current parking behaviour of parents dropping off and picking up children means that the junction is rendered unsafe to traffic, cyclists and others who are forced to leave North Street on the wrong side of the road and who then, in turn, block entry to any vehicle,

	cyclist or other user entering North Street from the Englefield Road. Additional parking for parents at peak times, perhaps at the Recreation Hall could provide a solution.
2	The proposed on street parking restriction does not go far enough down North Street. Parents will continue to park down North Street to where the road becomes single track, blocking residents access to their homes in North Street. They will also use the access road to Theale Golf Club to park!
3	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
I SUPPORT THE PROPOSAL	
1	There should be no waiting or parking at the end of North street and between entrance of golf club , as cars coming in and out of north have no alternative to be on the wrong side of the road another accident waiting to happen , parents and guardians sit in their cars till pick up time and even more dangerous with people opening their doors on the drivers side of the car creating a dangerous situation and not acceptable for residents of north st as it is a sixty mile an hour road which is also dangerous and many accidents on north street with Amazon drivers
2	I have had approximately 7 near misses in 2025 with vehicles turning into the top of north street and narrowly avoiding accident due to my forced position in the road. I also feel the restriction at the top of north street doesn't extend far enough down North street and should continue to the next junction towards Theale Golf club behind the Primary school. This also needs to be strictly enforced during peak times as I feel simple signage and road markings will not prevent this dangerous issue.
3	As a resident of North Street put at risk by the large number of cars parking at the end of North street between the golf course entrance an the Englefield Road to collect children at the end of school I support this proposal BUT IT NEEDS EXTENDING UP NORTH STREET FROM THE ENGLFIELD ROAD TO THE GOLF COURSE DRIVE ENTRANCE TO REMOVE THE CONGESTION AND DANGER FROM CARS PARKING ERRATICALLY AND PULLING OUT AND TURNING IN THIS NARROW LANE.
4	We welcome the parking restrictions to prevent obstructive parking in the vicinity of the new school, this will make it safer for pupils to travel by walking or cycling
5	The issues were highlighted before the Primary School was built, so these additions are welcome.
6	Supportive of junction visibility improvements in Theale as these changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
7	No additional comment provided
I WISH TO RECORD A NEUTRAL POSITION	
1	More needs to be done to stop cars parking along entire stretch of North Street between the junction with Englefield Road and the entrance road to the golf club. Cars park all the way along this stretch such that often vehicles heading south to Englefield Rd are forced to travel that entire length on the wrong side of the road. Several near misses have occurred when vehicles then turn into North Street at the same time. Cars also park on the pavement opposite the golf club road entrance blocking the pavement and endangering pedestrians. With the proposed restrictions on Englefield Road more cars will seek to park on that stretch of North Street inappropriately. They have even blocked the road due to bad parking and trying to park on the single carriageway part!
2	As a North St resident, it is impossible for us to leave North St and drive into Theale during 8.30am - 8.50 and then again at 3pm - 3.30pm as cars are parked at the end of North St, between the Englefield Road and the Golf course junction. This end of

	North st is already a serious road safely issue as you have to drive on the wrong side of the road up to the junction. By changing to No Waiting on Englefield road, my concern is that more parents will try and park along this end of North St and start parking on both sides of the road. If you add no waiting on Englefield road, this should be brought all the way down from the Junction on Englefield Road to where the road narrow's as there is no footpath for parents to park along. I have some photo's to explain better but not sure I'll be able to attach to this survey. We have some elderly residents and they struggle to get to Doc's appointments/Pharmacy during this time of the day.

