

Application Number: 20/03074/COND3

We welcome the school's revised approach to the management of traffic within and into their site for the duration of the build. The change from use of Arlington Lane, to implementing a one way system via Oxford Road and Wantage Road (pre-existing entrances) will prevent significant issues for the local community on Arlington Lane.

We would like to take this opportunity to request that the Council consider the option of putting new permanent signage onto Arlington Lane to state that the single lane road, with no turning capacity is 'Not suitable for HGV's'. This signage will assist in two ways, firstly, there is subsidence on the weak bridge toward the top of the lane which has caused damage to the land owners fence and field (due to heavy goods vehicles passing through) and it will help to prevent further issues here as well as keep road users, cyclists, walkers and horse riders safer. In addition, it will assist the school in managing the traffic to the stated aims within their revised proposal and help prevent heavy goods vehicles from using the lane instead of their proposed access.