	TILEHURST – Longleat Drive (Plan BX42)
	I OBJECT TO THE PROPOSAL
1	Barbara's Meadow and Conifer Drive are already almost impassable to residents during the morning school rush-hour. Preventing parking on Longleat will push more parking into Barbara's Meadow and Conifer Drive. It's better to have it spread out across all the roads. Rather than just shifting the problem, Denefield School needs to do more to discourage parents from driving their children; the vast majority of kids live close enough to cycle or walk to school. Or perhaps create a safe drop-off area within the school grounds?
2	I am objecting to the proposal contained in Area Code BX42 for Longleat Drive, Tilehurst. The Two proposed NO WAITING AT ANY TIME zones will result in School Staff & Pupils from Denefield School parking all-day in Cranmer Close and Hawthornes. The subsequent inconsiderate parking will block access to the Residents of both cul-de-sacs. I have seen your Refuse/Recycling lorries and Home Delivery lorries struggle to drive through Longleat Drive due to all-day parking on both sides of the road. Because of the relatively narrow widths of Hawthornes and Cranmer Close, the inconsiderate all-day parking will result in more difficulty to these larger vehicles which occasionally must use these roads. This is in addition to problems we will face using our household driveways with vehicles parked opposite. At present we can ask a neighbours visitor to move, if we have problems accessing our drives. Nobody from West Berkshire Council ever monitors or enforces the current No Parking or Waiting Restricted zones in Long Lane, Knowsley Road or Longleat Drive. Parents picking up School Children are often stopped for about ½ hour waiting for them to come out of School. Many drivers park half on the Pavement believing they are not obstructing the Road and therefore complying with the Parking/Waiting restrictions currently in place. Denefield School should provide sufficient On-Site parking for their Staff and many car using Students. If they cannot park near to the School, they park all-day in adjacent Residential roads such as Barbaras Meadow, Confer Drive, White Lodge Close, Addiscombe Chase & Rosemead Avenue. Again, causing nuisance to those Residents. These points are a complete contradiction to your three published Statement of Reasons to justify the proposed parking amendments. 1- Avoid danger to people and other road users / or for preventing the likelihood of danger. 2- Facilitate passage on the road of other road users. 3- Preserve or improve the amenities of the area.
3	Received by post on 17/12/25 reads: We wish to object to the proposed new parking restrictions around the area of Denefield School. Firstly, these restrictions should be extended to the whole of Hawthorne's and not just the junction. This is a small cul-de-sac and by restricting parking in other surrounding roads it will cause drivers to park in Hawthorns causing a huge problem for the residents. The second problem is that its not just the drop off times that are a problem. Now children attend school until they are

	18 they drive to school parking on both sides of the road. As well as causing problems for the residents emergency vehicles would not be able access these roads. We would ask that parking should only be for residents of these small roads. these school should provide parking for their students so it doesn't impact our lives. we hope you will give this your urgent attending as the proposal offered will cause major problems to us. we look forward to your reply and view on our situation.
4	Received by post on 18/12/25 reads: I am writing with regard to the proposal to have no parking restrictions along Longleat Drive, Tilehurst to try to alleviate the road being used by parents and older students of Denefield School as a car park. Whilst this may seem a good idea on paper, in reality it will only result in Cranmer Close and Hawthorns being used as car parks instead. Both roads are usually quiet with a number of elderly residents having frequent visitors and obviously this would cause more problems. I realise something needs to be done about the parking in Longleat Drive and also at the end of the road in Long Lane with parents waiting to pick up their children as the roads aren't wide enough to help the traffic proceed, especially if emergency services are needed. For example, a fire engine would never manage to get through the cars which are often parked on both sides of Longleat Drive. I hope you can give further thought to this problem and find a solution which would please everyone, especially local residents. Just a thought, could some money be found to put hard standing for cars in the grounds of the school?
5	Received by post 17/12/25 reads: i am writing to you to lodge my complaints to you proposal to increase the parking restrictions in Longleat Drive. It seems to me that you have not considered the knock on effect that these proposed changes would have on the two small cul-de-sac roads that lead off Longleat Drive, both in the Hawthornes and Cranmer Close. Our lives at certain times of the day are already a nightmare with the volume of school traffic that we have to endure. Unfortunately, we are pretty much equal distance between two schools - Denefield Secondary school and Downsway Primary School, therefore we already endure the traffic from not just one school but two! I believe your proposal will make our lives even more stressful during school times, particularly drop off and pick up times. At these times it is not only difficult to get in and out of our roads but even on and off our drives! Larger vehicles such as delivery and refuse lorries already struggle accessing our roads so again, I think this will only get a lot worse with your proposals. Vehicles already illegally park everywhere in our roads so I do not think your proposal will make any difference to that particularly as no enforcement of any restriction is ever undertaken or likely to be. Due to the nature of most properties in Hawthornes, a lot of elderly retired people live in the cul-de-sac. Some of these have care visitors several times a day. if the road becomes full of parked cars, where are these care visitors going to park? To make matters worse, a considerable number of the older pupils at Denefield School now have cars and drive them to school. they do not park in the school grounds they park all day in our roads and use them as meeting places at times with their friends to play music at elevated levels and use the road as the school litter bins! there is so much spare land with the confines of Denefield School. why cant extra car parking be provided within the school boundaries for their own pupils rather than using our roads as their school car park? i thought the idea of local councils was to improve the quality of life for its residents? I think West Berkshire is hell bent on doing exactly the opposite of this!
6	Cars already parking at school times in Cranmer Close - this will just make people use the offshoot roads instead.
7	There is little evidence of this need other than a few residents complaining to their councillor. No drive ways are blocked and there have been no accidents recorded. When a traffic officer attended to see what was going on he found nothing.

8	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
9	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
	I SUPPORT THE PROPOSAL
1	I am a resident of Longleat Drive. Both parents and pupils continue to park dangerously on Longleat Drive, in violation of the highway code. We have complained to Denefield school previously but nothing has changed. They park opposite junctions and on both sides of the road. They are obstructing access for emergency services, and it is dangerous for other road users and residents.
2	The school traffic is horrendous- parents have no regard to safety of the children and other road users. Such a shame they have to park as near as possible some nearly an hour before school is let out.
3	I support the proposal and would go further and suggest that the no waiting time be extended in the morning from 8.30 to 10am. Not only do we suffer from frankly dangerous drop offs and pick ups, we also have poor parking by school students throughout the day. I live in Cranmer Close and the junction restrictions will help. I do have a concern though and this is that the restrictions will not change behaviour, they will simply shift it down the road, impacting further on residents. Other suggested improvements: 1) From the plans, it seems that the stretch of road after the restriction and directly opposite the junction with Longleat Drive on the school side will not be restricted. Cars are regularly parked here in the morning/afternoon, causing obstructions and making it difficult to turn right into Longleat Drive. Please consider extending the no waiting area to include this stretch of road. 2) I believe I'm right in saying that at the new primary school in Thele, that parents are able to drive in and out at drop off? If that is the case, could this be considered at Denefield? This will keep traffic flowing. We are fortunate in that when our child was at school, they were walking distance from Downsway and Denefield but I do appreciate that not all students/parent are able to do this and that a lot of drop-off are on the way to work. Being able to drive in and out of the school would help. I appreciate that there may be other factors such as security that may make this unworkable. 3) Can students be allowed to park on-site at Denefield? They park dreadfully and often leave litter in their wake 4) Possibly off topic but please please please consider removing the restrictions along Long Lane and in conjunction with road humps and flashing speed signage, move to a 20mph zone. Having lived with this for a number of years there are negatives associated with it. a) It causes drivers to drive dangerously, speeding up to get through (I have seen many near misses) b) It creates congestion at peak times, harming the air quality due to vehicles idling c) it creates congestion at non-peak times (school holidays and weekends), harming air quality due to vehicles idling. I would be happy to be part of a focus group if that is something you are planning.
4	As a resident of Long Lane this proposal and these restrictions are long overdue. At school drop-off and collection times I'm either a prisoner in my home or excluded from getting to my home by inconsiderate and sometimes abusive parents! I'm also treated to parents turning around in my drive. Personally I'd like to see double yellow lines on the whole of Long Lane on both sides of the road. If this isn't practical or possible then at least down to White Lodge Close. Finally, it's all well and good having restrictions but how do you plan to enforce these restrictions? And by who?
5	As for the proposed parking restrictions I am for them , however have reservations on how they will be controlled or adhered too by the drivers. The present plan would result in all school parking , pickup and drop off , being carried out in our small close, pushing the present parking chaos, into the Hawthornes. Without further restrictions at present

	the traffic during school hours is madness resulting in blocked drives ,roadways there is no way any emergency services would gain access to the close due to (park anywhere at any costs) regardless Of any consequence. We have a motorhome which we can only use outside school hours, due to the parking both sides of the road in Longleat drive In most cases a long way out from the curb, thus considerably reducing the width most days. Therefore in an Emergency a Fire engine would not get through which could result in dire consequences. We would request further parking restrictions ,be included to the full length of the entrance to Hawthornes without the parking restrictions during School times, we fear the close will become a no go area during school hours for residents. This will cause friction between road users and residents as most are very elderly which could result in delaying the Emergency services during a critical timespan.
6	Fully support this proposal. I live in a road near Longleat Drive and regularly see the road full of cars at both drop off and pick up times, mainly for Denefield school, but also for Downsway. The road typically stays heavily congested during the day as sixth formers at Denefield park their cars there. My one concern if this proposal proceeds is that it will push more vehicles to Barbara's Meadow. This road is also heavily congested during drop off and pick up times, and usually has about 5 cars per day left by sixth formers. I fear this road will end up with even more sixth formers leaving their cars there all day if no similar parking restrictions are implemented.
7	Received by post 17/12/25 reads: whilst I agree with the parking proposal, I would like you to consider a restriction on parking in Long Lane, opposite Longleat Drive as per the Highway Code. Also, if the hedge of 137 Long Lane could be cut back which restricts the view when pulling out of Longleat Drive. Both of these issues are concerning, when pulling out into Long Lane and vehicles are coming through the traffic calming on the wrong side of the road at speed.
8	I feel this is a good idea having seen the amount of parents and students who park here causing a dangerous situation.
9	Inconsiderate parking by parents and pupils is unacceptable. Residents and their visitors are not easy to access their own properties.
10	We welcome the parking restrictions to prevent obstructive parking in the vicinity of the school, this will make it safer for pupils to travel by walking or cycling. Parking restrictions are needed at the junction for visibility
11	It's an accident waiting to happen it's well overdue
12	Supportive of junction visibility improvements in Tilehurst as these changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
13	No additional comment provided
14	No additional comment provided
I WISH TO RECORD A NEUTRAL POSITION	
1	Received by email 16/12/25 - I would like to provide you with some feedback from Denefield School on your proposals, forming part of your parking review (Ref: PSA037). Denefield School are broadly supportive of any measures that will increase the safety of pedestrians and drivers, including around Long Lane and Knowsley Road. There are already a number of parking restrictions around Denefield School, unfortunately we do not believe these are currently being enforced by the LA, which leads us to believe that the amendments proposed in plan BX42 will not be enforced either. The first step in public safety is to ensure that current restrictions are enforced before further restrictions are added. The school believes that if the measures in BX42 concerning Long Lane and the junctions with Longleat Drive and Knowsley Road are introduced, they will aid public safety if enforced. The school believes that the proposals to

	restrict parking further into Longleat Drive do nothing to aid public safety. In my consultation with Residents, specifically those that live in Barbara's Meadow, The Hawthornes and Cranmer Close, we all believe that restricting parking in Longleat Drive will push parking into those roads, which are narrower and harder to negotiate, making it an unacceptable change for them, and will do nothing to aid public safety. We also believe that, if you wish to restrict parking associated with picking up and dropping off, the restriction times should reflect our start and end times. An 8.30 start for restrictions is too late, as the children are supposed to be in the school by 8.28
2	Letter received through the post 17/12/25 reads: I am writing to you in regard to the latest parking restrictions for Longleat Drive and Canmere Close. As I also live in Hawthorne's this will probably have a knock on effect on us in Hawthorne's. I would just like you to consider that when doing this.

TILEHURST – Heathfield Avenue (Plan BZ50 & BZ51)	
I OBJECT TO THE PROPOSAL	
1	Object to the measures proposed. (Note: Objections with no supporting reasons for objection can be discounted)
I SUPPORT THE PROPOSAL	
1	It is extremely dangerous as the online parking causes a blind spot when driving from Fairway going through Heathfield and then onto Halls Road. Also the reverse is true. I often find myself having to pause while waiting for oncoming traffic to come from Fairway. But I have already committed. So traffic continuing on Halls Road have to swerve. Restrictions would mean safe access both in and out of Fairway. As a resident of Fairway I applaud this proposal.
2	Over the last few years these junctions have become dangerous due to inconsiderate parking right up to the road junction. We know that the owners of the cars doing this do not even live in Heathfield Ave. Large delivery lorries have real problems negotiating between the cars. it is only a matter of time before a serious accident occurs.
3	Cars have parked all alongside that road for years now, right up to the junction. Often cars park so close to the junction, that you can't pull over to the left hand side and have to sit dangerously in the middle of the road. They are definitely not residents of Heathfield. When you coming out of the road and a car is coming in the opposite direction, there is nowhere to pull over. Accidents nearly happen every day. You can not cross the road very well because you can't see beyond the cars until you are in the middle of road. Plus, I can't image what it is like for the two ho
4	Supportive of junction visibility improvements in Tilehurst as these changes will significantly enhance safety, encourage active travel, and align with West Berkshire's wider commitments to sustainable transport.
5	The cars have increased to the whole of Heathfield, right up to the end of the road. It's very dangerous turning into the road and is an accident waiting to happen.
6	Parking restrictions are needed to prevent obstructive parking which is unsafe for walking and cycling
I WISH TO RECORD A NEUTRAL POSITION
